

MUNIS report runs for the school records request of 4 September 2026

As of 6 Oct 2026: 0 of 5 runs received, 2 partly received, 3 still needed.

5 runs, most useful first — send them in this order, as each is ready. Each row gives the screen, the boxes, and the guide page that shows it. The Account Detail export for a special-education fund can carry a payee's name — see “Removing payee names” below.

#	Report and status	MUNIS program / menu path	Selection	SET (value)	CHECK ✓ / UNCHECK	Years / how many runs	Output
1	Every school transaction, all funds, FY2023–FY2026 YTD Budget Report, with journal detail PARTIAL Fund 1301 (athletics), FY2024–FY2026, already held (received before this request, Jun 2026). Fund 1300 FY2026 received 6 Oct 2026 as a trial balance with journal lines, not the full Account Detail export. Every other fund, and fund 1300 for earlier years, still needed.	- Financials > General Ledger Menu > Inquiries and Reports > YTD Budget Report [C7] [F94] - Program ID glytdbud, as the Town's reports print it [H:p09]	- Search (or Seg Find): leave every field blank except — [C7] [F79] - Department = 300 301 (Fund blank: every fund) [B8] [H:p09] [H:fy24] - Account type = blank (expense AND revenue) [C7] [F94]	- Execute this report = Now [C7] - Sequence 1 = Fund, Total ✓; Sequence 2 = Department, Total ✓ (as the Town runs it) [C8] [H:p09] - Order accounts by = full account [F98] - Account description = Full [C8] [F98] - Year/period = Within year/period, 2026 / 13 [C9] - Carry forward = Totals (GAAP) [C9] [F99] - Format type = Cents in Budget Amount [F100] - From Yr/Per = 2023 / 0 To Yr/Per = 2026 / 13 [C10] [F102] [F101] - Sort option = Journal entries [C10] - Detail format option = Standard [C10] [F102] - Multiyear view = Default view [C10] - Journal Entry Sort pop-up (AP journals) = 3 [C11 (screenshot)]	CHECK ✓ - Print full GL account (C's walkthrough leaves it off; the full number is needed) [F98] [C8] - Print report options [C8] [F98] - Print journal detail [C10] [F101] - Include budget entries (the transfers) [C10] [F101] - Include encumb/liq entries (the POs) [C10] [F101] - Include additional JE comments (C's walkthrough leaves it off; the comments are wanted) [F102] [C10] UNCHECK - Totals only [C8] [F98] - Suppress zero bal accts (C's walkthrough checks it; every account is wanted) [F100] - Exclude YEC journals [C9] [F100] - Include requisition amounts [C9]	- ONE run, FY2023 to FY2026, if the From/To range may span four years. [F102] - If it may not: one run per year, newest first — From YYYY/0 To YYYY/13, Year/period YYYY/13. - Special-education accounts: request item 2's exception still applies — vendor number rather than name.	Excel and PDF — see “Getting it out as Excel”.
2	Every transaction on the school-related general fund revenue accounts, FY2023–FY2026 YTD Budget Report, with journal detail STILL NEEDED	As run 1.	- Fund = 0100 [H:p09] - Account type = Revenue [F94] - Object = 450600 451100 431900 437400 473000 450700 [B8] [H:rev] [H:fy20] (or Object blank: all general fund revenue — fine too)	As run 1.	CHECK ✓ - As run 1. UNCHECK - As run 1.	As run 1: one run if the range may span the years.	Excel and PDF.
3	History of every PO of PO fiscal years 2023–2026 PO Audit Report (screen title: Audit File PO History) STILL NEEDED	- Financials > Purchasing > PO Inquiry and Reports Menu > Standard PO Reports > PO Audit Report [C23] - Program ID poreport [C24]	- No account fields on this screen: it covers every Town PO of the years. [C24] - POs = 00000000 to 99999999 [C24]	- PO fiscal year = 2023:2026 (or 2023..2026, or 2023 2024 2025 2026) [C24] [B8] - Audit date = 07/01/2022 to the day it is run [C24]	CHECK ✓ - Include carry forward POs [C24] [C23] UNCHECK - Do NOT press Purge. [C24] - Please say whether PO history has ever been purged, and through what date: the guide says this report “can be used periodically to purge old history records”. If it has, the early years may be gone. [C23]	- ONE run for PO fiscal years 2023–2026, if the year box takes a range. The guide's own caveat: “not all are available in all fields”. [B8] - Otherwise one run per PO fiscal year, newest first: 2026, 2025, 2024, 2023.	Excel (toolbar).

#	Report and status	MUNIS program / menu path	Selection	SET (value)	CHECK ✓ / UNCHECK	Years / how many runs	Output
4	OPTIONAL — open and closed balances of every school PO, PO fiscal years 2023–2026 Encumbrance by PO Number (screen title: Open Encumbrance by PO Number) STILL NEEDED	Financials > Purchasing > PO Inquiry and Reports Menu > Standard PO Reports > Encumbrance by PO Number [C25]	- Department = 300 to 301 (this screen takes from/to ranges) [C25 (screenshot)] - POs = 00000000 to 99999999 [C25 (screenshot)]	- Report = Detail [C25] - PO fiscal year = 2023:2026 (the drop-down beside the year is not explained in the guide) [C25 (screenshot)] [B8]	CHECK ✓ - Include GL account information [C25 (screenshot)] - Include zero balance POs (a PO since closed has nothing left open) [C25 (screenshot)] - Include carry forward POs [C25 (screenshot)] UNCHECK —	- ONE run for PO fiscal years 2023–2026, if the year box takes a range. The guide’s own caveat: “not all are available in all fields”. [B8] - Otherwise one run per PO fiscal year, newest first: 2026, 2025, 2024, 2023.	Excel (toolbar).
5	Year-end position, every account, FY2023–FY2026 (period 13 each) YTD Budget Report, summary PARTIAL School department 300, FY2023–FY2026, and all 61 school funds, FY2023–FY2026, expense only, received 6 Oct 2026. Department 301, every other town department, and general-fund revenue still needed.	- Financials > General Ledger Menu > Inquiries and Reports > YTD Budget Report [C7] [F94] - Program ID glytbdud, as the Town’s reports print it [H:p09]	- Search: leave EVERY field blank — the whole town, every fund [C7] - Account type = blank (expense AND revenue) [C7] [F94]	- Execute this report = Now [C7] - Sequence 1 = Fund, Total ✓; Sequence 2 = Department, Total ✓ (as the Town runs it) [C8] [H:p09] - Order accounts by = full account [F98] - Account description = Full [C8] [F98] - Carry forward = Totals (GAAP) [C9] [F99] - Format type = Cents in Budget Amount [F100] - Year/period: if your screen allows several years in one report, ONE run covering FY2023–FY2026 at period 13. Otherwise one run per year, newest first: 2026/13, 2025/13, 2023/13, 2024/13. [C9] [F98] - The guides show one year per run; TJ has seen a multi-year run demonstrated, so ask for the combined report first. [F98]	CHECK ✓ - Print full GL account (C’s walkthrough leaves it off; the full number is needed) [F98] [C8] - Print report options [C8] [F98] UNCHECK - Totals only [C8] [F98] - Suppress zero bal accts (C’s walkthrough checks it; every account is wanted) [F100] - Exclude YEC journals [C9] [F100] - Include requisition amounts [C9] - Print journal detail [C10]	- Combined first; if not possible, four runs: 2026/13, 2025/13, 2023/13, 2024/13. - FY2023, ask first: the report reaches “three years ago” at most. FY2023 is three years before 2026 and four before 2027, so it may already be out of reach if MUNIS has rolled to 2027. [F98] [F99] [C7] - Narrower is fine: Department 300 301 for the school — but then the general fund revenue accounts drop out, and need Fund 0100 with Account type Revenue added as a run of their own.	Excel and PDF.

Notes that apply to every row

Every run: the full account number

- Every export must carry the FULL account number as one column, like the Town’s own exports already do:
- ACCOUNT = 0100-3-300-2330-03-2-12-1-511103 (the Town’s FY2026 YTD Budget Report in Excel) [H:p12x]
- ACCOUNT = 1301-0-000-0000-00-0-00-0-104000 (the Account Detail export sent in June) [H:ad]
- ...plus ORG, OBJECT and PROJECT STRING where the report has them. [H:ad]
- The first segment is the fund and the last the object; 2330 is a DESE function code. That function code is the only thing joining the Town’s ledger to the district’s budget. The printout alone does not carry it: the printed report gives the short form, e.g. “62001901 511000”, and leaves the fund to the page heading. [F79] [H:peg]
- YTD Budget Report: check Print full GL account (prints the full number instead of org/object/project) and Order accounts by = full account. The Town’s Excel carried the full number even when the printout did not. [F98] [H:p12]
- The Town’s FY2023 school printout shows the full number when it is printed that way. [H:fy23]
- Encumbrance by PO Number: check Include GL account information. PO Audit Report: no guide shows an account option, and its sample prints Org, Obj and Proj only — the PO number joins it to run 4. [C25 (screenshot)] [C24]

Getting it out as Excel (all runs)

- YTD Budget Report: after Accept and Back, choose the output — Excel. A PDF of the same run too: with Print report options checked, the printout ends with the options page, which the spreadsheet does not carry. [C10] [F102]
- Purchase order reports: the Excel button on the report’s own toolbar. [C24 (screenshot)] [C25 (screenshot)]
- Where the export shows a list of fields to export (the Munis Office Export Filter), leave EVERY field selected -- except a payee-name column, if you choose to remove it (see “Removing payee names”). Only selected fields are exported, and MUNIS keeps the last selection — so a field unticked for an earlier export stays unticked until somebody ticks it again. Then Accept, and Open or Save the file. [L6 (screenshot)] [L6]
- “The Excel option is almost always visible and active in the MUNIS Ribbon.” [B5]
- The export to Excel is shown in “Browse and Export to Excel - Munis 101.07” (Professor Finance, YouTube) at 5:46, per TJ: <https://www.youtube.com/watch?v=rRJg-ICfQyI&t=346s> [V 5:46]
- Its automatic captions (YouTube’s, not a transcript) say Excel can be reached “from the Browse screen” or “from the main account inquiry screen”, and that the two give “two totally different data sets”. [V 6:00–6:13]
- Please send .xlsx. If only CSV is possible, that is fine — we will import the account columns as text.

Selecting several funds or departments at once

- | means OR; a colon or two dots mean a RANGE. The guide's own examples: 710|720 is “710 or 720”; 11500001:11500010 is the range. It also warns not every field takes every wildcard. [B8]
- The school is Department 300|301 (or 300:301 — nothing lies between). The Town's own FY2024 period 13 school report, headed ACCOUNTS FOR: 300 SCHOOL DEPARTMENT, printed 46 funds, expense and revenue, in one run. [H:fy24]
- Selecting by Fund instead does not work as well. A single range 1300:2914 across the school funds would also sweep in 113 other funds that hold no school account, and a list by Fund misses the general fund's school accounts unless 0100 is in it — which brings in every town department. Department, or blank, is the clean selection.

What can be combined into one run, and what cannot

- IN ONE RUN — every fund: the Town's own FY2024 school report did it. [H:fy24]
- IN ONE RUN — expense and revenue together: leave Account type blank. Our 4 September request split them; it need not. [F101]
- IN ONE RUN, PROBABLY — four years of transactions: the From/To boxes take “the range of years and periods”. Multi-year runs are confirmed by TJ from a demonstration video. The guides' own example stays inside one year. [F102] [C11 (screenshot)]
- POSSIBLY ONE RUN — the year-end position (run 5): the guides show one Year/period per run, but TJ has seen a multi-year run demonstrated, so the combined report is asked for first and one run per year is the fallback. [F98]
- SEPARATE — journal detail and the year-end summary. They are one program and one checkbox (“Follow all steps as before”), so a run is one or the other. A detail run prints its lines “for each account”, but no guide shows that output, so whether it also gives each account's closing line is not established — hence both are asked for. [C10] [F101]
- NOT SEPARATE — budget transfers and spending: Include budget entries adds the transfers to the same detail. [F101]
- SEPARATE — school transactions and the general fund revenue accounts: different selections; one run would need every field blank, which is four years of every Town transaction.
- SEPARATE from the ledger runs — purchase orders: a Purchasing program. [C17]
- POSSIBLY ONE RUN — the PO years: 2023:2026 in the year box (Burlingame p8 range syntax), if that field takes it; otherwise one run per year. [B8]

Removing payee names from the Account Detail export

- The funds on the request whose number or name reads as special education: 2640 SPECIAL ED CIRCUIT BREAKER; 2742 FY17 SPEC ED PRO IMP #274; 2758 FY23 240; 2800 FY25 140 080524093026; 2813 FY25 #240; 2814 FY26 #240. Listing all of them is not a guess at which one prompted the question.
- The column that can carry it: VDR NAME/ITEM DESC, in the Town's own June 2026 Account Detail export. In that export, REFERENCE, REF1 and REF3 hold transaction codes and batch references rather than names — worth a look before sending, since a different fund's export may use them differently. [H:ad]
- CHECK NO, and where a payment carries one VOUCHER or WARRANT, can be traced back to a payee through the check register — deleting a name column after export does not by itself stop that. [H:ad]
- Simplest, and needs no MUNIS feature: after exporting to Excel, delete the name-bearing column(s) — at minimum VDR NAME/ITEM DESC — before saving, for these funds. Everything this project analyses survives without it: fund, org, object, account, dates, journal, source and amount.
- A middle ground, if business vendor names should stay: replace only the payees who are individuals with a neutral word such as INDIVIDUAL. In a fund this small, a line's amount and date alone can still point to one family, so for those lines sending them grouped by object and month — rather than line by line — may serve the purpose better.
- A MUNIS-side option, if this screen offers it: on the export-to-Excel step, one guide describes being able to “Check/ or uncheck anything you want to see or not see within this report” before the file is created. If Lunenburg's version shows that picker, unchecking VDR NAME/ITEM DESC there removes it before the spreadsheet exists. [L6]
- Entirely at your discretion — we only need the columns above to keep tying what was budgeted to what was spent.

Where the option names come from

Lunenburg publishes no MUNIS guide. Option names are given exactly as these guides print them — chiefly the CNMI's guide (C) and Tyler's 2020.2 procedures (F) — and Lunenburg's version may label some differently. Where a guide only shows an option in a screenshot it is marked (screenshot). Anything not named in a row: leave it as the Town usually runs the report. If a box here is missing from the Town's screen, or a run cannot be made as written, saying so is as useful as the data.

- V** Browse and Export to Excel - Munis 101.07, Professor Finance (YouTube), at the time given. <https://www.youtube.com/watch?v=rRJg-ICfQyl&t=346s> — not downloaded; title and channel from YouTube's oEmbed record.
- H:** A report the Town has already run, as we hold it: **p09** = the Town's FY2026 period 9 YTD Budget Report, general fund, options page; **p12** = the Town's FY2026 period 12 YTD Budget Report, printed; **p12x** = the same report as the Town's Excel export, sheet ACCOUNT DETAIL; **peg** = the Town's FY2026 period 9 YTD Budget Report, PEG Access fund; **fy24** = the school department's FY2024 period 13 YTD Budget Report, run 08/07/2024; **fy23** = the school department's FY2023 period 12 YTD Budget Report, run 02/28/2024; **rev** = the Town's FY2026 period 9 YTD Budget Report, general fund revenue; **fy20** = the Town's FY2020 4th-quarter revenue report, as extracted (under "31 DEPT REV - SCHOOL" the account numbers and the labels come out as two separate lists, paired here by order); **ad** = the Account Detail export the Town sent in June 2026, sheet Journal Detail Export.

Appendix: what each run answers

#	Report	What it answers
1	Every school transaction, all funds, FY2023–FY2026	- The transactions behind every school line: a price rise told apart from more bought (request item 2). - What each grant and revolving fund paid for, by object. - What each budget transfer moved, from which line to which (item 3). - Purchase orders liquidated after 30 June (item 5).
2	Every transaction on the school-related general fund revenue accounts, FY2023–FY2026	- How state aid and the other receipts arrived, and when (request item 2(c)). - Whether any receipt carries a reference tying it to what it paid for (the request's one question). - The six, as the Town prints them in FY2026 (fund 0100, org 01001, under "001 REVENUES"): 0100-01001-450600 CH 70 AID; 451100 CHARTER; 431900 PS TUITION (FY20: PRE-SCHOOL TUITION); 437400 PARKINGFEE (FY20: STUDENT PARKING FE); 473000 SPED REIMB (FY20: MEDICAL ASSIST/SPE — Medicaid reimbursement, not the circuit breaker; label truncated); 450700 MSBA REIMB (FY20: MSBA REIMB - SCHOO). - The four department-revenue and MSBA accounts are the Town's own "DEPT REV - SCHOOL" and "MSBA REIMBURSEMENT" headings (FY2020 Q4 report [H:fy20]).
3	History of every PO of PO fiscal years 2023–2026	The date each PO changed — when it was received, liquidated or closed, including after 30 June (item 5: "and dates").
4	OPTIONAL — open and closed balances of every school PO, PO fiscal years 2023–2026	Only if easy — the audit report above carries the history; this adds original vs remaining per PO, by account (item 5).
5	Year-end position, every account, FY2023–FY2026 (period 13 each)	The final position of every account at each year's close: budget, transfers, spent, left — every school account, every school fund, every town department.

Open questions from our gap register these runs would settle

- Which budget line each dollar of grant and revolving money paid for [\[run 1\]](#)
- Why the school department's FY2024 actual spending differs between its period 13 ledger and the general fund history, on 12 of 265 lines [\[runs 1, 5\]](#)
- Whether a general fund athletics line is net of the revolving fund [\[run 1\]](#)
- Which fund and account each field-rental receipt from Lunenburg Youth Soccer was posted to, and whether the \$15,000 turf contribution is inside or beside them [\[run 1\]](#)
- What put \$62,231 into the School Facilities Use fund (1306) in FY2025 — the balance went from \$3,010.67 at 30 June 2024 to \$65,241.82 at 30 June 2025, more than the fund has taken in in any of the thirteen years the annual reports print [\[run 1\]](#)
- Whether a rise in the paraprofessional line is more posts or a grant unwinding [\[run 1\]](#)
- Why a budget line came in under plan, as against by how much [\[run 1\]](#)
- What the schools actually spent, per line, in any year before FY2026 [\[run 5\]](#)
- What each town department was appropriated and spent in FY2024 and FY2025 [\[run 5\]](#)
- Which departments' unspent appropriations produced the free cash [\[run 5\]](#)
- Whether a school line that stops appearing in the district's book stopped being funded [\[run 5\]](#)

Prepared 7 October 2026 by the Lunenburg Budget Project (lunenburgbudgetproject.org) from the guides and reports named above, by scripts/build_munis_request_runs_pdf.py. Inputs digest c6af53d5664521a9.
