

TOWN OF LUNENBURG

ANNUAL REPORT FOR FISCAL YEAR 2020

In Memoriam

Elisabeth "Sis" (Ryan) Montuori, 87, of Lunenburg, died peacefully July 28, 2020 surrounded by her loving family. Her husband of 65 years, Lawrence "Lawrie" Montuori, died January 16, 2020. Sis worked alongside Lawrie as bookkeeper of Lunenburg Oil Co, the business they operated together for 36 years. She was a talented seamstress, working out of her home. Sis was a faithful member of St. Boniface Parish and St. Boniface Women's Guild. For years, she oversaw St. Boniface's annual Red Cross Blood Mobile, earning awards for the high volume of donations. She volunteered on the T.C. Passios Elementary School Community Council, Lunenburg High School Football Boosters and the Council on Aging. Sis had a passion and talent for cooking, interior decorating, entertaining, and gardening. She had an unconditional love of life, family and friends. She leaves a son, three daughters, a half-brother, eight grandchildren, six great-grandchildren and several nephews and nieces.

Bessie H. (Platt) Lindsay, 90, passed peacefully on July 30, 2020. Bessie was married to the love of her life, Edmund K. Lindsay, who sadly left us in 2001. Bessie was born in Shandaken, NY, daughter of the late William and Shirley Platt and one of seven siblings. Bessie was proud of and dedicated to her community. Her volunteerism was extensive including at the Eagle House and the Lunenburg Senior Center and the Lunenburg Friendly Seniors, where she was also a member. Bessie was incredibly active and loved to have fun with family and friends!

Douglas K. MacMillan, 88, died August 7, 2020. He was the owner of Cherry Hill Dairy Farm. He and his wife Marilyn celebrated their 64th anniversary on May 5th. He was born in Sweetsburg, Quebec on November 22, 1931. He went to a one-room school in Bolton Pass until grade 6 and then attended Knowlton Academy in Knowlton, Quebec. He moved to Lunenburg in 1951 with his parents and ran Cherry Hill Dairy Farm, eventually becoming the owner. Douglas was a country music fan and he always had the radio on and he could be heard singing all over the farm. He loved telling jokes, doing crossword puzzles, playing cards and visiting family and friends. He was a member and a director of the Massachusetts Cooperative Milk Producers Federation, a longtime member and a director for 9 years of ASCS, a lifetime member of The Grange and a member of the United Parish of Lunenburg.

Bruce W. Smith, 75, passed away August 26, 2020. He was a member of the first Lunenburg High School football team and a 1963 graduate of Lunenburg High School. Bruce served in the U.S. Air Force from 1963 to 1969 and then attended Northeastern University. He returned to the Lunenburg Football field as an assistant coach from 1979 through 2004. Bruce was a Correctional Officer for the MA Dept. of Corrections for 15 years. He enjoyed coaching the Lunenburg Blue Knights and acted as a father figure to so many of his student athletes. Bruce had a positive impact on thousands of athletes which included many enjoyable years with the Lunenburg Bengals as well as Lunenburg Youth football. Bruce was inducted into the Massachusetts High School Football Hall of Fame as Assistant Coach of the Year in 2002 after 23 years of dedication. Bruce loved spending time with his family and friends, and he lived life to the fullest. The most important thing in his life was his family and he spoke about them often.

Donald F. Bowen, 88, passed away on October 6, 2020. Don was born in Boston on December 21, 1931. He attended high school in Boston and graduated from Northeastern University in 1962. Over his career he worked in sales for a number of high-tech companies. He served in the U.S. Navy between 1950 - 1951. He moved to Lunenburg in 1980 and loved his home on Lake Shirley. He was active in his community and served as a board member for the Lunenburg Zoning Board for 30 years, the latter years as Chairman.

Don loved spending time with family and friends and he lived life to the fullest. He was a loyal and generous friend and a loving and dedicated father. The most important thing in his life was his family. He is survived by his daughter Dawn-Jean and son-in-law Drew; son Mark and daughter-in-law Donna; his grandchildren, Justin, Nicole, Danielle, Anthony, Jacob and Alexandra and his great grandchildren, Liam, Grace and Mae.

LUNENBURG PROFILE

YEAR INCORPORATED- 1728

REGISTERED VOTERS-8628

FY'20 TAX RATE-\$18.12

OPEN TOWN MEETING GOVERNMENT- FIVE MEMBER SELECT BOARD

ANNUAL TOWN MEETING- 1ST SATURDAY IN MAY

ANNUAL TOWN ELECTION- 3RD SATURDAY IN MAY

AREA- 26.63 SQUARE MILES

ROAD MILES- ABOUT 100

Lunenburg was settled in 1718 and incorporated in 1728. It occupies a land area of approximately 26.4 square miles. Lunenburg is located in north central Massachusetts approximately 43 miles from Boston. It is bordered on the west by the Town of Ashby and the City of Fitchburg, on the south by the Town of Lancaster and the City of Leominster, on the east by the Town of Shirley, and on the north by the Town of Townsend.

Local legislative decisions are made by an open town meeting consisting of all registered voters in the town. Subject to the legislative decisions made by town meeting, the affairs of the town are generally administered by a five member Select Board and a Town Manager. Local school affairs are administered by an elected seven member School Committee while local taxes are assessed by a three member Board of Assessors, all are appointed on an at-large basis for staggered three-year terms.

Lunenburg is a semi-rural community located in northern Worcester County. Three water bodies account for somewhat of a clustered approach to the town's historical development. Lake Whalom and the former Whalom Amusement Park delineated the Whalom District from the remainder of Lunenburg. This district was developed as a housing base for many factory workers working in the mills and factories of Leominster and Fitchburg. In many ways the characteristics of the Whalom District closely reflect characteristics of these cities more than of the rest of Lunenburg. The Hickory Hills area, around Hickory Hills Lake, was developed as a private community comprised largely of vacation cottages. The third body of water is Shirley Reservoir, a public water body also developed with mainly vacation cottages that have now been modified to year-round residences.

Commercial and industrial development is permitted in several areas of town, primarily along the two major arteries (Routes 2A and 13) and the town's peripheries, due largely to the close proximity of Leominster's and Fitchburg's sewer and water systems. Although many farms and orchards had slowly developed into single family housing, farming continues on in Lunenburg. In 2013 the Annual Town Meeting voted to establish an Agricultural Commission to represent, preserve, and enhance farming in the community and to administer the "Right to Farm" bylaw.

The 2015 Lunenburg Town Meeting established the Architectural Preservation District ("District") bylaw to regulate construction, demolition or renovation of existing "Contributing Property" structures as defined by the bylaw within an established bounded district. The bylaw was introduced at Town Meeting along with the Village District Bylaw, which created an overlay zoning district to encourage mixed-use commercial and residential development. While the Village District Bylaw encourages the economic vitalization of downtown Lunenburg, the Architectural Preservation District Bylaw ensures that it will not come at the expense of the town's historical character and integrity.

REPORT OF THE TOWN MANAGER

Fiscal Year 2020

This year, as I write this report on the achievements of fiscal year 2020, my mind immediately goes back to March of 2020 when all our lives were turned upside down. We can all relate that this past year has been a roller coaster and everyone has faced personal and professional challenges that no one could have foreseen. From a local government standpoint, there were a myriad of obstacles and uncertainties facing cities and towns across our nation that our local and school leadership team also faced, such as providing a continuity of services to our residents and businesses during a pandemic, food insecurity for our youth and elders, re-opening measures that adequately protected our employees, students and the public, remote learning for students, remote public meetings, a vast array of changes in state and federal legislation that affected our daily operations, and the list goes on. The town department heads and school leadership teams and our staff came together during this time and met these challenges head on. As a town we witnessed attitudes of perseverance, innovation, and an overall desire to help our residents, students, and businesses throughout this pandemic. I want to recognize the immense thought and effort that town and school staff put into how we provided services this past year and how everyone rose to the challenge.

During fiscal year 2020, in addition to all the responses that were needed in light of COVID-19, there were many topics addressed and accomplishments to highlight:

- In July of 2019, as part of the annual goal setting process, the Selectmen reviewed their goals from FY19 and formalized their goals for FY20. The goals the Board identified for FY2019 included identifying, defining, discussing, and finalizing the criteria to be used in determining the use and/or re-use of the Town Hall, Ritter, old Primary, Brooks House, and TC Passios and to propose at least one project to the 2020 Annual Town Meeting regarding the use and/or reuse of the old Primary School. The Board identified the criteria used in determining the use and/or re-use of the aforementioned buildings in the fall of 2019 and discussed the future use of the old Primary throughout the year and continued to narrow down the focus for the future use of this building into 2020. The Board made progress on determining the future use of the old Primary School property as a future open space/passive recreation space with additional parking that is lacking in the center of town.
- The Town Manager's goals for FY 2020 included developing and implementing steps towards the redevelopment/reuse of 925 Massachusetts Avenue, implementation of a recycling contamination enforcement program, and planning/implementing accessibility improvements. All of the action items identified for each of the Town Manager's goals were completed.
- In July and August the Board met multiple times to finalize a Special Event Policy. The Board also did their annual review of all their policies and adopted a new Buy Recycled Policy and made various updates to the existing policies. In September the Board adopted a Social Media Policy.
- This year was another productive year for infrastructure projects in Lunenburg. Besides the continuation of the \$4M Pavement Management Plan on local roads, the Town continued to work with the engineering firm on the Pleasant Street Bridge Project that is expected to be complete by the spring of 2022. The DPW also undertook culvert repairs on Northfield Road and Sunset Lane and repairs to the Townsend Harbor Bridge. The Summer Street Road Reconstruction project that was awarded in 2018 was substantially complete by the fall of 2019.

- The Board and the Town Manager worked with Montachusett Planning Commission on a Walkability and Parking Study for the Main Street area and the Whalom area. A report was presented to the Board in December of 2019 and is available on the town website.
- In August of 2019 the Board created the TC Passios Building Design Committee that would work with a selected architectural/engineering firm on the schematic and design development of the space at the TC Passios building for town offices, school uses and community uses. The appointments for this Committee were finalized by the fall.
- In the fall of 2019 the Town Manager worked with a consultant to apply for grant funding through the Municipal Vulnerability Preparedness (MVP) Program, which provides support for cities and towns to plan for climate change and implement key adaptation actions for resiliency. The planning grant applied for is a necessary step in order to apply for construction costs to implement projects that are identified during the planning phase. The Town received a Municipal Vulnerability Preparedness (MVP) Planning Grant and hired a consultant to guide the planning process, including holding the required all day workshop, listening session, and to complete the vulnerability assessment and develop an action oriented climate resiliency plan. Communities who complete the MVP program become certified as an MVP community and are eligible for action grant funding to implement projects in their action plan. At the conclusion of this planning phase the Town submitted the action plan to the State, which was subsequently approved.
- The Town Manager presented a finalized Police Union agreement to the Board for a three year agreement in the fall that equated to a zero dollar impact to Fiscal Year 2020, mainly due to attrition in the Police Department during Fiscal Year 2020. The agreement included a 2.5% COLA for year one, 2% for year two, and 2% for year three and increased the educational incentive over three years. The costs for year two were estimated at \$81,000 and year three costs were estimated at \$74,000, with the total cost of the agreement to \$139,000.
- The Special Town Meeting in November 2019 included a number of articles such as amending the FY 2020 budget to capture additional tax growth, the purchase of the 994 Northfield Road (also called the Saliba property and/or Table Rock) for conservation and recreational purposes for \$282,000, bylaw amendments, a non-binding question on the demolition of the Old Primary School property, acceptance of Butterfly Lane as a public way for municipal purposes, a deposit of \$88,222 into the Special Purpose Stabilization Account and two home rule petitions for additional liquor licenses.
- In December, the Board approved all the annual liquor licenses, common victualler, weekday entertainment, automatic amusement, jukebox, and motor vehicle licenses. Throughout the year, the Board reviewed Earth Removal permits, liquor license transfers, Special Event permit requests, flammable storage licenses, pole petitions, tollbooth requests, and held Dangerous Dog hearings.
- The Select Board held an Earth Removal Workshop in August 2019 and had the annual renewals for earth removal permits at the end of August. In January 2020, they held a public hearing for a new Earth Removal Permit at 1325 Massachusetts Avenue and approved the permit with a number of conditions. The Board held a discussion about the Earth Removal Permitting process at their February 18, 2020 meeting.

- The Town Manager, DPW Director, and engineering firm WorldTech presented a proposal to the Selectmen for a Tier 3 Complete Streets application that the Board agreed to submit to MassDOT for Tier 3 funding totaling \$258,000 in September of 2019. This application, which included improvements to the Main Street area, creation of an improved pedestrian crossing from the Ritter Building to Town Hall, sidewalk improvements to Memorial Drive, and improvements to the Main Street/Oak Avenue intersection. The Town received notification it was awarded \$258,000 in construction funding in January of 2020. The engineers worked on the design plans throughout 2020.
- The Town Manager presented a balanced budget for Fiscal Year 2021 to the Finance Committee and Selectmen in mid-February. Part of the Town Manager's recommendation was to continue to fund the Other Post-Employment Benefits Trust Fund for the unfunded liability of retiree health insurance in the amount of \$110,000, an additional \$50,000 towards Pavement Management, and fund the regular Stabilization fund in the amount of \$100,000. The FY2021 budget also included the hiring of an additional Full Time Patrolman, an additional Full Time Firefighter, additional hours for the Assistant Town Clerk and Board of Health Administrative Assistant, additional funding for Facilities and Public Rights of Way ADA Improvements, and a 2.5% increase for the Lunenburg Public Schools and Monty Tech. In mid-March department heads were still presenting their budgets to the Finance Committee and then the COVID-19 pandemic caused a ripple effect that meant revamping the entire FY 2021 budget. All new additions to the budget were put on hold in order to see the impact on our estimated revenues for FY21. The pandemic also required us to postpone the Annual Town Meeting from May until June and it was held on Saturday, June 13th with all public health and CDC safety protocols in place. The total omnibus budget for FY21 that was approved in June was \$38,658,115. By the fall Special Town Meeting in November 2020, with the first quarter revenues trending in a normal trajectory, all the items that were deferred were able to be funded with the exception of the additional hours for the Assistant Town Clerk and the additional \$50,000 for Pavement Management.
- There were multiple projects that addressed accessibility at various town facilities, town property, and public rights of way throughout the year. In February the engineering firm that completed the ADA Public Rights of Way Plan presented the results of the plan to the Select Board and recommendations for funding the non-compliant ramps, sidewalks, and crosswalks. The Town Manager applied for and received a District Local Technical Assistance grant to complete the ADA Self-Evaluation and Transition Plan by Montachusett Regional Planning Commission. The Town also received an earmark in FY20 for the repair of the handicapped ramp at the Town Hall in the amount of \$27,000 that was put out to bid in April and was completed by the beginning of July.
- Various improvements were made to town facilities over the course of Fiscal Year 2020 including rebuilding the back entrance to the Ritter Building, repair of the DPW Building roof, upgrading the HVAC system in the older portion of the Eagle House Senior Community Center, energy efficiency improvements at the Public Safety Building, and repair of a portion of the Eagle House Senior Community Center roof. The removal of the underground fuel tanks located at the DPW and the installation of a new above ground tank commenced in September 2020.
- The redevelopment and/or reuse of 925 Massachusetts Avenue, an old vacant gas station with potential environmental hazards, has been a property the Town has sought to clean-up for over a decade but due to the unknown environmental hazards have not taken the property for back taxes so that the onus of the potential clean-up costs was not borne by the Town. The Town Manager submitted a Brownfields Site Assessment Grant through Montachusett Regional Planning Agency for the costs of a Phase II environmental site assessment, which was approved in the amount of \$30,000.

- The Town Manager applied for Community Compact funds to implement two best practices, a Continuity of Operations Plan and a Financial Trend Monitoring System. The State notified the Town Manager in May that both applications received funding, totaling \$50,000. The pandemic highlighted the lack of a written Continuity of Operations Plan to ensure that there would be no interruption in services and back-ups for all personnel and programs were identified. Due to the uncertain economic times caused by the pandemic and the impact it had on the budget process, the implementation of a Financial Trend Monitoring System that would review certain key financial indicators and positive or negative trends was considered another important best practice. The consultant for both projects, the UMass Collins Center, began working with the Town in June. Both projects are expected to be complete by June of 2021.
- The Assistant Town Manager put out a bid for the disposition of town owned property at 17 and 23 West Street. There were no bids received in the initial bid process so it was re-advertised a second time and was awarded to the high bidder in the amount of \$35,000.
- The Selectmen and the Town Manager made their annual appointments in June for FY 2021.

The most prominent event of 2020 was the issuance of a State of Emergency by Governor Baker on March 10, 2020 and the impact COVID-19 had on the operations of the town, the school, how it affected our residents and the businesses in town. There were countless actions needed in response to the different actions and COVID-19 related legislation that affected our day to day operations, but I will limit it to the most significant undertakings:

- On March 10th, the day Governor Baker declared a State of Emergency in response to the outbreak of the Coronavirus, we were forced to take swift, decisive actions to ensure we could continue providing services to the public and our businesses in the event of a shutdown. On Tuesday, March 17th the Town Manager, Chairman of the Select Board, Police Chief, Fire Chief, and Board of Health Agent provided a public update through Public Access on the actions that were being taken and public health information on the Coronavirus.
- Public meetings were suspended the week of March 16th and resumed the week of March 24th under the emergency changes made to the Open Meeting Law that allowed for fully remote meetings. The Town began using Zoom as our remote meeting platform, which meant a different method of scheduling all meetings, public access to be trained to broadcast Zoom meetings, and training for all board, committee, and staff members that would be using this platform.
- On March 24th the Select Board declared a local state of emergency and voted to delay the Annual Town Meeting from May until June 13th and on March 28th the Board voted to file a Court Order to extend the deadline for nomination papers for the Annual Town Election. On March 31st the Board voted to postpone the Annual Town Election until June 20, 2020.
- Town Offices closed to the public on March 16th but the employees remained in the building. During this time an assessment was done to determine what steps were needed and what IT equipment was needed for employees to work remotely. Our IT staff did a phenomenal job getting everything in place for this to occur in short order. On March 23rd non-public safety employees began working remotely and continued to do so until June 2nd.
- In April, in response to the Federal Family First Coronavirus Response Act, the Town adopted an Emergency Family and Medical Leave Policy and an Emergency Paid Sick Leave Policy. The Board also voted to authorize emergency expenditures related to COVID-19 per MGL 44, Section 31 and voted to waive penalties and interest on tax bills that would be due on May 1st until June 29th.

- The budget process was coming to a conclusion around the time the State of Emergency was issued and the unknown effect on Local Aid from the State and the impact on local receipts, required the Town Manager to revamp the entire budget. This revised budget cut all the new additions, deferred half the capital plan, and the deposit into the OPEB Trust Fund. The Town Manager also issued a spending freeze on non-essential hiring and expenditures in April in order to maintain a positive cash flow in the event of an impact to our local receipts in the fourth quarter of 2020.
- The passing of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) provided over \$1 Million in relief funding for unbudgeted, COVID-19 related expenses incurred after March 27, 2020 to the Town and other educational relief funds provided some relief to the Town and School for eligible expenses. CARES Act funds did not allow for revenue shortfalls but did pay for such things such as Personal Protective Equipment, IT equipment, plexiglass structures, additional cleaning needed at facilities and other COVID-19 related expenses.
- The Town participated in a regional Community Development Block Grant application that would provide microenterprise assistance for businesses and assistance to food banks. The application was approved in July of 2020.
- In June the State issued a temporary approval process for outdoor seating and outdoor liquor sales for licensed businesses per Executive Order #35. The Board approved all of the applications for outdoor seating and outdoor liquor sales from our local businesses.
- Since mid-March the Town Manager has provided weekly COVID-19 updates at the Select Board meetings with local, state, and federal updates. This information is posted to the town website at www.lunenburgma.gov/departments/town-manager/covid-19-information-center.

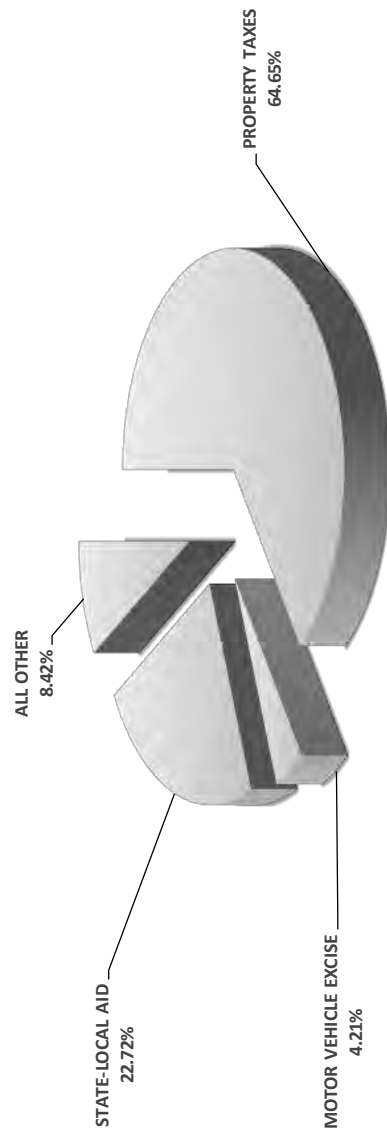

As of writing this report, it has been four years since I was appointed your Town Manager and it is a responsibility that I take very seriously. The residents of Lunenburg demonstrate the true meaning of community that I have witnessed in various acts, this was especially apparent in 2020. We thank all of our community members who have helped their fellow residents throughout this pandemic.

I have the privilege of working with many talented individuals that are committed to helping the residents and business owners of Lunenburg and are consistently looking for ways to better serve the public. The accomplishments noted above, among the numerous day-to-day responsibilities, could not happen without the cooperation of dedicated staff, appointed, and elected officials that make the wheels of town government turn. Thank you to my Executive Assistant, Elaine Peterson and Assistant Town Manager Julie Belliveau for all your hard work and keeping the office running smoothly. I would also like to thank the committee and board members, department heads and staff for the high level of service they provide to the residents of town. Specifically, I would like to express gratitude to the current and former department heads that led our various departments in 2020: James Marino, former Police Chief; Thomas Gammel, current Police Chief; Patrick Sullivan, Fire Chief; Jack Rodriquez, former DPW Director; Robert Oliva, current DPW Director; Karen Brochu, Town Accountant/Finance Director; Myleen Mallari, Treasurer/Collector; Sue Byrne, Principal Assessor; Steve Malandrinos, IT Director; Adam Burney, Land Use Director; Sue Doherty, COA Director; Muir Haman, Library Director; Kathy Herrick, Town Clerk; and all their staff for their talent and working together to make our town run as efficiently as possible. Lastly, thank you to the residents and businesses that make Lunenburg a wonderful place to visit, work, and live.

Respectfully submitted,
Heather R. Lemieux, Town Manager

TOWN SERVICES

ARCHITECTURAL PRESERVATION DISTRICT COMMISSION

The year 2020 was a productive year for the Architectural Preservation District Commission (APDC) even with the pandemic and the loss of some meeting time in the second part of the year.

The APDC:

- facilitated Applications for Certificate to Alter in order to renovate, construct or alter historic homes in the Architectural Preservation District (APD) and communicated with the public answering questions about rules and regulations in the APD,
- initiated a plan for the APDC to take an annual walk through the APD to assess the physical condition of the APD with the intent of keeping track of the district over time,
- advocated for the preservation of the old Primary School and the Brooks House
- designed, purchased, and placed signs indicating the Architectural Preservation District
- created a plan for the restoration of the Town Pound.

The commission received the resignation of Jim LaVeck who had been a member since its beginning. His long hours of work over two years were instrumental in the formation of the APDC and its rules, regulations, and procedures. He was an absolute joy to work with and made difficult work easier for all the commission members in the formation of the APDC. His work along with the other members after the two years of formation, proved that the APDC worked in its intention to protect the character and value of the center of town for future generations. We are grateful for his service to Lunenburg.

The commission gained one new member, Tony Nicastro. Tony has a keen sense of history and will prove to be an asset to the commission and to the town. The commission presently has 4 members.

Richard McGrath, Chairman

BUILDING DEPARTMENT

The Building Department is located in the Ritter Memorial Building located at 960 Massachusetts Avenue.

The Building Department consists of the following personnel:

Building Commissioner/Zoning Officer-Casey Burlingame

Administrative Assistant to the Building Commissioner-Lisa Normandin

Electrical Inspector-Jack Biery

Plumbing and Gas Inspector-Gary Williams

During 2020 some unprecedented difficulties arose nationwide with the global pandemic occurring. Despite this unfortunate time, the services performed by the Building Department did not change or subside. The Building Department strives to ensure all work done in the Town of Lunenburg is performed to state mandated regulations and codes, as well as local zoning by-laws. In addition to Building, Plumbing, Gas, and Electrical permits, the

Building Department also oversees annual inspections for places of assembly, safety inspections for liquor serving establishments and forms of intent required to issue business certificates from the Town Clerk.

In fiscal year 2020 the following permits were issued:

- 492 Building Permits
- 322 Electrical Permits
- 158 Plumbing Permits
- 185 Gas Permits
- 1157 total issued

The state of Massachusetts is currently utilizing the 2015 International Building Code and 2015 International Residential Code, as amended by Massachusetts.

The Town continues to utilize ViewPoint online permitting software and all applications for work requiring a permit can be done online. In addition, paper applications are available at the Building Department office.

CEMETERY COMMISSION

The Cemetery Commission and Superintendent Todd Holman met throughout the year to discuss cemetery business. This year has seen several improvement projects undertaken. The trimming and shaping of the historic hedges that border the entrances to both cemeteries has begun, with South Cemetery having been completed. We hope to have the new building completed this coming year with the help of students and instructors from Monty Tech. Also in the planning stages is the enlargement, redesign and paving of the parking area at North Cemetery which will allow for year-round services at the columbarium and provide ADA accessibility as well. The Goodrich family burial yard at the corner of Fish and Lincoln Street is also scheduled to be restored and improved this coming year with help from the Historical Commission and Chairman Richard McGrath. The Commissioners would like to thank the following people and businesses whose help was invaluable this year:

- ◇ Robert Ullo for his assistance in plowing snow from the entrance to South Cemetery.
- ◇ Dave Passios for his volunteer efforts in keeping the well pumps in good working order.
- ◇ Leominster Monument Co. for their continued assistance whenever it is needed.
- ◇ Lunenburg Boy Scout Troop 1728 and Scout Michael Dumford whose Eagle Scout project was the straightening of over 100 headstones in the old section of South Cemetery.

The Cemetery Commission maintains an online mapping system for both North and South Cemeteries that can be found at www.burialsearch.com

Conservation Commission

The Conservation Commission is a seven member commission, appointed to 3 year terms by the Select Board, whose duties are codified under the Conservation Commission Act MGL c. 40 § 8C. The Commission enforces the Massachusetts Wetland Protection Act MGL c. 131 § 40 and Chapter 239 of the local by-laws for the protection of wetlands.

The year 2020 was as last year, one of a very busy and active agenda containing both public hearings and meetings for a wide range of projects from commercial development, subdivisions and small single family upkeep projects and larger scale industrial/commercial proposals despite the limitations set by the COVID-19 pandemic. The Conservation Commission's work continues into the year 2021 to work on clarifying the land use policy to provide consistency with the original by-law and to find those sections that may be now out of date and need to be modified. This effort is estimated to be completed by spring of 2021. The Conservation Commission has implemented revisions to the local wetland regulations, which have been in effect for over one year to date and have served the interests of protecting valuable community natural resources very fairly and effectively.

The Commission also held numerous inspections with the commission administrator on weekends prior to meetings to familiarize themselves with the upcoming proposals that would appear on their agenda. The Commission continues to work with the town on familiarizing itself with the upcoming storm water mandates from the EPA and working towards compliance both by procedure and with any necessary codification as well as aiding with the community implementations the "MS4" regulations.

The Conservation Commission continues to implement forest stewardship plans using grants as outlined in the last two annual reports. The stewardship plan for the Hollis Road property is oriented toward enhancing bird wildlife habitat in conjunction with the Mass Audubon Society as part of the DCR "Forestry for the Birds" program. The forest stewardship plans provide environmental management plans which include timber-stand management. The Commission retained Gary Gouldrup of New England Forestry Consultants who is a noted forester with years of experience working in Lunenburg and the adjacent towns/cities serving municipalities and private landowners. The Commission continues to hold public forums on the implementation of its open space policies and timber-stand management. The Commission expects to continue to apply for and receive funding from the Commonwealth to author stewardship plans for our Conservation Areas.

The Conservation Commission also has commenced planning for the forest management of the RAYNO property and worked with the Open Space Committee to complete the acquisition of the Saliba Property on Howard Street adding significant acreage of open space. Copies of the current environmental stewardship plans are available on the Conservation Commission website at:

<https://www.lunenburgma.gov/files-docs/18-05-21/forest-stewardship-plans>

The Commission was awarded a Recreational Trails Program grant to provide color coded trail markers and coordinated "You Are Here" trail map signs to expand the safe use of Lunenburg's existing trail network.

Regional trail system map signs would show how trails are interconnected among multiple properties. The project will also provide informational kiosks and emergency access gates. During 2020 trail maps were developed for eleven conservation properties. These trail maps will be posted on a Conservation Commission Trails website, on informational kiosks on the properties and on "You Are Here" trail map signs at trail heads and trail intersections.

The Commission has also continued to work closely with Lake Shirley and Hickory Hills on the implementations of their lake management plans. These plans set goals and action items designed to give a better picture of the overall health of the lakes and define various strategies to ensure continued protection of these valuable resources.

The Commission thanks all the town agencies for a great year and looks forward to many more!

Respectfully Submitted,

Bob Pease, Chair, Kenneth Jones, Vice-Chair, Jeffrey Viviano, Catie Childs, Carl Luck, Jack Rabbitt

Michael Larouche, Associate Member; Matthew S. Marro, Conservation Administrator

COUNCIL ON AGING
FY20
July 1, 2019 – June 30, 2020

The mission of the Council on Aging is to advocate for the improved quality of life for all seniors through supportive services, programs and education. Councils on Aging were established under Massachusetts General Law Chapter 40, section 8B, to include setting policy for the administration of elder programs or services and to develop, coordinate and conduct such activities which advocate for elder issues.

The FY20 Council on Aging staff consisted of Susan Doherty, Director; Amanda Koeck, Administrative Assistant and Transportation; Pauline Roy, Outreach Coordinator; Sandra Ricci, Meal Site Coordinator; Judy Alario and Elsa Watson, Meal Site Assistants; Jim McGuigan, Paul Grunditz, and David Gallagher, MART Van Drivers.

Sadly, Judy Alario passed away in November 2019 and Paul Grunditz resigned in May 2020.

The Council on Aging Board is an eleven member board appointed to 3 year terms by the Lunenburg Select Board. The FY20 Council on Aging Board members were; Chairperson Deb Lincoln, Vice-Chairperson Jane Rabbitt, Barbara Brown, Betty DiGiacomo, Sarah Grant, Pete Lincoln, Cheryl Moisan, Diane Nowd, John Pesenti, Susan O'Sullivan and Judith Tarbell.

The Town budget alone does not support this senior center. Other sources of funding are the Eagle House Supporters Inc., a non-profit 501c3 group, Formula Grant funding from the Commonwealth of Massachusetts, and Montachusett Regional Transit Authority.

On March 13, 2020 the Eagle House Senior Community Center closed to the public due to COVID-19 restrictions. Staff members worked delivering Meals on Wheels from the senior center and making wellness calls from home. Van service was suspended in March and resumed again in May 2020. Outdoor programs such as "Drive Through" lunches were added in June 2020 and specific "indoor" programming resumed with COVID-19 restrictions in place in mid-July 2020.

We are very lucky to have a large volunteer force at the Eagle House. In FY20 we had 70 volunteers who contributed 1,743.25 hours of their time to help us out by doing things such as driving for the Meals on Wheels program, program leaders, kitchen helpers, Memory Café, office help, library, and friendly visitors. We greatly appreciate their service.

The Eagle House offers a variety of programs such as, Meals on Wheels, transportation, health and wellness, arts and crafts, intergenerational, bocce, shuffle board, cards and games, cultural, information and referral, Memory Café, COVID-19 Grab & Go programs, health insurance counseling and social events both at the senior center and off-site to people age 50+. There were approximately 1031 people who utilized the senior center in FY20. Those 1031 people compiled 22,946 units of duplicated service by participating in the programs listed above.

COUNCIL ON AGING
FY20
July 1, 2019 – June 30, 2020

The Lunenburg Council on Aging newsletter lists current events and is available for you online at www.ourseniorcenter.com or you can pick up a copy at the Eagle House Senior Community Center, Town Hall, Library, Post Office, local churches and various businesses throughout the community.

We are very fortunate to have a Town Government that supports our center and understands the importance of supporting the Council on Aging to maintain quality services for our elders.

Special thanks go to our 501c3 fundraising group, Eagle House Supporters Inc. This group provides funding for new living room furniture, office/kitchen supplies, various programs & entertainment, and garden upkeep at the Eagle House Senior Community Center. Also special thanks to all of our outside agencies for their time and funding for support of programming for our clients.

In closing, I want to recognize the staff and volunteers at the Eagle House Senior Community Center for their unwavering commitment to our Lunenburg elders. The COVID-19 pandemic forced us to make immediate changes that significantly changed the lives of our elders during the pandemic. Our staff and volunteers are to be commended on their dedication, flexibility and strength that they have shown throughout this difficult year, and we thank you all.

Respectfully submitted,

Susan Doherty, Director
Lunenburg Council on Aging

DEPARTMENT OF PUBLIC WORKS

The Department of Public Works combines the resources of the Highway, Parks, Cemetery, Sewer, Facilities Departments, and Vehicle Maintenance services into one department organizing and scheduling personnel and equipment to best serve the residents of the community through the effective delivery of an extensive scope of services with a high degree of efficiency.

“The mission of the Department of Public Works is to protect, preserve, and improve the Town’s infrastructure and related assets in a manner which meets and exceeds the current and future social and economic needs of the community, to contribute to a healthy, safe and quality environment for the Town’s residents and visitors, and to provide a cost effective and environmentally sound means of disposing of solid waste and wastewater.”

DEPARTMENT PHILOSOPHY

Honesty and integrity are absolutes. They characterize the only forum in which anything worthwhile can be accomplished.

Efficiency: Make every effort to proceed correctly the first time. It may take a bit longer but will not require repeated attempts.

Loyalty up and down the chain of command is essential to success.

Every employee is essential. Those at the top are support people. The real work is done by the men and women who drive the trucks, operate the equipment, turn the wrenches, and provide a seamless flow of paperwork.

DEPARTMENTAL OBJECTIVES

Public Works Staff is either working or on call twenty-four hours a day three hundred and sixty-five days a year prepared to respond to any weather, infrastructure, roadway, or facility related emergency that may arise.

We strive to enhance the awareness of the value Public Works provides to our Town, and ensure others are aware of our contribution. This is not for an expectation of praise, but rather to make sure efforts are not dismissed as they merge into the fabric of our everyday expectation of service.

Major events, particularly in the form of devastating storms, over the past years have highlighted the fact that Public Works has a seat at the table and is a major player in emergency management as first responders. Town Officials, Police, and Fire acknowledge that Public Works is critical in order to facilitate the required services of others. We must continue to build on this awareness.

This Department must reach out to the public we serve, continuing to make them aware of the fact that the common services they receive do not just happen, but rather are the efforts of a dedicated staff of individuals, service companies, and vendors. Safe roadways, wastewater control, solid waste collection and recycling operations, tree removal, storm water management, grounds maintenance, winter snow and ice removal, cemeteries and parks are necessary services supporting everyone in the community. We will continue to engage the public in order to set reasonable expectations and gather support for annual budget requests, capital requests, and specific projects.

DEPARTMENTAL GOALS FOR FISCAL 2021

- Continue to coordinate administrative directives with the activities of all public service departments and organizations within the DPW to improve service levels. Strive always for a higher level of efficiency.
- Coordinate with those who work daily in Town facilities to best prioritize capital improvements. DPW plays a major role in the enhancement of the work environment of all Town employees.
- Increase involvement with our insurance provider to make better use of available resources in an effort to obtain credits toward lessening premiums. Safety is our first concern.
- Encourage and facilitate DPW personnel to obtain and maintain required licensure in order to provide an optimal level of service.

DEPARTMENT OF PUBLIC WORKS

- Hire qualified personnel to fill all vacant positions in a timely manner with the goal of reducing reliance on outside Contractors that currently provide some of the daily functions of the Department.
- Evaluate staffing needs within Facilities and Cemetery Departments and address if necessary with future budget planning.
- Work diligently to maintain a high level of courteous communication and interaction between members of all boards and commissions.
- Establish a comprehensive evaluation of bridges and culverts, and prioritize by condition, use, and plans for rehabilitation.

PAVEMENT MANAGEMENT

It had become a high priority goal of the Board of Selectmen as Road Commissioners, to achieve a pavement condition of 72%-75% Town-wide. While State supported Chapter 90 funds remain stagnant, the dedicated Pavement Management line in the operational budget has grown substantially. Additionally, with the infusion of funds facilitated by a four million dollar debt exclusion supported by residents, the Comprehensive Pavement Management Plan has been hugely successful providing smooth and safe transportation for our residents and all those travelling through our community.

The debt exclusion funding combined with state and operational funds has nearly tripled the total paving value of years past as we attack a nine-million-dollar backlog of repairs.

Time spent addressing pot holes and other roadway deficiencies diminish exponentially as new paving increases. A clear benefit of the dollars expended. There still remains work to do, but expectations are high.

Funding for the reconstruction of the Pleasant Street Bridge was obtained through the State's Small Bridge Program. Working with our engineering consultant VHB and Contractor R. Bates & Son, construction is expected to commence in spring of 2021. Work also continues on the Complete Streets Design to enhance walkability in the Town Center, with the expectation of the construction work being put out to bid in spring of 2021.

Acquiring supplemental funding allows the completion of projects that would otherwise not be viable due to the extraordinary expense.

FLEET MAINTENANCE

The DPW Maintenance Division is responsible for the repair and preventative maintenance to all Town vehicles and equipment and is carried out by a single, skilled and dedicated fleet Mechanic with support by Department personnel. High performance police units, first responder Fire and Rescue apparatus, park, cemetery, and school vehicles as well as over 30 pieces of highway related machinery are serviced by the Maintenance Division. Outsourcing of highly technical repairs has become more frequent and therefore more costly. Due to the volatile global market, the overall cost of fuel and petroleum based products continues to be a moving target and therefore difficult to estimate annually.

Use of a fleet maintenance software program continues to be a valuable tool. Each repair is logged by department and vehicle identification number and stored in a comprehensive database. Every vehicle can be referenced for part numbers, required services, as well and repair costs over the life of the equipment. Preventative maintenance continues to be a most valuable component of the program. Work will continue to update and evaluate a vehicle replacement schedule based upon American Public Works Association recommendations in order to more clearly represent the capital needs of the Department.

FACILITIES MANAGEMENT

The following is a list of buildings and properties maintained by the DPW:

DPW Facility	Public Safety Complex
Park Bldg. Leominster Rd.	Town Hall
Town Beach	Town Common
Ritter Building	Teen Center

DEPARTMENT OF PUBLIC WORKS

Old Primary School

Veterans Park

The Eagle House

Public Library

All athletic fields/playgrounds excluding the school campus

A facilities staff of one skilled, dedicated individual remains on-call 24 hours a day 365 days per year to respond to alarm calls and emergencies at all public buildings within the Department's care.

Collectively the Department attempts to keep all buildings compliant with current codes to insure a safe secure work environment. Any significant interruption of service within Town buildings carries the potential of disrupting or disabling necessary services provided to the community. The Facilities Director is a problem solver and technician with a wide range of experience encompassing all of the construction trades. Together with a stable of reliable Contractors, the Department delivers services directly or oversees those functions provided by specialized Contractors.

Moving forward the five year capital plan for facilities in 2021, as presented by the Department, will focus on the needs of the public building envelopes utilizing the reports prepared by Vertex as a guide. Protecting and maintaining the Town building exteriors is a priority even with the uncertain futures of some of the buildings. This Department is keenly interested in the proposed T.C. Passios building reuse plan and how it impacts the future use of Town Hall and the Ritter Building. A clearly defined plan for the future use of all buildings would facilitate planning of capital expenditures.

ENVIRONMENTAL

Storm Water

As a component of the aforementioned "debt exclusion" approximately five hundred thousand dollars of the four million in total has been earmarked for storm drainage including but not limited to repair of the existing collection system, and new construction. We have already exceeded this amount and continue to perform necessary repairs to the town-wide drainage system.

Before roads are paved, sub surface drainage is surveyed and necessary repairs are addressed to avoid paving over problems. In the future new Federal and State storm water regulations will likely force the Town to become more proactive albeit with no additional identified source of funding.

At the conclusion of winter and again in the late fall drainage structures in close proximity to open water are cleaned and inspected. Public Works maintains an aggressive schedule of street sweeping and catch basin cleaning, the front line of storm water management.

Wastewater

Working with the Sewer Commission, the DPW continues to be responsible for the day to day operation and maintenance of the wastewater collection system. Maintenance of the collection system, inclusive of 10 pump stations, is outsourced to a specialty vendor but continues to be the responsibility of the DPW. Business management, inspections, and permitting remain in-house and the responsibility of the DPW.

Tree Removal

Storm damage together with the natural attrition creates a backlog of tree felling and pruning that typically exceeds the Department's allotted budget for tree removal. The Department strives to fulfill each resident request but must prioritize work based upon the perceived degree of danger to residents and property. With the establishment of a Hazardous Tree Survey, a more efficient approach to defects has been established through prioritization. Currently, the amount of work far exceeds the funding available for it. As this is the case, the DPW will continue to act in a reactionary manner as needs arise. All work aside from brush removal, chipping, and the felling of small diameter trees will continue to be outsourced due to the necessity of a bucket truck or crane and a licensed professional. Each spring DPW staff works to remove and dispose of woody debris within the Town right-of-way along with a Town-wide program of selective curbside mowing and vegetation clearing. An aggressive program by Unitil in recent years has lessened the burden of the Town by removing those trees that may cause an interruption of electrical service to the community.

DEPARTMENT OF PUBLIC WORKS

Landfill

The capped, closed landfill off Young's Road remains in compliance with the inspection protocol mandated by the Division of Environmental Protection. The site is monitored regularly for excessive methane gas as well as groundwater contamination.

The frequency of the testing reduced through a special permit, as a result of consistently favorable results, remained constant throughout the year. The landfill site including the perimeter fencing is inspected on a regular schedule by DPW personnel.

Adjacent to the close landfill is a storage area for catch basin materials and street sweepings both determined by the EPA to be hazardous waste. We are allowed to store these materials through the procurement of a (BUD) Beneficial Use Determination permit. The DEP requires yearly testing of these materials. Other communities must transport these tainted materials to an appropriate site at a substantial cost to the community.

On weekends during the fall and spring, DPW personnel oversee and manage the annual composting of brush, leaves, and other organic debris providing a valuable service to our residents and our overall recycling program. There has to date been no dedicated funding toward the organization or long-range remediation of this collection area. With public water and sewer at close proximity, this acreage has been identified as a potential recreational area for the Town.

Solid Waste

In the past, Public Works would have the responsibility to monitor, order, store, and distribute trash bags in order to facilitate the curbside collection of trash and recyclables by our current vendor, Casella Inc. under the Pay as You Throw (PAYT) program. Our supplier continues to coordinate the effort between supplier and vendor. DPW remains the point of contact between residents and the vendor responsible for curbside pick-up. The current contract with Casella will come to an end at the end of fiscal year 2021 and this service will have to go out to bid.

Lake Shirley Dam

In the early 1990's with the structure in need of repair/rebuilding, The Lake Shirley Association turned over ownership of the dam to the Town. After completion of a total reconstruction, responsibilities for maintenance, monitoring, and record keeping was completed by a small number of volunteers from the Lake Association. In 2004-2005 custodianship of the dam, compliance with State dam regulations, the establishment of an operations manual as well as an emergency action plan was placed under the umbrella of the Department of Public Works. As with the storm water program and other EPA / DEP mandates, compliance with current and future regulations is critical. We rely on the expertise and support of a professional consultant to assist with predetermined mandates. The most recent inspection resulted in a positive report and we remain in total compliance.

Winter Operations

Snow and ice present a major challenge. The safety of the public depends on the ability of the DPW to maintain our roadways at a high level of safety despite the severity or the duration of snow and icing events. To that end, we have developed a winter operations procedure based upon a detailed plan with flexibility to accommodate the unpredictability of each storm. The expectation of immediate service is high and must be delivered to every part of Town in a timely manner.

Departmental preparedness begins with successful implementation of the capital plan. Financial support is necessary to provide effective fleet rotation insuring minimal interruption of service due to breakdowns and repairs. In the fall, salt is delivered to the DPW facility. Lunenburg is in a consortium with 14 other communities in an effort to procure the lowest possible price. From late summer to early fall vehicle maintenance staff inspects and prepares the trucks, spreaders, and plows for winter operations. During the construction season road crews address right-of-way issues, overhanging branches, and pavement defects in order to eliminate obstacles to snow removal. Each division within the DPW is involved in winter operations.

DEPARTMENT OF PUBLIC WORKS

Generally, it is not the amount of snow but the duration of the event, that determines the overall cost. For example, a fast moving snow storm of 6-8 inches will cost significantly less than a long duration freezing rain event even though the accumulation is much less. Historically, and as allowed by State law, the Departments snow removal accounts operate in a deficit due to a yearly allocation that is below the cost of snow removal operations for an average winter.

The Town and its residents are fortunate to have a dedicated group of DPW personnel and private Contractors who tirelessly and successfully challenge the worst Nature has to offer regardless of severity or duration.

“DPW workers are the original Storm Troopers”

PARKS

In conjunction with the five elected Park Commissioners, DPW staff oversees and maintains all parks and grounds exclusive of school property. While resources of the DPW are available as required, much of the Town-wide landscape maintenance is outsourced, inclusive of the playing fields, resulting in significant savings and increased efficiency over an in-house operation. Marshall Park accommodates the High School baseball and softball schedules, Little League, and the Lunenburg Phillies. McNally and Fitzgerald Field provide for an active youth program as well. Commissioners have initiated a fee schedule at the fields and the Town Beach. The Town Beach is staffed with employees of the Parks and Recreation Department during the beach season. Wallis Park was the host of the Spring and Summer Basketball clinics through the Recreation Department. The Parks and Recreation Department started year round programs for youth and teens. Over the next year the Parks and Recreation Department plans to continue adding on programs for all ages, summer programs and camps, family and community events as well.

CEMETERY

One dedicated Cemetery Division Superintendent, a DPW employee, handles the duties of the North and South Cemeteries, maintaining the grounds, coordinating burials, and meeting regularly with the three members of the Cemetery Commission. The DPW supplies equipment and support staff for, on average, forty burials a year and general maintenance of the facilities as required by Town Charter.

At the time this Town Report is being drafted, it marks the first time in many years that the Lunenburg DPW is not being guided by Jack Rodriquez. As the new DPW Director taking his place, and on behalf of the entire Department, I would like to take the opportunity to thank Jack for his many years of dedicated service to Lunenburg and wish him all the best in retirement.

As the new Director I look forward to a long and productive tenure serving the Town and its residents. I hope to form many strong relationships with the Town's administrative body and residents as well as the many Boards, Commissions, and Committees that help it all function. It is my goal to provide the highest levels of service, that Lunenburg's residents expect and deserve, among all the divisions that make up the Department of Public Works. I'm thankful and excited to have been given this opportunity and will serve the Town to the best of my abilities.

As caretakers of the Town's infrastructure, our goal is to preserve and enhance the resources of the Town of Lunenburg for future generations. To that end we strive to meet or exceed all expectations associated with the challenges of each of the divisions under the umbrella of public works.

Respectfully,

Robert E. Oliva
DPW Director

FINANCE COMMITTEE REPORT

Fiscal Year 2021

The Annual Town meeting is an important event for community members to come together and vote on warrants that directly impact how we manage our Town. Under this umbrella is the town budget. Throughout the year the Town Manager and Department Heads carefully review expenses and have thoughtful conversations about how to best serve the town. While developing the budget they considered funding, contracts, and mandates, as well as what the community wants and needs to thrive. A target budget was finalized and presentations were in the process of being made by the Town Manager and Department Heads through several Finance Committee forums. The process came to a halt when we were struck by the Coronavirus Pandemic. Suddenly, people were staying at home and being out of work. This was followed by an immediate reduction in normal tax revenue (which continues to dwindle). This means our projections for State Aid, local receipts, and other revenue have been decreased (down \$300,290 from the pre-COVID19 budget). To account for this shortfall, and anticipate future revenue shortfalls, the budgets of several departments and plans were reduced to leave a \$1,055,950 surplus. Even with this, the budget maintains level service funding for all departments. Some significant reductions from the target budget are:

Lunenburg Public Schools	\$192,157
Capital Plan	\$664,333
DPW	\$102,000
Additional Firefighter	\$95,359
Additional Police Officer	\$84,664

It is important to note the whole budget will get a fresh review for the fall Special Town Meeting. By that time, clearer revenue projections should be available. It could mean that more revenue will come in, or it could mean that we need to use the surplus to stay afloat. While we need to implement a budget now, but there will be opportunities to make changes to the budget in the future. The total requested budget appropriation is \$38,658,115. Armed with all that information, the Finance Committee recommends the budget as put forth by the Town Manager. It is clearly acknowledging that the budget does the best it can with the resources available. The budget, as a whole, is conservative, relying on only available tax levy and state aid for operating and capital expenses. It also makes deposits into our stabilization account to allow for future use towards unanticipated expenses or to be available for other funding needs that could arise due to COVID19. The OPEB allocation, the deposit we make into a fund to pay for future retiree benefits, is also being re-allocated to the stabilization fund. Each department also played a crucial role in making the budget work. As was seen during the budget presentations, all departments follow a sincere mission to serve our community. They have goals and initiatives to constantly improve their services to the town. It is with a heavy heart that some of the work toward these goals will have to be put on hold. We are grateful for the grace with which departments responded to the impacts of the Coronavirus Pandemic.

While the budget ultimately boils down to dollars and cents, there are factors not easily captured by money but are worth mentioning as a way to look holistically at the financial picture of our Town, not just as a response to COVID19.

- The largest part of the Town budget is the school budget. It is 57% of the Town's expenses, at \$22,029,972 (including Monty Tech assessment). Additionally, the Town budget includes \$1,076,000 in other school-related costs such as School Retiree Health Insurance. This is all significant dollars but still falls short of what is proposed by the school department for best serving our students. Projected School State Aid (Chapter 70) funding changes resulting from the Student Opportunity Act have a projected negative impact on Lunenburg. In fact, state aid increased at a smaller rate (down 1.1% or \$78,483 less

FINANCE COMMITTEE REPORT

than last year) while the amount Lunenburg has to pay both our school system and Monty Tech increased at a higher rate (5.85% or \$356,763 and 0.92% or \$88,131, respectively). The state's recalculation of Chapter 70 aid was primarily aimed at high poverty districts and we did not qualify. Without increased Chapter 70 funding the school budget is constrained by the tax levy.

- The capital plan was cut in half to contribute to the surplus necessary to prepare for what may lie ahead in revenue shortfalls. What is being proposed is being funded entirely by free cash with no additional funds from tax levy. We all agree on the importance of maintaining Town assets and keeping ahead of obsolescence and disrepair. The recommendations are based on the Capital Planning Committee's prioritization of the requests approved. The current budget funds 12 of those recommendations. More may be funded if there is revenue to do so in the fall. Please note the Finance Committee deferred on making a recommendation on the Capital Plan until the annual Town Meeting to allow for final revenue adjustments.
- New Growth revenue for Lunenburg is trending down. The five-year financial forecast posted a new growth estimate for 2021 at \$173,400. The proposed budget is conservative and can absorb the potential revenue loss. However, without significant housing projects (like Tri-Town and Emerald Place) new growth figures are not expected to reach prior levels within the next three years.
- Some of our departments fund regular, ongoing expenses with donations and grants. Those funding sources are not guaranteed but the services they fund are vital. To ensure those services are dependably funded, the Town has taken on some facilities expenses for the Library and some kitchen staff personnel expenses for the Council on Aging as part of the regular Town budget.
- Lunenburg's debt ratio has been evaluated as "poor" by an independent agency. There will be a significant drop in debt service as we pay off the Public Safety Building and Primary School loans in 2024. However, it is likely we will take on more debt to cover future needs, such as what may be necessary for Turkey Hill Elementary School. There are no easy answers for debt management. The Finance Committee will be putting together a Debt Project group with the goal of better understanding the issue and its ramifications to the Town.

The F21 budget is not easy for anyone to accept. It is understood that it does not meet the financial policies of the Town (re-allocated OPEB) nor does it meet the needs of the Town on an ongoing basis. Right now it is the best that can be done under the circumstances we are in. For that reason, the Finance Committee is supporting the budget. Because the budget is conservative the Town will be in a better position to navigate uncertain waters that may lie ahead in FY21 and FY22 as COVID-19 unfolds further. We know Lunenburg will rise to the challenges of the years to come. This year's budget keeps us moving in the right direction.

The Finance Committee thanks the Town Manager and all Department Heads for their exemplary service to the citizens of Lunenburg. They demonstrate genuine caring for our community and the role they have in shaping the quality of our lives every day.

HISTORICAL COMMISSION

The year 2020 was a productive year for the Lunenburg Historical Commission. The Commission accomplished a lot in spite of the COVID-19 pandemic.

The Commission:

- facilitated demolition delay applications and answered questions from the public concerning historic properties,
- joined in partnership with the Lunenburg Historical Society to research and plan for a memorial for the desecrated and lost Arnold/Litch Cemetery. Gravestones were restored. A bronze plaque with the names of the deceased was purchased as well as granite bases and bonnets for the two (2) existing marble stones,
- joined with the Cemetery Commission to plan for the restoration of the historic Goodrich family cemetery,
- joined with the Historical Society to plan for the restoration and resetting of removed stone directional markers,
- advocated for the Community Preservation Act,
- joined with the Architectural Preservation District Commission to advocate for the preservation of the old Primary School and Brooks House,
- wrote and published articles in the Lunenburg Ledger pertaining to local history,
- initiated discussion and began action on completing the town survey of historic homes,
- designed and purchased signs to designate the Lunenburg National Historic District, which were erected by the DPW,
- the town's standing stone directional markers received their annual inspection,
- the commission advocated successfully for the preservation of the 1755 Saltbox Colonial at 62 Elm St and its wonderful post and beam barn through the demolition delay process.

Since the turn of the century Lunenburg has lost historic houses at an average rate of one (1) per year. Without strong advocacy and public support, at the present rate of destruction, few historical homes and buildings will be left in Lunenburg in 100 years.

Cullen Dwyer resigned from the commission. We thank him for his commitment and salient points of view that were so important to our deliberations and consensus. His work as recording secretary was essential, well done and appreciated by the members.

Chair Rebecca Lantry also resigned. She had more than 15 years of service to Lunenburg as a member of the commission and then serving as Chair. Her advocacy and enthusiasm for the value of Lunenburg's past, its living history of houses, buildings, structures, landscapes and documents has been inspirational. I am grateful to have served with her all these years and have learned from her.

The Commission has gained one new member, Kevin Boussom, a communications major at FSU. We welcome his youth and talent.

Presently, the Commission has four (4) members.

Submitted by

Richard McGrath, Chairman

INFORMATION TECHNOLOGY DIRECTOR

The primary mission of the Information Technology Department is to increase efficiency with technology. The IT Department enables all other town departments and schools to communicate and collaborate, manage daily tasks, organize, store and share information, and generally conduct Town business more effectively. We also provide the necessary infrastructure, equipment, software and expertise to comply with current regulations and methodology when interacting with outside agencies and organizations.

As we reflect on this last year, to say 2020 has been challenging would be an understatement. With the arrival of the coronavirus in the spring, all our IT priorities shifted to an intense focus on responding to this emergency and how best to support the town moving to remote work almost overnight while still maintaining our core services. This report provides information on the Technology Team, as well as some highlights of the work we have done in response to COVID-19.

The Technology Team

Steve Malandrinos – Information Technology Director

- Over eight years with the Town of Lunenburg

Previously an engineer at Cisco Systems, IT Director for the Town of Belchertown, MA and Belchertown Public Schools

Daniel Nadareski – Network Administrator

- Retired police officer from the Albany, NY police force with over 24 years on the job

Prior experience includes computer crime and forensics, network administration, video security system administration, and IP phone system administration

Neil Trahan – Remote Meeting Coordinator

- Also serves as Director of Technology for Grafton Public Schools

Works part time managing several Zoom remote meeting accounts, including scheduling, starting and in some cases moderating public meetings to ensure things run smoothly

Along with serving as helpdesk for all users' daily technology issues and performing regular maintenance and scheduled replacement of the town's and schools' technology assets, the IT Department shifted focus to enable and support town departments, committees, boards and commissions to work and meet remotely. Online meetings have become a big part of all our lives, both for internal discussions as well as public meetings. We have worked closely with Public Access to facilitate live streaming, and have hired a part time Remote Meeting Coordinator to keep our many remote public meetings organized.

To enable town employees to work remotely, we have also purchased laptops, upgraded internet connectivity, and fortified our VPN solution, in many cases using grant funding available to local governments. Phone systems were adjusted to forward calls to employees' homes or cellular phones during times when they would not be in the office, and many pages on our website were updated to reflect new hours or new ways of contacting various departments around town.

The past year has had an immense impact on all our lives, the Technology Team included. Our ability to adapt to rapidly changing requirements was put to the test, and I am proud to say in most cases we rose to the task. We share the hope that 2021 will eventually bring some normalcy back to our lives, but regardless we will provide the tools necessary for our staff, boards and commissions to continue their important work serving the residents of Lunenburg.

Lunenburg Public Library

Albert Einstein is credited with the statement: “The only thing you absolutely have to know is the location of the library.” And after 2020, our Lunenburg Public Library is in more virtual locations than ever, making it easier to access resources in our community. Our fiscal year 2020 could hardly have held more stark contrasts. Our circulation went from being some of the highest rates in years to our doors being closed during the spring and the pandemic. The unexpected challenges which arose were met by our library staff’s creativity, adaptability, and problem-solving. And in response to those challenges, we have vastly expanded our virtual presence for the library. So, even if you don’t know the physical location of the library in Lunenburg, you should be able to easily find us with an internet connection.

In a year that concluded with the rise of the COVID-19 pandemic in the world, our library responded quickly and consistently to continue our services during unprecedented change and challenge. Just like the people we serve, our staff demonstrated strength and resilience as we put our community’s safety first while continuing to meet the needs of that community.

Between July 2019 and February 2020, the circulation of our physical material was 14% higher than the same period a year previously, on track to be the highest in years. During the same period the number of visitors rose only slightly. That means people were borrowing more books per visit than the year before and that the library improved our selections to provide even more books and materials that are relevant and important to our community.

In March 2020, we closed our doors to the public in response to the pandemic, and our staff began to adapt our services to be delivered virtually. Though we did not circulate physical material while we were closed, our electronic resources saw a huge jump in use. At the conclusion of June 2020, our e-book and e-audiobook usage was 150% higher than the previous year as a result of the change in behavior during the last three months of the fiscal year.

During the time we were closed, we funneled more money in our electronic resources. We purchased additional licenses for e-books and e-audiobooks and made them available through the Overdrive Libby app. We also relied on the Friends of the Lunenburg Public Library to purchase several additional electronic resources, including Beanstack and CreativeBug. Beanstack allows us to organize and administer virtual reading challenges, while CreativeBug is a collection art and craft videos and courses. Both have been very useful and beneficial to the library community.

One of the highlights of the year has to be the result of a collaboration that started before the pandemic and concluded while we were closed to the public. Hannaford Corporation and their community support program donated \$3,500 to a renovation project that has resulted in a much improved children’s area. We added a new shelving unit, combined with new seating arrangements and display space that has created a “tween” area that should provide a safe and welcoming space for those in-between “tween-agers” who are too young for the teen room, but may not have felt fully comfortable in a “children’s” room.

All in all, the challenges and obstacles of the pandemic represent an opportunity for the library to better position itself for our community. We hope that our increased virtual presence will continue to be beneficial to our users. Our staff has continued to work incredibly hard to adapt and to serve. We are here for you and we thank all of our community partners and look forward to continuing to improve!

Adult Services

During summer reading, we hosted a virtual Summer Reading Challenge on Beanstack that saw 26 adult readers log nearly 25,000 minutes of reading. Because of that success, we will continue to use Beanstack as we move forward. It has been a wonderful new service to add to our repertoire.

One of our focuses before and during the pandemic has been on reference service, a traditional resource in most libraries that has been underutilized in Lunenburg in recent times. Having a dedicated Adult Services Librarian has been beneficial in this process, allowing us to help users answers questions when they reach out to us. In addition, we have been adding to our capacity help readers find new books to read. We curate reading recommendations and personalized library book bundles to patrons who return a short survey that can be found on our website. This service has been successful while library browsing has been less accessible and we hope that it will continue to expand in usefulness.

Overall, the slate of programs and services from the Adult Services department may look quite different from past years, but we continue to work toward the goal of connecting people to their community and information needs, an objective that will remain constant.

FY21 Goals for Adult Services:

- To provide more adult programming on Zoom and other virtual platforms; in addition to resuming in-person events when it is safe to do so
- To continue supporting adult literacy through focused reading challenges using the program software Beanstack
- To grow the Adult Summer Reading program by partnering with more local community institutions and businesses
- To develop more innovative ways to connect our patrons with information resources (e.g., personalized kits, recommendation surveys, discussion or book clubs, etc.)

Children's Services

Our Children's Services Department has also been quite successful in making adjustments in response to the pandemic. Within days of town facilities being closed, the library moved to virtual mode in providing programming and outreach to our young patrons. Engagement with these programs was strong--kids were excited for weekly story times and chapter book reading! Our early success has led us to continue to offer weekly story times and craft kits, virtual STEM programming, monthly LPL Kids Book Club and a variety of virtual cooking and craft programming. We have offered take-home kits which included books, activities, crafts and recipes, and we gave out hundreds of kits!

Our summer reading program for youth was also virtual. We saw 58 young participants who logged more than 36,000 minutes reading throughout the summer and earned 600 Beanstack badges! This early success has led us to continue to offer challenges on Beanstack for young readers.

We will continue to adapt and expand our programs and collaborations!

FY21 Goals for Children's Services:

- To provide more programming on Zoom and other virtual platforms; in addition to tried-and-true traditionally formatted programs
- To provide early literacy support to parents, caregivers, and teachers

- To create opportunities for outreach to school aged children, specifically grades 3-5 with book groups, Zoom presentations and meetings, and STEM (Science, Technology, Engineering, Math) programs
- To support and encourage healthy reading habits by actively supplying families with books, continuing to post Beanstack challenges and maintaining a vibrant collection of reading choices for all ages.

Teen Services

Fiscal year 2020 also became the final year for our long-time Teen Services Librarian, Nicole Piermarini, who moved on to another library in March of 2020. Nicole was instrumental in the library's success at drawing a large population of teen users to the building and she has left behind a strong foundation for us to build on.

Her collaborations and programs will enable our new Teens Services Librarian, Susan Elbag, who was hired after the conclusion of the fiscal year, to improve and strengthen our offerings for our teen demographic. Susan is completing her Master's Degree in Library Science at Simmons University and is excited to be a part of the team!

FY21 Goals for Teen Services:

- To build on our collaborative partnerships within the community, especially organizations that support our teens like the Middle/High School and the Lunenburg Boys and Girls Club
- To perform a full diversity check on the Teen Room collection to help us support the diversity and inclusion of a variety of voices in our teen collection and to strengthen future collection development plans
- To increase the Teen Room's social media presence in order to better engage with our tween and teen patrons with book talks and teen story-time programs to help promote and circulate new items added to the collection
- To provide a mix of virtual events and take-home craft programs each month and to continue to explore ways to remotely engage with our tween and teen patrons

Looking forward to FY2022

The pandemic has profoundly affected all of us, and the library staff is conscious that this challenge is also an opportunity. We will be completing our first strategic five-year plan in more than a decade despite the probability of doing so without meeting our users in person. This plan will help us document what we are currently doing to serve our community and guide our direction in the future. It will be a document that can be incorporated to the town-wide long-range planning that is in the works as well, better positioning the library to continue as a vital resource for Lunenburg. The staff and other library resources are here for you, and we hope to see you soon at the library!

LUNENBURG PUBLIC ACCESS (PAC)

MISSION: DEVELOP, MODERNIZE, ESTABLISH AND OPERATE THE TOWN OF LUNENBURG'S PUBLIC, GOVERNMENT AND EDUCATIONAL (PEG) ACCESS CHANNELS TO REFLECT WHAT MATTERS TO LUNENBURG

Public Access Cable Committee (PACC)

Steve Walker, Chair

Faith Beall, Vice Chair

Jeff Bajko, Secretary

Steve Archambault, Member

Pete Lincoln, Member

The Lunenburg Public Access Cable Committee (PACC) is responsible for the long-term plan to manage the Public Access Channels available to the Lunenburg community through Comcast, the town's only cable-service provider.

The overall strategy includes providing and improving equipment to acquire, record, broadcast and re-broadcast programming from both town, school functions and meetings, as well as programming from publicly available sources.

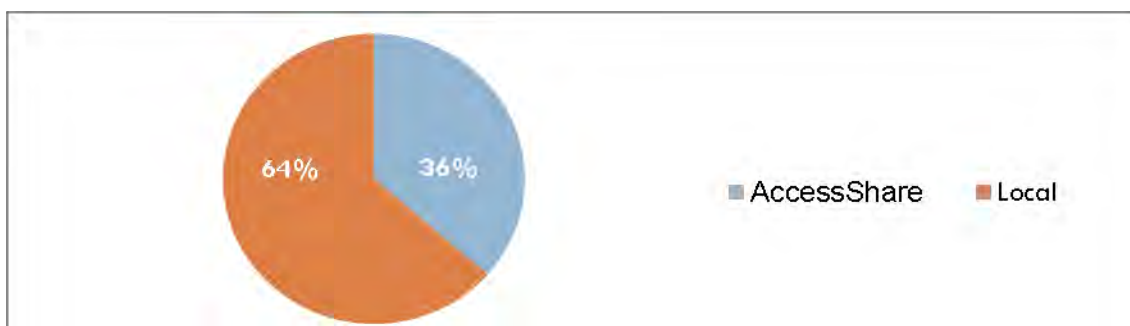

Programming

CH9 - Public

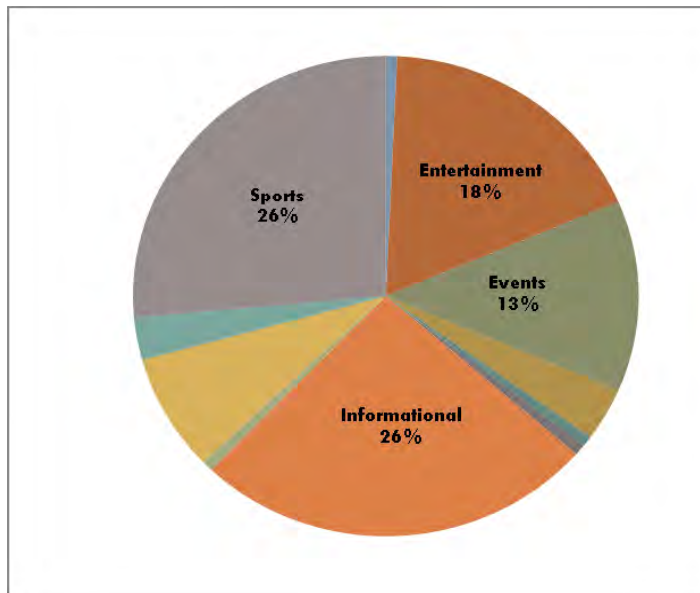

Public Access Cable (PAC) produced 64% of the local programming on Ch9 in FY20, up 1% from 63% in FY19. The total number of Public (Ch9) programs, both local and AccessShare (shared resources), increased from 128 in FY19 to 140 in FY20.

Local programs included high school sports, band concerts and school events up until March of 2020. The remaining 36% of programming was obtained through other media sources. PAC relied heavily on outside programming during the last quarter of FY20 due to COVID19.

Channel 9 – Public Channel

Several categories of local programming were provided on Ch9, among the top were Informational (26%), Sports (26%), Entertainment (18%) and Events (13%), making up 83% of all Ch9 programming (Chart Below). As the top programming category, Informational provided subscribers with unique presentations and overviews that helped to familiarize them with local resources and information.

All locally produced programming is also accessible on the Public Access YouTube Channel and Facebook

<http://www.youtube.com/LunenburgAccess>

<https://www.facebook.com/Lunenburg-Public-Access-Cable>

MASS ACCESS As a member of the MassAccess organization, PAC is given access to the Telvue Connect (massaccess.telvue.com) database for sharing productions of both state and nationwide programming. Many shows downloaded and aired on Channel 9 are sourced from this outlet, including Democracy NOW, Governor Baker’s COVID 19 Updates and Legal Ease. In FY20, PAC began sharing their own locally produced programs with the MassAccess content database. The results were outstanding! Here in Massachusetts, Lunenburg’s “Talkin’ Baseball” episodes were and continue to be downloaded by over 20 media centers including Avon, Bourne, Boxford, Braintree, Danvers, Dracut, East Bridgewater, Fall River, Hadley, Lakeville, Lower Cape, Middleboro, Provincetown, Ware, Wakefield, Westwood and Weymouth. In addition to the Massachusetts centers, these episodes were also downloaded for airing by out of state media centers including Newport, RI and Saint Albans, VT and Oradell and Westfield, NJ. Because of the popularity of “Talkin’ Baseball” many more locally produced shows have been added to the database.

CH8 - Government

Most content on the Government Channel (Ch8) is locally produced. In addition to several live weekly municipal meetings and re-broadcasts, other examples of government content are programs downloaded from MassAccess (massaccess.telvue.com), including Massachusetts State Agency PSAs and programs of a political nature.

From March to June of FY20, committee and board meetings were prohibited from meeting at Town Hall. Therefore, all meetings were conducted via Zoom. PAC purchased a streaming service software (CASTUS Stream) to ensure live meeting broadcasts were sent to the server from the Zoom feed for airing.

Videographers were provided with detailed instructions and training.

Each committee and board, whether broadcast live or not, records their Zoom meeting to the cloud.

This resulted in PAC offering more meetings for re-broadcast on Ch8 and YouTube, including Parks Commission, Capital Planning, Board of Assessors, Council on Aging and TCP Building Design to name a few.

All recorded Government meetings are accessible on the Public Access YouTube channel.

<http://www.youtube.com/LunenburgAccess>

A live feed from Ch8 on PAC's YouTube Channel is accessible by going to

<http://www.youtube.com/c/LunenburgAccess/live>

CH99 – Educational

In May of FY20, PAC added an Educational Channel, Comcast Channel 99. The additional channel has allowed PAC to feature local educational content to viewers including bi-monthly School Committee meetings. With the decline of town and school activity at the end of FY20, the channel's content has been mainly populated by downloaded programming, such as Open Mind Storytime, Fur Fins and Feathers, Chess Chat, and Science Now.

More original educational programming will be added in FY21.

Enterprise Fund

In FY20 PAC changed its financial structure from a Revenue based account to an Enterprise account. This resulted in a new method in the process and approval of the budget. Firstly, it allows for the monthly infusion of interest on the money held in the PAC account, added to the current quarterly Comcast revenue. And secondly, the budget can be set with the availability of cash expected to be deposited. That is, monies can be earmarked for expenses before they are received.

Studio and Equipment Upgrades

PAC has had studio space in the TC Passios school since 2013. We encourage the public to take advantage of the facilities and equipment offered.

The strategy for the PAC studio in the upcoming fiscal years includes acquiring new studio space as soon as municipal space becomes available. A new committee, TC Passios Building Design Committee, was formed in FY19 to explore the reuse of the TC Passios school for Town Offices and a PAC studio.

PAC has been working with the committee's architect to help design a future studio. This studio would provide a more permanent and comfortable environment for producing programming. A completion date has not been set on the project, and must gain town approval at the Annual Town Meeting in FY21 to proceed to the next steps.

Upgrades in FY20 included the replacement of the studio TriCaster switcher, from a TC455 to a TriCaster mini. New equipment was installed at Town Hall to incorporate access for remote Zoom attendees at committee/board meetings when in-person meetings resume in the future.

The addition of wireless intercom headsets were purchased for multi-camera productions helping communication between videographers. These devices were used for LMHS Graduation, Football games, and Town Meeting.

Television Monitors and mounts were added to the studio to ensure a consistent feed from Comcast at all times.

Equipment replacements and upgrades accounted for over 30% of the FY20 expenses (New Equipment and Equipment/Maintenance and Supplies).

Staff, Producers and Volunteers

In FY20, there was one full-time Manager and 5 part-time contract videographers, classified as Vendors (Budget Line Item: “*Purchase of Services*”). However, in the 4th quarter, videographers were reclassified to non-benefitted part-time town employees. This change in classification resulted in the addition of a new budget line-item, Payroll Videographers, and streamlined the scheduling, payroll and production process. The PAC Manager continues to administer the day-to-day operation of the organization, including all production and programming schedules, staff scheduling, equipment and services procurement, studio and inventory administration, advertising, social media and 24/7 troubleshooting of on-air programming.

Videographers provided video recordings of committee meetings and additional video assignments as needed. A technical contract consultant works with the PAC manager to provided technical and training assistance as needed. It is expected that he will remain working for PAC through FY21. However, PAC will be searching, and has budgeted for a permanent part-time Production Technician to add to the staff in FY22.

Of the 64% of locally produced shows on Ch9, most were produced by the public access staff. Our top resident producer, Pete Lincoln of “Talkin’ Baseball”, continued to create new programs for airing on Ch9 through FY20. Because of its popularity, “Talkin’ Baseball” has been shared with local access stations and downloaded through MassAccess database countless times. And St. Boniface continued to produce a weekly mass program, on-air now for over four years. Kudo’s to our tops Producers!

PAC is always looking for producers. If a resident has a special skill or interest, PAC will help make the show happen. Our studio and staff are equipped to assist new producers in video production.

Much effort has gone into recruiting volunteers, with little response. Social media and newspapers have been used to promote volunteerism with little effect. PAC will continue to look for other ways to reach out to the community for volunteers.

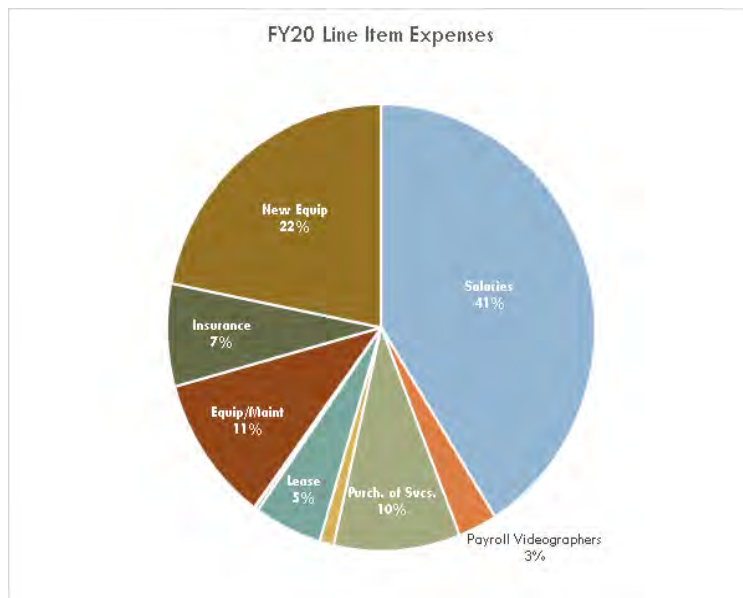

Staff Expenses (Salaries, Health Insurance, Purchase of Services, Payroll Videographer and Consultant) accounted for over 60% of the FY20 expenses.

Financials

PAC received all of its income from Comcast in quarterly payments (received August, November, February and May) and monthly interest payments deposited into the Enterprise Fund. The overall payments received for FY20 were \$252,062.11. The Budget was set at \$272,000 for projected expenses and capital costs. The

FY20 Line Item Expenses by Percentage

Line Item	Expenses	% of Expenses
Salaries	\$48,031.18	41.08%
Payroll Videographers	\$3,438.91	2.94%
Purchase of Services	\$11,180.00	9.56%
Consultant	\$1,260.00	1.08%
Lease	\$6,000.00	5.13%
Office Supplies	\$302.89	0.26%
Advertising	\$82.00	0.07%
Equip/Maint./Supplies	\$12,424.39	10.63%
Insurance	\$8,680.00	7.42%
New Equip	\$25,533.85	21.84%
Total	\$116,933.22	100.00%

FY20 REVENUE vs EXPENSES

Starting Balance	\$447,813.36
Revenue	\$252,062.11
Subtotal	\$699,875.47
Expenses	\$116,933.54
Subtotal	\$449,041.36
Total	\$582,941.93

Summary

FY20 ended as a difficult year for PAC, and the community at large, due to COVID19. What started out as a successful year, soon suffered because of the lack of local activities and events. PAC was on target at the beginning of FY20 to surpass the FY19 local programming (Ch9) growth. While the number of programs increased, the percentage of local programs declined by 1%. However, it became necessary to change gears at the end of the year, to ensure continuity of Government meetings (Ch8) amidst the “new normal.”

The end of FY20 brought new beginnings, as an Educational Channel (99) was added. This addition has made PAC a true Public, Education and Government (PEG) media center. The channel focuses on learning and its content is targeted toward local education. Because the school year ended with remote learning, there wasn't a lot of educational material to add to the programming. However, in the meantime, the schedule has been populated with outstanding programming downloaded from the MassAccess Telvue database. As school activities hopefully increase in FY21, you will see more Lunenburg educational activity.

Changing from a revenue account system to an Enterprise Fund in FY20 was a major change for the better. This adjustment allowed for PAC to plan for expenses with revenue that was expected to come in, rather than only use funds immediately available. Not only did it change the budget process as a whole, but made planning for unexpected expenses much easier. Funds received from Comcast and account interest payments are PAC's only source of revenue.

Improvements make way for future success. Upgrade of equipment and purchase of new equipment has brought PAC to another level. The new equipment added to the Town Hall control room for Zoom meetings has changed the video landscape. Now committee member will have the choice of attending meetings in-person at Town Hall or remotely. Studio improvements are slow but steady, as we have upgraded the production switcher and plan additional improvements in FY21. We don't know what the future of video delivery will be, but PAC is prepared whatever the scenario.

Moving forward PAC hopes to continue to bring residents a consistent line-up of programming on each of our three PEG channels. The growth of content on Channel 8 (Gov't) due to Zoom recordings has been a consequence of the pandemic. Municipal meetings not broadcast live are uploaded to YouTube and Channel 8 from Zoom files, offering more informational content to viewers. The Public Channel (9) has continued to grow as shared resources, and limited local productions, keep a steady flow of updated material. And, the new Educational Channel (99), in its infancy, is delivering programs of interest for all.

Lunenburg Public Access (PAC) is your source of all things local. Won't you join us as a producer or volunteer?

PAC's supportive staff offers production assistance, making it easy to produce your own show. Our community is thriving with talented and creative individuals – now is your time to shine! If producing doesn't appeal to you, then consider “behind the camera” options. Become a volunteer. Volunteers are the “life blood” of media centers around the state, and without that involvement PAC will not be able to grow. Consider volunteering to help provide the necessary resources needed for PAC's continued success.

We need you!

SENIOR PROPERTY TAX WORK-OFF PROGRAM

JANUARY 1, 2020 – NOVEMBER 1, 2020

The Senior Property Tax Work-Off Committee is a five member committee appointed by the Select Board.

2020 Committee Members

Susan Doherty, Chairperson; Julie Belliveau, Vice-Chairperson; Sheila Craigen, Clerk; Laura Boussem, Member at Large

What is the Senior Property Tax Work-Off?

The Senior Property Tax Work-Off Program offers income eligible senior citizens age 60+ an opportunity to have an abatement applied to their property tax bill. Participants work in various town departments doing jobs such as general office work, custodial, library shelving, Meals on Wheels, kitchen assistance duties, etc., to earn the tax abatement.

- The 2020 tax abatement maximum is \$1,500 and applied to your 3rd quarter real estate tax bill.

Eligibility Requirements

- Applicants must be 60 years of age or older
- Must occupy and be the owner of the property as of July 1st
- Receive a property tax bill in their name or their spouse's name (60 years+)
- Meet the income guidelines of (proof of income is required):
 - one person household - \$50,000
 - two person household - \$75,000
- Earnings are *exempt* from state taxes
- Earnings are subject to OBRA if participants are not receiving a pension from either Worcester Regional Retirement or Massachusetts State Teachers Retirement
- Final amount earned will be applied to the 3rd quarter real estate tax
- All new applicants are required to have a CORI background check
- All Property Tax Workers must re- apply and be accepted annually for participation in the program

2020 Participation

During 2020, there were seven residents who participated in the Program in the following departments:

- Board of Health
- Building Department/Zoning
- Council on Aging
- DPW/Sewer Departments
- Public Library
- Tax Collector
- Assessors

These individuals as a whole, accumulated 523.75 hours amounting to \$6,678.84 in real estate tax abatements.

For more information or to obtain an application, please contact Julie Belliveau, Assistant Town Manager/HR Director at 978-582-4130 x150 or jbelleveau@lunenburgonline.com

SEWER COMMISSION

The Sewer Commission bears the responsibility of overseeing the Sewer Enterprise Fund, planning for the future, and developing and implementing rules, regulations and policies. Under the Town's Charter, responsibility for the day-to-day operation, care and maintenance of the sanitary sewers are under the supervision of the Town Manager who delegates the responsibility to manage and maintain the operational side of the system to the Department of Public Works' Director. The Town of Lunenburg does not operate a sewer treatment plant. Approximately 85% of Lunenburg sewer is discharged to the City of Leominster and the other 15% is discharged to the City of Fitchburg.

The five-member Sewer Commission was originally established at the Special Town Meeting on May 6, 2006. In August 2019, John Reynolds resigned from the Commission and there were 2 vacancies. Former Commissioners Dave MacDonald and Mike Nault stepped up to fill the positions on September 3, 2019. At the September 24, 2019 meeting, the Commission elected Joan Pease as Chair, Ryan Stober as Vice-Chair and Carl Luck as Clerk. In January 2020, Joan and Ryan gave their resignations due to personal reasons, and Carl Luck became acting Chair. The Commission welcomed back John Reynolds and new member Brett Ramsden in February 2020. With a full board, the Commission elected new officers on 3/10/20 – Dave MacDonald-Chair, John Reynolds-Vice Chair and Brett Ramsden-Clerk.

The Covid-19 crisis resulted in shutdowns during March 2020. The Town of Lunenburg closed all town offices with employees working from home. In June offices reopened by appointment only. All meetings were held virtually via Zoom for the rest of 2020. The Town Caucus was cancelled and the Town Meeting and Town Election were rescheduled to June. The Commission had 4 openings on the Town Election ballot and the following were elected: Dave MacDonald – 1 yr. term, John Reynolds- 2 yr. term and Brett Ramsden and Mike Deveikis – 3 yr. terms. At the June 23, 2020 meeting, the Commission re-elected Dave MacDonald-Chair, John Reynolds-Vice Chair and Brett Ramsden-Clerk.

In July 2019, the Commission began the negotiations with Small Water Systems Services (SWSS) for the FY20 continuation of the contract for the Operations and Management (O&M) of the 10 pumping stations, emergency generators and sewer infrastructure. There were concerns about the increase in callouts and that the pump stations were not running as reliably as in the past. The extra repairs generated invoices that exceeded the contracted amount. The Commission met with SWSS in November 2019 and February 2020 to iron out issues with the service and invoicing. In March 2020, SWSS notified the Commission of their intent to terminate their contract effective April 9, 2020. DPW Director Jack Rodriquez secured Chad T. Empey LLC(CTE) as interim O&M contractor. CTE employee, Al Packard, took over maintenance of the pump stations and reliability greatly improved, with few callouts. In April 2020, the Commission began working on a scope of services for the RFP for the FY21 O&M Contract and put it out for bid in July 2020.

There are currently 898 properties connected to the Lunenburg system and another 340 which have access to Town Sewer but are not yet connected. During FY20, 24 new accounts connected to Town Sewer. The Commission billed out \$864,269 in quarterly sewer bills and had \$44,864 of prior year delinquencies added to the owners' property tax bills for non-payment. Four properties were assessed a privilege fee in FY20. Three properties assessed were residential. One assessment was for a commercial building. Privilege fees help to pay down the debt owed by the Town on the original sewer project.

During FY20, the Commission worked with the residents at 189 Cross Road for a sewer extension, which was approved at the Fall Town Meeting. The Commission is always willing to discuss a potential sewer extension when the applicant can show that challenges exist for standard septic systems.

The new Irrigation Policy went into effect on August 1, 2019, requiring participants to upgrade to a radio capable meter by July 1, 2020. All Irrigation Meter Program customers will be charged an annual fee of \$50 to participate but can receive credit on their quarterly sewer bills based on their Irrigation meter readings. In April 2020, in light of the Covid-19 crisis, the Commission voted to move the deadline for installing radio-compatible equipment to September 1, 2020.

In FY19, the Sewer Commission contracted with Wright Pierce to develop a Maintenance Plan to insure the smooth operation of all 10 sewer pump stations. Wright Pierce conducted a thorough evaluation of the equipment and maintenance currently done at the pump stations. A draft Maintenance Plan, which included an asset management spreadsheet for tracking all maintenance performed, was presented to the Commission

in December 2019. With input from the Commission, Town Manager and the DPW director, Wright Pierce finalized the plan in spring 2020.

The Sewer Commission developed a scope of work for an Inflow/Infiltration (I/I) 3rd party review, aimed at identifying the best use of resources to lessen the I/I entering the sewer system. The project was awarded to Woodard & Curran and work started January 2020. The Woodard & Curran team compiled data from the pump stations and past projects to determine possible sources of I/I. They presented their findings on 6/9/20 to the Commission. A final report with recommendations and an Excel billing tool will be presented in FY21.

In FY20, the Commission continued the annual permit program for the 20 Food Service Establishments with grease traps and interceptors on Town Sewer. Due to the financial strain on restaurant owners due to the Covid-19 crisis, the Commission voted to waive the Annual Permit fee for the Grease Trap Program. The Commission continues to require regular cleanings and submittal of maintenance logs from these establishments as Fats, Oils and Grease (FOG) can negatively affect the smooth operation and maintenance costs of the sewer system. While the Grease Trap Regulation focuses on commercial disposal, individual homeowners can also contribute a significant amount of grease into the system which increases everyone's costs. Whether on sewer or septic, grease should not be put down the drain.

At the June 2020 Town Meeting, the Commission put forward 4 articles, 3 of which related to the FY21 budget and stabilization funds. For the standard budget article for FY21, \$790,027.63 was appropriated from Sewer Enterprise revenues and the sum of \$125,650.25 was appropriated from Retained Earnings along with transfers from 2 stabilization funds (Capital Reserve \$20,000 and Reserve Capacity \$7,513.66) for a total appropriation of \$943,191.54 to operate the Sewer Enterprise Fund for FY21. The amount of \$877,011.90 was approved to cover both the Enterprise Fund's share of Town services and debt service on the sewer betterments. The second article transferred monies to the Capital Reserve Stabilization Fund in the amount of \$30,000, approximately 3% of proposed revenues as the Commission had done for FY18 and FY19. This fund is to be used to maintain and improve the operating efficiency of the system or cover large emergency expenditures. The third warrant article was to transfer the sum of \$656.00 into the OPEB Sewer Trust Fund. All three articles passed at Town Meeting and the fourth article was withdrawn. It was determined in FY20 that any contributions into the Stabilization Funds based on income received the prior fiscal year would be acted on at the Special Town Meeting following the close of the fiscal year. The two funds affected by this change are the Sewer Bank-Inflow/Infiltration Stabilization Fund and the Reserve Capacity Stabilization Fund. A portion of the connection charges assessed at the time of an application for a permit to connect go into these accounts and target resolving I/I issues and future capacity costs paid to the cities of Fitchburg and Leominster.

The Sewer Commission has worked diligently to maintain a balanced budget every year and had not raised rates since 2013. However due to increased costs for operating the sewer pump stations and increased costs for discharging to Fitchburg and Leominster systems, the Commission passed a 10% rate increase for FY21.

The Commission continued working in FY20 with Adam Costa, (Town Counsel), of Mead, Talerman and Costa, and thanks him for his guidance in contract negotiations and clarification of regulations. The Commission would also like to thank Jack Rodriquez, DPW Director, for the seamless and smooth operation of the Sewer Division of the DPW.

They would also like to acknowledge and thank the Lunenburg Water District for their partnership and good working relationship with the Sewer Division in providing valuable assistance with meter readings, ownership changes, and status updates.

Sewer Commission as of FY20 report submittal (Feb 2021):

Dave MacDonald, Chair

John Reynolds, Vice Chair

Brett Ramsden, Clerk

Carl Luck, Member

Mike Deveikis, Member

VETERAN'S AGENT

During 2020 the Town had 13 claims with an average monthly expenditure of \$5000.00 reimbursed to the town by the Veterans Administration. The claims consisted of applications submitted by veterans, widows and dependent children.

There was a funeral expenditure of \$7,700.00 for an indigent veteran who was interred in the MA Veterans Memorial Cemetery in Winchendon, MA.

I applied for \$544.00 in reimbursement for flags placed on Veterans' graves.

Services can be applied for by those seeking claims for disability, medical and survivor's assistance, acquiring military discharges, in addition to any other available services.

The office is located in the lower level of the Ritter Memorial Building located at 960 Massachusetts Avenue. I am available by appointment on Tuesdays from 10 a.m. to 12 Noon.

***PROTECTION OF PERSONS AND
PROPERTY***

BOARD OF HEALTH

The Board of Health Office is located in the old Ritter Library building on the corner of Mass. Ave. and Leominster Road. Our office is on the upper level at the end of the hall on the right.

The Board of Health, with the assistance of its Agent, the Nashoba Associated Boards of Health, continued its mission to maintain its focus on public health and safety issues during 2020, reviewing Title V Inspection Reports, building permits, septic and well permits, nuisance investigations, housing inspections, complaints and general public health related issues as well as resident concerns.

In addition, shortly after the beginning of the year the Board was tasked with responding to the emerging COVID-19 pandemic. In accordance with Governor Baker's Emergency Orders, we are tasked with implementing and enforcing emergency orders. The Board of Health assisted residents and businesses in understanding ever changing guidance and compliance with those orders. We conducted compliance checks and responded to complaints. As the pandemic continued our office assisted residents and business in understanding testing, quarantine and necessary compliance. Because of its size, Nashoba Associated Boards of Health had been able to get limited amounts of vaccine and has been able to hold several clinics, vaccinating First Responders, i.e. Police, Firemen and EMT personnel from each town while following State requirements. Clinics have also been held for residents over 75 years of age or who suffer 2 or more debilitating medical conditions. In the meantime, follow recommendations. Wash hands frequently, wear a mask, and keep six feet rule.

Homeland Security and Emergency Preparedness planning is ongoing. Meetings continue between our agents, other Town departments and regional entities to develop a plan for not only Lunenburg but with our partner towns in our region.

This year, we processed applications for Septic Permit Lot Tests, permits for new construction, new wells, repairs or upgrades to septic systems and well permits. The Board continues its vigilance with regard to septic systems, wells, food service inspections, housing and nuisance complaints and its general mandate to protect the environment and groundwater of the Commonwealth.

The Board of Health provides numerous other services in cooperation with our Health Agents, the Nashoba Associated Boards of Health. In addition to our environmental services, nursing services are provided to our residents. This year clinics provided our residents with inoculations for Flu.

The Town of Lunenburg participates in the Central Mass. Mosquito Control Project. Mosquito Control monitors the mosquito population in Lunenburg and advises of any potential diseases such as Eastern Equine Encephalitis Virus and West Nile Virus and sprays frequently to control the population during the warmer times of the year. Residents who want to have their property sprayed can do so by emailing to: cmmcp@cmmcp.org, calling (508) 393-3055, completing a request on their webpage at: <http://www.cmmcp.org>, or calling the Board of Health office. This service is free of charge to residents.

With our Nashoba Nursing and Hospice partners we provide in home visits to residents recovering from illness and Hospice care and counseling to those in need of this service. Please contact our office in the Ritter Building for more information.

Please remember that our Board Members volunteer their time and efforts on behalf of you, the Citizens of Lunenburg. If you have something that you think we can help you with, we are at your service. Contact the Board office at 582-4146 ext. 430.

Nashoba Associated Boards of Health continues to serve the Lunenburg Board of Health in meeting the challenges of environmental and public health needs in your community. Shortly after the beginning of the year the Board was tasked with responding to the emerging COVID-19 pandemic and as your Health Agent our staff adjusted to provide the needed responses as listed below.

- Informed, educated and stayed current with the information from the Department of Public Health to assist residents, schools and businesses.
- We inspected businesses for compliance, upon complaint, in accordance with the ever- changing guidance from the Governor, Department of Labor Standards and Executive Office of Environmental Affairs and provided interpretation and education to improve compliance.
- We provided guidance to our existing licensed businesses to help them operate safely during the pandemic.
- We added additional public health nursing staff to help with contact tracing and outreach.
- Our VNA continued their home health activities throughout the pandemic adjusting to the requirements imposed by COVID-19

We look forward to continuing our work with the **Lunenburg Board of Health** to meet the public health, environmental and nursing needs of your community as the pandemic continues, including assistance with the roll out of the COVID-19 vaccine. I

Included in highlights of 2020 are the following:

Environmental Health Department

The Nashoba Sanitarian is available in the Lunenburg office and as Town Hall has reopened we have returned to office hours as needed.

Food Service Licensing and Inspections 24

This office licenses, inspects, responds to complaints and conducts follow up on concerns in licensed operations. Many of the inspection done this year were in response to COVID complaints; also affecting inspections: some businesses were closed or closed part of the year (schools).

Recreational Permitting and Inspections 18

This offices licenses, inspects and responds to complaints for recreational camps for children, bathing beaching and public and semi-pools. We provide for the sampling of bathing beaches on a weekly basis. Many camps didn't open and most town beach did not open due to the required operating COVID-19 standards.

Housing & Nuisance Investigation 6

This office inspects dwellings for compliance with the State Sanitary Code, upon compliant and prior to occupancy. We issue orders to corrective actions, reinspect and initiate legal action if necessary. Similarly, complaints from residents concerning unsanitary conditions or pollution are investigated.

Title 5 related work – On-site Sewage Disposal

Application for soil testing (testing necessary for the design of a sewage disposal system) 83

Tests performed (perc tests and soil evaluation holed witnessed) 158

Applications for sewage disposal plans filed 75

Sewage disposal system plans reviewed 92

Sewage disposal system permits issued 58

New construction 29

Existing construction 29

Sewage disposal system inspections 109

Sewage disposal system consultations 0

Private Well related services

Well permits issued 20

Water Quality/ Well Construction 28

(Private wells are regulated by local regulations: construction plans are review, well sampled and results reviewed interpreted)

Rabies Clinics – Animals Immunized (Due to COVID-19, clinics were not held in 2020)

Nashoba Nursing Service & Hospice

Nashoba's Certified Home Health Registered Nurses visits provide skilled services to patients in their home under physician's orders. These services include assessment of physical, psychological, and nutritional needs. Skills include teaching/supervision of medications, wound care, ostomy care, IV therapy on a 24-hour basis, catheter care, case management and referral to other services as needed.

Nashoba's Certified Home Care Aides provide assistance with daily activities of daily living including bathing dressing, exercises and meal preparation.

Nashoba Therapists provide skilled physical, occupational, speech, and dietary therapeutic interventions through assessment, treatment and education. Their integration of client, caregiver, and medical outcomes aims at attaining maximum functional dependence.

Nursing Visits 770

Home Health Aid Visit 24

Rehabilitative Therapy Visit 494

Community Health Nursing

Nashoba's Community Health Nursing program provides an essential public health service to it member communities guided by the American Nurses Association (ANA) 16 Standards of Public Nursing Practice.

Our staff serves as a resource to the community, addressing questions and concerns from the public on a variety of health and safety issues (immunizations, head lice, chronic disease management, safe drug/sharps disposal etc.) in a variety of ways. This year was very different due to COVID-19. This office provided the following services for District.

- We conducted contact tracing for our member communities and managed the contact tracing efforts of the Contact Tracing Collaborative.
- We served as a resource for individuals and businesses interpreting the ever changing information on the disease and the State's response to the pandemic.
- We instructed individuals who tested positive and those who were close contact on the processes of Isolation and Quarantine, providing release letters for those who completed each process.
- We worked with the State laboratory to identify and manage clusters of disease/exposures in the District.
- We facilitated the State's involvement in clusters at long term care facilities.

- We worked with the school nurses in the District to provided information, offer advice and supporting contact tracing in the schools.
- We are available to collaborate with all municipal staff, including Councils on Aging to address questions on COVID-19, exposures and actions which may be necessary to address these exposures.
- Conducted flu clinics in each community to address the State’s requirement for school age children and make vaccinations available to everyone.
- We administered 89 flu shots through our annual clinics.
- We started planning to hold COVID-19 vaccine clinics.

Nashoba reviewed, investigated and reported on the following cases of communicable diseases from your community. Though the daily reporting and investigating work is not always visible it is vital to protect the public from the spread of disease.

Communicable Disease Number of Cases:

Babesiosis.....	1
Campylobacteriosis.....	1
Cryptosporidiosis.....	1
Cyclosporiasis.....	1
Hepatitis C.....	1
Human Granulocytic Anaplasmosis.....	5
Influenza.....	63
Lyme Disease.....	16
Salmonellosis.....	1
SARS CoV-2 (COVID-19).....	355

Dental Health Department

Due the challenges presented by COVID-19 the Dental Program was suspended in March.

FIRE DEPARTMENT

The Firefighters and Emergency Medical Technicians of the Lunenburg Fire Department are dedicated to providing the highest quality, most cost effective fire and emergency medical services to the citizens of the Town of Lunenburg.

In 2020, your Fire Department responded to 1955 calls for service, broken down as follows:

Fires, Alarms & Hazardous Conditions	489	Emergency Medical	962
Inspections	534	Other	18

The 2020 Pandemic created one of the most challenging and stressful years in anyone's memory. Our personnel did not have the option of "Staying at Home." We had to make drastic changes in how we treated patients and interacted with the public, while still providing the level of service our community has come to expect. This was done while dealing with rapidly changing, and often conflicting information from State and Federal officials. That we experienced only four members testing positive is a testament to everyone's dedication and commitment to serve our community. My thanks go out to the men and women of the Department who persevered through this strange time, and continue to do so today.

Current Fire Department staffing is now 7 Career and 40-45 On Call Firefighters and Emergency Medical Technicians, plus 1 full-time Administrative Assistant/EMS Coordinator. The station is manned 7 days per week with 2-3 Firefighter/Emergency Medical Technicians. This coverage is a combination of Career personnel in conjunction with 88 hours per week of per diem coverage. This coverage is provided by our Call Firefighter/EMTs staffing the station at their hourly rate. Staffing the station with dual trained Fire/EMS personnel ensures that we are ready to respond to whatever emergency occurs.

Though we have 24-hour coverage in the station, many EMS calls and nearly all fire calls still require more personnel than are on duty in the station. This means we still rely heavily on the dedication and commitment of our On Call Firefighters and Emergency Medical Technicians. Our Call personnel remain, and will remain a vital part of our emergency response for years to come. A new Call Firefighter/EMT must attend over 340 hours of initial training, plus additional time in orientation and field training. Members qualifying to drive Fire Apparatus must complete an additional 65 hours of classroom and practical training. On average, it takes a new member one and a half to two years to full complete this training.

The department continues to move towards the goal of providing our own Paramedic Level Ambulance Service. Though we currently operate two ambulances at the Advanced EMT Level, we must still rely on outside agencies to provide Paramedic Level care when needed. Paramedic training is in excess of 2000 hours and requires 1-½ years of college level classroom education, clinical time and field internships to obtain certification. The department continues to train our newly hired staff to this level and recruit licensed Paramedics to fill Career positions when possible. We had hoped to be providing Paramedic Level care by the beginning of 2021, but the COVID Pandemic has pushed that out to Mid-2021.

Members who were in the midst of their Paramedic training lost 6-7 months due to the training schools shutting down.

In 2020, the Fire Prevention Division conducted 534 Inspections. This is in addition to multiple fire drills and public education initiatives. By law, we are required to inspect Smoke and Carbon Monoxide Detector installations when a home is sold. We are also required to inspect all new oil burner and propane gas installations. Any business holding an on-premise liquor license also requires a yearly inspection for fire safety issues. In addition, all new construction projects must have their plans reviewed for proper fire protection, as well as ongoing inspections during the construction process. Though the Pandemic altered how we conducted these inspections, we never halted them. Other Fire Safety Initiatives undertaken during 2020 include:

- Continuation of a Department of Fire Services Grant in the amount of \$6953 to assist with Fire Safety Education in both the Schools and with Senior Citizens. This grant provides funding for both materials and personnel to bring fire safety education to our most vulnerable populations. Highlights of activity through this grant include:
 - ◇ Though the Pandemic severely curtailed our interactions with the Schools and the Elderly, we continued to provide services where and when we could. We look forward to returning to in person presentations and training in 2021.
 - ◇ Personnel assisted with several community events, such as the Council on Aging and Lion's Club Thanksgiving Basket programs, The Salvation Army's "Rescue Christmas" initiative, and the Christmas Light Drive Through at the Middle/High School
 - ◇ Training to certify personnel as Public Life Safety Educators. In 2020, Firefighter Melissa Buchanan joined Captain James Ricci, Lt. Christos Lekaditis and Firefighter Austin Flagg as the department's Life Safety Educators.
 - ◇ Participation in the Senior Center's "Sand for Seniors" Program. This program provides buckets of walkway sand for Senior Citizens who were unable to obtain it for themselves in the winter months. In partnership with this program, Captain James Ricci delivers the sand to the residents and when possible, inspects their homes for Smoke and Carbon Monoxide Detectors. If the resident was lacking detectors, Capt. Ricci is able to install free detectors obtained through the Senior SAFE Grant. Despite the Pandemic, we modified our procedures to keep this valuable program operating.

It should be noted that each year, 50% of fatal fires are found to have nonfunctional or nonexistent smoke detectors.

Seven Firefighters from Lunenburg continue to be members of the Fire District 8 Technical Rescue and Dive Teams. These regional teams respond to high risk and unusual rescue situations, such as Confined Space, Rescue from Heights, Building and Trench Collapse, Swift/Floodwater and Underwater Search and Recovery. In conjunction with these Teams, Lunenburg operates both a Water Rescue Unit and a Collapse/Trench Rescue Trailer.

Apparatus replacement continues to move forward. The replacements for Ladder 1 and Engine 4 were received in July and October respectively. These units are now in full service and will serve the Town for many years to come. This puts the average age of our front line firefighting apparatus at a little over 6 years old. Newer, state of the art apparatus will decrease our maintenance costs and down time. It also provides safer and more reliable equipment for emergency response.

In conclusion, I would like to thank the members of the Lunenburg Fire Department for their outstanding commitment to the Town. Their enthusiasm, professionalism and dedication continue to impress me every day. Especially in the face of one of the most stressful years in anyone's memory. I would also like to thank the other department heads, boards and commissions for their continuing help. The level of interdepartmental cooperation that occurs in the daily course of town business is invisible to many people, but it is critical to all operations. Finally, my thanks also go out to the citizens of Lunenburg for their ongoing support of public safety. Such support allows us to continue providing the high level of service you have come to expect from us.

Roster of the Lunenburg Fire Department- 2020

I am truly honored to be selected as the new Chief of Police for the Lunenburg Police Department, and it is my pleasure to present this town report. The Lunenburg Police Department has seen many changes in 2020, the first and foremost is the retirement of Chief James P. Marino.

Chief Marino started with the Lunenburg Police Department in 1979 as a Reserve Police Officer, rising through the ranks in a 41 year career that culminated with being appointed as the Chief of Police on July 4, 2012. Throughout his career Chief Marino was dedicated to not only the Lunenburg Police Department, but to the Town of Lunenburg. This dedication was evident as he tirelessly built cruisers for the Department year after year. Chief Marino has also volunteered for as many civic events as he could. Chief Marino continues to dedicate his time to the Town as member of the Select Board.

During his tenure, Chief Marino was assigned as one of the first Detectives for the Lunenburg Police Department. While a Detective, Chief Marino received several commendations for his investigative work that led to successful apprehension and prosecutions of suspect(s). Chief Marino was also recognized for his work with the area drug task force when the task force was in its infancy. His role as a long time DARE officer for the Lunenburg Public Schools made Chief Marino a recognizable figure throughout the town, and built a lasting relationship between the School District and Lunenburg Police Department.

As recognized as he was for his diligent work as a police officer, Chief Marino's true passion was evident as the Department's fleet manager. Chief Marino has always been a car enthusiast and carried that with him throughout his career. Chief Marino has built the department's cruisers for over 25 years, with his attention to detail reflected on how well built the cruisers were.

I am truly grateful that I had the opportunity to work for Chief Marino for the last 20 years. His mentorship and friendship has led me to the position that I am in today. On behalf of the Lunenburg Police Department, we want to thank Chief James P. Marino for all that he has done for the department and the Town of Lunenburg. We wish him good luck, good health and prosperity as he enters the next phase of his life.

In December of 2020, Lt. Jeffrey M. Thibodeau was appointed to the permanent Lieutenant's position. Lt. Thibodeau has been a member of the Lunenburg Police Department since 2011, and obtained the rank of Detective Sergeant in July of 2014. Lt. Thibodeau has been a police officer since 2001 when he was hired by the Townsend Police Department, and has also worked with the Federal Bureau of Prisons located in Devens, MA.

Lt. Thibodeau holds a Bachelor's Degree of Science in Criminal Justice from Fitchburg State University. During his tenure with the Lunenburg Police Department, Lt. Thibodeau has completed numerous investigative classes and trainings, which eventually led him to be assigned to the Federal Bureau of Investigations High Intensity Drug Trafficking Area (HIDTA), and the North Worcester County Drug Task Force. Lt. Thibodeau has also received leadership training through HIDTA, and has completed two sessions of the FBI LEEDA course. Lt. Thibodeau has completed several administrative courses involving Public Records Law, Internal Affairs Investigation and other related courses since his appointment. It is a pleasure to welcome Lt. Thibodeau as the second in command of the department.

In December of 2020, Sgt. Joshua M. Mathieu was appointed as a permanent Sergeant. Sgt. Mathieu has been a member of the Lunenburg Police Department since August of 2011, and has been a full time officer since November of 2012. Sgt. Mathieu holds a Bachelor Degree of Science degree from Westfield State

College. Sgt. Mathieu has completed numerous training courses involving investigative techniques, is one of the department's Field Training Officers, and has been involved with training numerous new Lunenburg Police Officers. Sgt. Mathieu is also the department's liaison for the Critical Incident Management System (CIMS), which is a program involving a collaboration with Central MA communities to combat Opioid addiction. It is a pleasure to welcome Sgt. Mathieu to the department's command staff.

In 2020 we had three officers complete the Massachusetts Municipal Training Committee full time Basic Recruit Officer Training course. Off. Ramon J. Cabrera, Off. Anthony P. Cappucci, and Off. Kameran P. Munroe. All three officers have successfully completed the required Department Field Training, and are currently assigned to the Patrol Bureau. We are pleased to welcome Ramon, Anthony and Kam to the department's full time ranks.

2020 has been truly an unparalleled year, dealing with the Covid-19 Pandemic and the effects it has had on our way of life, and our economy, to dealing with civil unrest issues that have arisen as result of the tragic events that unfolded with the death of George Floyd. Even as these events have changed our worlds, the Lunenburg Police Department strives to give the community the best possible service that we can provide. During these unprecedented times our officers have performed admirably, risking their own health to continue to serve the community. I commend our officers, and members of our department for the work that has been completed throughout the year without reservation.

Mission Statement:

We, the members of the Lunenburg Police Department, strive to provide the highest quality of police services to our community members and visitors alike. We believe in Community Policing, and all of the benefits that are realized from this concept. We will strive to maintain the strong partnerships that have been developed with our community, and continuously look for ways improve that relationship. We will strive to deliver police services in a fair and impartial manner, consistent with all applicable laws, while respecting all individual rights. We will use innovative and modern ideas and techniques to solve crimes, apprehend criminal offenders, and help resolve quality of life issues.

Values:

- We are committed to ensuring that all of our actions reflect the utmost integrity, and honesty.
- We are committed to respecting individual rights, human dignity, and the values of all members of the community and members of the Lunenburg Police Department.
- We are a proactive and problem solving agency.
- We strive to serve our citizens in a professional manner with compassion, respect, and empathy.
- We are committed to providing the highest quality of police services to our community.
- We recognize the value of our employees, and recognize they are our most valued resource. We will strive to provide our employees with the necessary resources, training, and career development to enhance their professionalism.
- We recognize that the well being of our employees is the upmost importance. We will strive to provide the necessary assistance to assure our employees enjoy a long and satisfying career.

2020 Statistical Information:

The following statistical information is to provide some insight into our officers' activity for 2020.

Calls for service: 20,118

Arrests Totals: 382

Arrests Custody: 118

Arrests Summons: 256

Protective Custody: 8

Motor Vehicle Accidents (MVA) Totals: 236

MVA with injury: 58

MVA without injury: 134

MVA hit and run: 44

Motor Vehicle Stops Totals: 2,480

Citations Civil (fines): 114

Citations Warnings: 627

Citations Criminal Offenses: 175

No Action Taken/Verbal: 1,566

Domestic Arguments/Violence Totals: 101

Restraining Orders: 41

Note: 42% increase from 2019. Restraining Orders issued 156.25% increase from 2019.

Animal Control Officer (ACO) calls for service totals: 260

Dog bites: 15

Kennel Inspections: 11

As result of the above calls the officers generated 1,095 written reports involving Incident Based Reporting (IBR) and National Incident Based Reporting (NIBRS), which is a State and Federal Crime data base. The officers also generated an additional 974 reports that did not fall in the either IBR or NIBRS category.

In 2020 there was an 11% increase with Crimes Against Persons, with Aggravated and Simple Assaults accounting for highest increase at 29% and 35% respectively. Without a significant study being conducted, it is believed that the number of assaults that have occurred is related to the Pandemic and the effects of isolation.

In 2020 there was a 23% total increase in Crimes Against Property. Unemployment and Identity Fraud accounted for the significant increase with Property Crimes, with the two categories having a 117% increase from 2019.

Although property crimes have risen, there was a 15% decrease in Breaking and Entering's, and a 58% decrease in shoplifting. These numbers also reflect the effects of the Pandemic and the fact that people are staying home.

I would like to thank the citizens of Lunenburg for their continued support. The department could not be successful without the support and collaboration with the citizens we serve. I look forward to leading this department as we continue to navigate through these trying times.

Sincerely,

Chief Thomas L. Gammel

PLANNING

FY 2021 CAPITAL PLAN

The Capital Planning Committee presented the Fiscal Year 2021 plan to the Town Manager in January as required by Charter and the Town Manager included all the recommendations, as prioritized by the Capital Planning Committee, in her presentation to the Board of Selectmen and Finance Committee in the latter half of January.

Below is the original FY2021 Capital Plan recommended in January of 2020:

Priority #	CIP#	Dept.	Project Name	Category	FY2021 Projected
1	FM20-01	DPW	Town Hall, ADA Ramp/Sidewalk	Facilities	\$22,000
2	INFRA20-01	Highway	Flat Hill Culvert Design	Infrastructure	\$112,500
3	LPS16-19-C	Schools	THES Asbestos Abatement/Ceiling Replacement	Facilities	\$123,500
4	PD19-01	Police	Police Vehicle, 1 Marked New	Vehicle	\$67,000
5	FD17-05-B	Fire	SCBA Complement, Replacement (1/2)	Equipment	\$115,000
6	PD16-14	Police	Police Vehicle, 1 Marked Replacement	Vehicle	\$67,000
7	FD16-20-A	Fire	ALS Equipment Phase 1	Equipment	\$54,800
8	PD20-01	Police	ACO Vehicle	Vehicle	\$26,000
9	FD20-01	Fire	Midlife Overhaul of Squad 3	Vehicle	\$65,000
10	PD16-18	Police	Portable Radios	Equipment	\$45,000
11	LPS19-03-A	Schools	Design AC for Classrooms at Primary	Planning	\$10,000
12	DPW16-10	Highway	Trackless & Attachments	Vehicle	\$170,000
13	FM17-16A	DPW	Senior Center, Reconfigure Front Entrance	Facilities	\$24,000
14	DPW17-11	Highway	One Ton Dump with Plow	Vehicle	\$58,833
15	FM16-02	DPW	PSB, Carport Reconfiguration	Facilities	\$135,000
16	FM20-06	DPW	Senior Center, Kitchen Remodel	Facilities	\$22,000
17	LPS19-02	Schools	Admin Air Conditioning, THES	Facilities	\$28,000
18	FM16-11	DPW	Library, Carpet	Facilities	\$126,000
19	FM20-07	DPW	Ritter, Kitchen Remodel	Facilities	\$12,000
20	FM20-02	DPW	Ritter, ADA Ramp Design	Facilities	\$25,500
21	FM20-10	DPW	Cemetery Parking Lot	Facilities	\$20,000
			Total Capital Plan		\$1,329,133
		Funding:	Raise & appropriate		\$650,000
			Free cash		\$679,133
			Unexpended Capital		
			Premium Reserved for Capital		
			Total		\$1,329,133

Due to the coronavirus outbreak in March and the projected economic impact to the town's finances, the Town Manager met with the Capital Planning Committee on April 16th to inform the Committee that the portion of the Plan that was to be funded from tax revenues, \$650,000 of the \$1,329,133, would need to be deferred until the fall Special Town Meeting, when we would have a better financial picture of the impact of the shutdown on the town's revenues. The Committee reviewed all of the projects at this meeting and re-voted a new recommendation. Their new recommendation reprioritized some projects and the revised total cost of the Plan is \$664,800, which uses \$14,333 less of Free Cash than the original recommendation.

PLANNING BOARD

As everyone is aware this past year was challenging. The Planning Board would like to thank the residents of Lunenburg, business owners and applicants for their cooperation and patience as the staff and Board adjusted to the new normal of meeting on Zoom and coordinating daily operations around the required safety protocols and varying access to public buildings.

Fifteen (15) ANR plans (land division plans not requiring approval under the Subdivision Control Law, but still requiring Board endorsement) were approved.

Butterfly Lane, a nine-lot residential subdivision on Elmwood Road, which initially began construction in 2014, was completed and the street accepted as a public way.

Tri Town Landing on Youngs Road began construction on Baker Brook Apartments (Building #5), which would consist of 70 units of rental senior housing.

Construction was completed and occupancy granted for Lunenburg's Water District new office and garage on Massachusetts Avenue.

The Planning Board adopted a Charge for an Economic Development Committee (EDC). This group would be composed of a combination of Town Officials, residents and business owners charged with providing advice, and guidance on the state of the business community in Lunenburg and ways that Town Government can support and sustain the local economy.

Two warrant articles, amending the Earth Removal General Bylaw and transferring the permitting authority from the Select Board to the Planning Board, were presented at June 2020 Annual Town Meeting, but did not pass.

Both Rhonda Lisio and Gregory Bittner stepped down from the Board. Marisa Thompson was appointed to fill one of the vacancies until the May 2020 Town election; regrettably she had to step down after only a short time due to job relocation. The Board and Planning office staff would like to thank Ms. Thompson, Mr. Bittner and Ms. Lisio for their volunteerism and all the contributions they provided to making Lunenburg a wonderful community. As a result of May 2020 Town Election, two new members joined the Board; Matthew Brenner and Erik Torgersen. The Board and Planning Office staff welcomed Mr. Brenner and Mr. Torgersen to the Board and we look forward to your enthusiasm and contributions in the years to come.

The Planning Office is located in the Ritter Memorial Building, 960 Massachusetts Avenue and can be reached at 978-582-4147 extension 5. Various forms are available online at <https://lunenburgma.gov/> on the Planning Board's homepage. The Zoning Map, Code of the Town of Lunenburg, MA (which contains the Protective {Zoning} Bylaws), Rules and Regulations Governing the Subdivision of Land, Rules & Regulations for Site Plan Approval & Special Permits, and Permitting Guidebook are available online. The Board continues to work on updating the Zoning and Land Subdivision portions of the Code.

Matthew Allison, Chair

Tanner Cole, Vice Chair

Paula Bertram, Clerk

Matthew Brenner, Member

Erik Torgersen, Member

Adam R. Burney, Land Use Director

AD HOC OPEN SPACE ADVISORY COMMITTEE TO THE PLANNING BOARD

The Open Space Committee's efforts in FY'21 revolved around finalizing two major projects it had begun in FY '20. Namely, finalizing the update the town's Open Space and Recreation Plan (OSRP) and completing the acquisition of the former Saliba property on Northfield Road as unanimously approved at the Special Town Meeting in November of 2019.

The OSRP received final approval from the Massachusetts Executive Office of Energy and Environmental Affairs Division of Conservation Services' (DCS) on May 15, 2020. In addition to being a valuable planning tool, the OSRP also makes the town eligible for DCS-administered grant programs through 2026.

After Special Town Meeting approval, the Open Space Committee assisted with the completion of the Saliba acquisition, which added approximately 318 acres of land for town conservation (259 acres north of Northfield Road, with frontage on New West Townsend Road and Howard Street) and recreation uses (59 acres on the south side of Northfield Road). The \$775,000 open space acquisition was funded with the assistance of \$500,000 in reimbursements by state grants made possible by the newly approved OSRP. The property was acquired on June 25, 2020. The conservation portion of the property is known as "Table Rock Conservation Area" and the recreation portion of the property is known as "Northfield Park", both accessible from a small parking area located on Northfield Road near Settlers' Crossing Golf Course.

The Open Space Committee also reviewed several Chapter 61 withdrawal notifications this past year as part of the town's defined multi-board process. One such notification at 250 Howard Street resulted in a negotiated donation of approximately 3.4 acres of land to the Conservation Commission. The donation was approved at the November 2020 Special Town Meeting and conveyed to the Town in January of 2021.

The Open Space Committee also advised other town boards on the Bright Farms project, particularly related to the donation of approximately 1.5 acres of land to provide critical recreational trail linkage from the Rayno Conservation Area to the newly acquired Northfield Park and beyond. The donation was approved at the November 2020 Special Town Meeting.

Lastly, the Open Space Committee has begun a screening process to review the inventory of existing town-owned property to determine if any vacant and currently unused parcels are of potential conservation or recreation interest. Parcels of interest identified in that screening process will then be brought forward to other town boards and committees to discuss a plan for the future of those parcels.

Respectfully submitted,

Brandon Kibbe, Chairman

ZONING BOARD OF APPEALS

The Zoning Board of Appeals heard several petitions during calendar year 2020. There were several applicants seeking special permits and special permits for dimensional variations. The Zoning Board meetings are held on the second and fourth Wednesdays of the month at Town Hall at 7:00PM or ZOOM as an alternative on an “as needed” basis.

The Zoning Board consists of the following members:

Alfred Gravelle, Chairman,

James Besarkarski, Vice-Chairman,

Members:

Hans Wentrup,

David Blatt,

Patrick Callahan

Anthony Nicastro, Associate Member.

Lisa Normandin serves as the Administrative Assistant to the Zoning Board.

The functions of your Zoning Board of Appeals as required by statutes are as follows:

1. To hear and decide applications for Variances from Town’s Protective By-Laws as authorized in the By-laws.
2. To hear and decide applications for Special Permits as authorized in the Town’s Protective By-laws.
3. To hear and decide appeals in accordance with Chapter 40A, Section 8 of the Massachusetts General Laws, as amended, from any person aggrieved by reason of his or her inability to obtain a permit or enforcement action from the Administrative Officer or Board in the Town, the Regional Planning Agency, abutting City or Town or other Administrative Official.
4. To act upon application for comprehensive permits in accordance with Massachusetts General Laws, Chapter 40B. The Zoning Board of Appeals reviews requests for comprehensive permits submitted to the Board under Chapter 40B by developers who wish to create affordable housing. These requests can, by law, circumvent local zoning ordinances.

The office of the Zoning Board of Appeals is located in the Ritter Memorial Building, 960 Massachusetts Avenue, Lunenburg.

Business hours are 8:00 AM to 4:00 PM Monday and Wednesday and 8:00 AM to 6:00 PM Tuesday and Thursday, closed Friday.

If you need any assistance from the Zoning Board of Appeals please contact us at 978-582-4146 X 421 during regular business hours.

Zoning Board applications are available in the office and online at

<https://www.lunenburgma.gov/boards-commissions-committees/zoning-board-appeals>

EDUCATION

Lunenburg Public Schools

Town Report

2020-2021

Superintendent's Message

It is always a pleasure for me to present my annual report for the Lunenburg Public Schools, a district I am honored and proud to lead. 2020 was a truly unprecedented year in public education. This report reflects the ways in which the schools were impacted by the COVID-19 pandemic and the district's continued focus on our Strategy for Continuous Improvement. I want to acknowledge and express my sincere gratitude for a collaborative approach toward projecting and planning for current and future needs with the Town Manager, Heather Lemieux. As the leader of the district I am fortunate to work with a School Committee that is truly dedicated to serving the best interests of our students and appreciative that the Board of Selectmen and Finance Committee work collaboratively with the School Committee and School Department not only to strengthen communication, but to problem-solve in order to better meet the educational needs of the children of Lunenburg.

The work of the district, outlined in the Strategy for Continuous Improvement, is aligned with our Mission and Vision:

The Mission of the Lunenburg Public Schools is to provide all students with the skills, confidence, and passion for life-long learning so that they may find their own paths to successful careers, active citizenship, and rewarding lives.

The Lunenburg Public Schools is committed to becoming a leader in education by focusing on its values of attending to the personal well-being of its students, providing high-quality curricula and student-centered instruction for deeper learning at all levels, and promoting the development of attributes and skills necessary for continuous learning for all.

The Strategy is a living document which is reviewed annually and adjusted as needed. In August 2020, the District Leadership Team reviewed that Strategy, its objectives and action plans, with a "COVID-19 needs" lens. It was determined that no new COVID-specific objectives or priority actions were needed. The Strategy objectives for the next three to four years are:

Transforming Teaching and Learning: To ensure teaching and learning are student-centered and inclusive by: (1) establishing effective teams of educational leaders to accomplish the essential work for transforming practice, and (2) hiring and developing excellent educators who are continually learning and adapting practice to meet the needs of all students. (DSP Goals: 1, 2, 3, 5, {4, 7})

Cultivating Climate & Culture: To create a culture that values data use and fosters continuous learning in a climate that is safe, caring, inclusive and reflective of our core values. (*District Strategic Plan Goals 1, 6*)

Communication & Operations: To improve operational efficiencies, including communication, in order to increase the organization's capacity to execute the district's mission and vision. (*District Strategic Plan Goal 8*)

Equity, Access, Achievement & Opportunity for All Students: To ensure all students are provided equal access to a high-quality education, that is collaborative, interactive, and relevant with an appropriate level of support and challenge so that they can become well-rounded, resilient, confident, and capable young adults adequately prepared for future challenges. (*District Strategic Plan Goals 1, 6*)

In order to cultivate district-wide leadership in key areas identified in the Strategy for Continuous Improvement, the district continues to create teams to lead our work. In 2018-2019, the Behavioral Health Advisory Council, Elementary Literacy Team, and Professional Development Committee were created. In 2019-2020, a District Advisory Council and Equity Advisory Council were formed. In addition to existing building-based Teacher Support Teams (TST), in 2020-2021 building-based Behavioral Health Support Teams (BHST) were established. These teams review student cases referred by staff or administration. TST determines which academic interventions may be needed and BHST determines which social/emotional/behavioral interventions are needed. Intervention plans are developed, implemented and reviewed for impact and progress. In 2020-2021, an Interim Director of Teaching and Learning and Title I Coordinator joined the Instructional Leadership Team (ILT) which is focused on improving teaching and learning. Our Behavioral Health Coordinator, new this year, Extended Day Director; School-Community Linked Services Coordinator; along with our new ILT members, have joined our District Leadership Team in order to establish effective communication within the district, particularly important under COVID conditions.

In March 2020, school buildings across the Commonwealth were closed and teaching and learning transitioned to a virtual format. This presented several challenges for the district: feeding our students, ensuring they had means to access online learning, and shifting instruction to a virtual platform. We immediately set to work and created a grab-n-go drive through breakfast and lunch program, making deliveries to homes if families did not have the means to pick-up the meals at the school. We gathered together every laptop and iPad in the district, surveyed families to determine the level of need, and distributed devices to students in households with no device or one device shared by all members of the household. We worked with the IT Department, administrators, and teachers to establish norms and expectations for staff, students, and families in a virtual classroom, as well as establishing a robust schedule of instructional technology professional development offerings to prepare our teachers for a transition from a virtual Enrichment Learning model to a Remote Learning model.

Before the 2019-2020 school-year came to a close, we were already preparing for a very different type of school-year in 2020-2021. A Reopen Planning Team, comprised of thirty-five district and school administrators, faculty, staff, parents, and transportation representatives was formed June 1, 2020. By June 30, 2020 members of this Team were assigned to Task Groups: Teaching and Learning; Healthy and Safe Facilities; Behavioral Health; Special Services; Extended Programming; Human Resources and Operations; and Equity, Access, and Engagement.

These Task Groups created recommendations which ultimately became the Fall 2020 Reopen Plan which was presented to the Lunenburg School Committee on August 5, 2020.

The Reopen Plan, as per the Department of Elementary and Secondary Education, included an outline of three different learning models: full Remote Learning, Hybrid Learning, full Return to Campus Learning.

Ultimately, due to the challenges of social distancing, the full Return to Campus was not the recommended model for reopening. The full Remote Learning model was not recommended due to the strong need to have our students get back to face-to-face learning. The Reopen Planning Team recommended and the School Committee approved a Hybrid Learning model for reopening in Fall 2020. While the district reopened in the Hybrid Learning model, families did have the option of remaining in a full Remote Learning model.

Grade Level	Lunenburg Resident Students	School Choice Students	Total
PK	36	0	36
K	108	0	108
1	105	0	105
2	140	0	140
Primary Total	389	0	389
3	110	0	110
4	112	0	112
5	123	0	123
Elementary Total	345	0	345
6	126	0	126
7	141	0	141
8	123	0	123
Middle School Total	390	2	390
9	122	2	124
10	104	9	113
11	128	0	128
12	103	12	115
High School Total	457	23	480
Advanced Community Experience Program (TCP)	8	0	8
All Schools Total	1589	23	1612

Hybrid students were assigned to Cohorts. All students learn remotely on Mondays. Cohort A students attend classes on campus on Tuesdays and Thursdays and learn remotely on Wednesdays and Fridays. Cohort B students attend classes on Wednesdays and Fridays and learn remotely on Tuesdays and Thursdays. By using Cohorts, the number of students on campus is reduced, allowing for implementation of the CDC recommended six feet of social distancing. Families were asked to register for bus transportation as numbers of students on a bus was also limited due to social distancing requirements. In order to better meet the needs of students on their hybrid remote day, at the start of Quarter 3 the Hybrid Learning model was enhanced with the addition of livestreaming on hybrid remote learning days.

In order for the district to begin livestreaming, instructional technology required an upgrade. Funded through COVID relief funds, teachers received an upgraded laptop with docking station, microphone, 27 inch monitor, and stylus pen. The 2020-2021 school calendar was amended to include eight early release days. On these days, students learn on campus in the morning on their Cohort day, are dismissed and transported home, and continue learning remotely for the afternoon. Teachers and staff work together in the afternoons to prepare and plan for livestreaming lessons, share best practices, or attend instructional technology workshops.

Due to the closure of schools in the spring of 2020, MCAS assessments were not administered. As a result, we do not have MCAS data to include in our annual report. As it was known that MCAS data would not be available, the district procured online assessment platforms. These standardized assessments were administered in the fall and winter of 2020. These assessments provided valuable information that allowed for targeted intervention for students. These data also allow us to determine if our students are working on grade-level. District, school, and educator evaluation goals for faculty and administrators focus on effectively using new tools for teaching and new assessment tools to determine student performance and growth.

Much of our normal practice required adjustment due to COVID safety protocols, and our professional development practice required adjustment as well. We were able to continue our inter-district collaboration with North Middlesex Regional School District by holding a virtual conference in November 2020. The Lunenburg Professional Development Committee is excited to plan a regional professional development conference in November 2021 and serve as a host campus.

Through grant funds the district was able to restore a director-level curriculum position which had been cut in 2012. This position is essential to provide supervision of and assistance to teachers in a review of the curriculum. Due to the school-year being reduced from 180 days to 170 days due to COVID-19, adjustments to pacing, prioritization, and sequencing of the curriculum were necessary.

As MCAS was not administered in spring 2020 due to school closure, the district procured an online standardized assessment tool in order to have the necessary data to measure student growth and performance, and to determine which students require intervention to close learning gaps. Robust teacher training in instructional and assessment technologies and sharing of best practice was built into the school calendar. The Interim Director of Teaching and Learning and Title I Coordinator positions were integral to all of this work.

I want to acknowledge and thank our staff for their professionalism and flexibility as we have continued to make adjustments in order to provide the best learning experience possible for our students; our parents and families for the sacrifices they have made in order to support their students' learning from home; and the School Committee, Town Manager, and local boards and committees for their support of the schools throughout the pandemic. Lunenburg has been successful in keeping our schools open and remaining focused on improving the ways in which we support our students academically, socially, and emotionally because of the strong partnership the schools have experienced with parents, extended families, and the greater community.

“The oak fought the wind and was broken, the willow bent when it must and survived.”
— **Robert Jordan**

For me, the highlight of this report annually is announcing the recipient of the Superintendent's Award. The selection process is difficult as we have many hard working, high-performing, community service-oriented students. The students this year are even more impressive, continuing to demonstrate their resilience as COVID-19 has impacted the normalcy of life in so many ways. The recipient of the 2021 Superintendent's Award is *Olivia Catalini*. Olivia has certainly persevered, citing her work ethic and disciplined nature as two qualities that have assisted her during high school and the pandemic.

Academically, she has achieved several honors and awards for excellence in Math, Science, History, Latin and the Arts. Her skills of organization and attention to detail have been two key elements that have kept her focused through seven AP courses taken.

Her curiosity and creativity has led her to pursue instrumental music in the form of guitar, as well as various art forms such as watercolor, colored pencil and sketching.

Being a natural leader, she has helped coach her varsity tennis teammates on a co-op team between Lunenburg and Fitchburg. Her many interests show her innovative side in photography, gaming and graphic design which may lead her down an artistic path in her future.

In her own words, “I want to integrate into a college community which will help me grow as a person and that I can give back in return.” We wish Olivia all of the best as she pursues her future endeavors.

School Facilities 2020-2021

The focus of school maintenance for FY21 was to support operating the school in a COVID 19 environment, as well preventative maintenance on heating and ventilation systems and energy conservation measures. The focus of repairs continues to be on Turkey Hill Elementary School with a major focus on ensuring the heating and ventilation system is fully operational.

COVID 19

The district prepared for opening during the epidemic by installing partitions in the school offices, upgrading custodial equipment for disinfection, preparing supplies for the teaching environment such as additional disinfectant spray bottles and microfiber wipers and changing cleaning protocols to add additional disinfection periods during and after the school day. A close inspection was done of the ventilation system at Turkey Hill and numerous repairs were completed prior to the opening of school. Indoor Air Quality assessments were completed by using school personnel and confirmed that the ventilation system is performing well against its original design.

Security Upgrades

The district applied for a Safer Schools and Community Grant in March 2020 and was awarded \$50,000 to install a Bi-Directional Antenna at Lunenburg Primary School for police and fire services. The project completed by Cybercomm and Di-Rock Electric. Work began in July 2020 and was completed by the end of August. The bi-directional antenna improves communication for both police and fire personnel while they are in the building and ensure good communications back to the Public Safety Building.

Water Testing

In the third year of wide spread water testing for lead and copper in the drinking water at all schools in June 2020, lead was detected in a number of sources at Turkey Hill and Passios Elementary School. The source of the lead is believed to be solder from joining copper pipes. The teaching staff, parents and students have been made aware of the need to flush water sources at the start of the school day. A fixture replacement program was begun for the Turkey Hill Elementary School to replace fixtures as well as closing in piping for selected areas. Follow up testing will occur at all schools in June 2021.

Energy Savings

A Green Community Grant was awarded to the Town of Lunenburg to upgrade three appliances at Turkey Hill Elementary School with Energy Star Appliances (two-door reach in refrigerator, milk cooler and a double convection oven) at a cost of \$15,092. A LED lighting conversion for Lunenburg Middle High School kitchen was begun in December 2020 and is expected to be complete in Feb 2021 with \$2,780.12 in Green Community Grant funds. A replacement domestic hot water heater for Lunenburg Primary School was sent out for bid in January 2021 and is expected to be complete by April 2021 with \$9,900 in green community grant funds.

Capital Program

The FY 21 capital program continued to fund additional asbestos abatement at Turkey Hill Elementary School. In July 2020, Encore Contracting Services for \$93,836.25 removed spray-on fire proofing above the ceiling in room 102, 113 and 114. This project included removal of the splined ceiling and the floor tiles in those areas. This project was the final phase at Turkey Hill Elementary School to abate the spray-on asbestos. The school continues to have vinyl floor tiles with asbestos based mastic in numerous areas. Additional removal are in the capital plan for 4 years from now.

The school department also received funding to begin air conditioning design for Lunenburg Primary School classroom wing. This work was awarded to DiGiorgio Associates for \$10,000.

At the Special Town Meeting during November 2020, funding for split air conditioning systems was approved at \$28,000 to provide air conditioning for the main office, the guidance suite, and nurse's office. This project is expected to be out to bid in February 2021 with work to begin around April 2021.

Respectfully submitted,

John Londa
Director of Facilities and Grounds

Technology Department 2020-2021

Technology touches all our lives every day at the Lunenburg Public Schools. It is our aim in IT to serve our students, faculty and staff proactively, so that the tools used to facilitate learning function seamlessly and responsively when needed. From checking email, to accessing class information, to connecting and collaborating with students and colleagues near and far, faculty, staff, and IT are working together to help redefine what is possible for our students, so they can redefine what's possible for the world.

As we reflect on this last year, to say 2020 has been challenging would be an understatement. With the arrival of the coronavirus in the spring, all our IT priorities shifted to an intense focus on responding to this emergency and how best to support the district moving to remote teaching, learning and working almost overnight while still maintaining our core services. This report provides information on the Technology Team, as well as some highlights of the work we have done in response to COVID-19.

The IT Team

Our team continues to learn and grow each year as we improve our infrastructure and explore innovations in education technology.

Steve Malandrinos – Information Technology Director

Eight years working for the Town and Schools
Previously an engineer at Cisco Systems, IT Director for the Town of Belchertown, MA and
Belchertown Public Schools

Jordan Pochini – School Technology Coordinator

- Six years working for the Town and Schools
 - BS in Computer Science from Fitchburg State University
- Prior experience includes both individual contributor and management roles in retail environments

Heather Buiwit – Technology Assistant

MBA in General Business from Nichols College, Dudley, MA

Previously worked for the Lunenburg Public Library assisting with technology

Transitioning to remote teaching, learning and working required not just a shift in practice, but new equipment and technology infrastructure to support a completely new model of instruction. While we were able to provide devices to those students most in need for the end of the 2019-2020 school year, additional student devices and updated teacher devices were needed to move effectively into the remote model – especially to support synchronous teaching or ‘live streaming’ of classes. Drawing on grant funding sources, as well as local funds where needed, several large technology purchases were placed throughout the year.

Over the summer, orders of Chromebooks and iPads were placed in sufficient quantity to put a device in the hands of every Lunenburg student. Configuration and deployment was definitely a challenge for our small team, but with help from district and building administration, we were able to set up outdoor pick-up sites to safely put the devices into families’ hands.

Later in the year, when it became clear that the live streaming model of teaching would be adopted, grant funding was used to purchase updated laptops, monitors, and additional peripherals for teachers to facilitate this new mode of instruction.

A demo classroom was set up at each school, and training sessions were held over the course of a few weeks to give teachers a chance to see the equipment in action and discuss scenarios for effectively employing it. Training sessions were well attended and lively, often resulting in classroom visits to experiment with different configurations and answer individual questions.

To support the new network traffic associated with live stream video conferencing, upgraded internet connections were needed at Lunenburg Primary School and Turkey Hill Elementary School. Fiber optic lines were run to each building, and new service came online mid-January, increasing bandwidth from 100Mbps download, 20Mbps upload to 300Mbps download and upload.

We don't know exactly what the future will hold for 2021, but there are signs of hope with vaccines and outdoor weather on the way. One thing I do know is that the way we work and teach will forever be changed by this experience, and technology is the key to supporting this shift. Lunenburg IT continues to adjust its priorities to do all we can to support the district's evolving academic plans, and to support teaching and learning as we navigate these uncharted waters.

Respectfully Submitted,

Steve Malandrinos, IT Director

Special Services Department

FY20 (data taken from 2019-2020 school year)

From the March 1, 2020 report (SIMS Report 5-Enrollment Statistics – District Summary), there are 257 students with disabilities receiving special education or related services in Lunenburg (last year there were 263). This represents 15.5% of our total student population of 1,659 students (it was 15.8% last year). The state average from the 2019-20 Selected Populations Report (<https://profiles.doe.mass.edu/statereport/selectedpopulations.aspx>) is 18.4%. From the March 1, 2020 report (SIMS Report 7-SPED Enrollment Statistics – District Summary), the total number of students receiving services outside the district was 11 (last year was 12). Of the 11 students, 3 are placed in Collaborative Placements, 3 are in Day Placements and 5 are in Residential Placements. Our Advanced Community Experience Program (ACE), which serves students ages 18-22 years old, had 3 students enrolled last year. Additionally, from the March 1, 2020 report, 111 students identified with a disability received accommodations via 504 plans in Lunenburg (last year was 138).

For the 2020 school year, our overall classification is NOT REQUIRING ASSISTANCE OR INTERVENTION as we are making substantial progress toward targets. Our progress toward improvement targets is listed at 55% - substantial progress toward targets. The data below is from last school year as the Massachusetts Department of Elementary and Secondary Education did not issue school, district, or state accountability determinations for the 2019-20 school year due to the cancellation of state assessments and school closures related to COVID-19.

For the 2019 school year, as a district, our overall Accountability and Assistance Level is NOT REQUIRING ASSISTANCE OR INTERVENTION with the Primary School (Insufficient data), Turkey Hill Elementary School (Not requiring assistance or intervention), Lunenburg Middle School (Not requiring assistance or intervention), Lunenburg High School (Not requiring assistance or intervention) and the Advanced Community Experience Program (Insufficient data). The 2019 Official Accountability Report classifies “High Needs” students in Lunenburg as “Moderate progress towards targets” in their overall progress toward improvement targets. Participation rates in MCAS **this year were as follows: High Needs = 99%, Econ. Disadvantaged = 99%, EL and Former EL = 100%, and Students w/disabilities = 100%. This data can be found at the DESE website:**

<http://profiles.doe.mass.edu/accountability/report/district.aspx?linkid=30&orgcode=01620000&orgtypecode=5&>

Other data collected throughout the year is also important to consider when looking at the whole Special Services Department. DESE requires us to collect data for certain Indicators they are targeting each year. For our Indicators, the following information is available below and also can be found at:

http://profiles.doe.mass.edu/gis/sped_map.aspx?orgcode=01620000&

Indicator 1 – Graduation Rate. For the 2018-2019 school year, the state target for Students with IEPs was 72.4% (was 88.0% last year). Lunenburg's rate was 82.1% (was 62.5% last year) and the overall state rate was 73.8% (was 72.2% last year) for Students with IEPs.

Indicator 2 – Dropout Rate. For the 2018-2019 school year, the state target for Students with IEPs was 1.7% (was 2.1% last year). Lunenburg rate for Students with IEPs was 2.3% (it was 2.0% last year) and the overall state rate was 3.3% (was 2.5% last year).

Indicator 3C – Proficiency Rate for Students with IEPs on MCAS. For the 2019 MCAS, Lunenburg Students with Disabilities SS ratings were as follows:

Grade 3 – Reading:	Lunenburg = 488.3	State = 486.4
Grade 3 – Mathematics:	Lunenburg = 491.2	State = 480.7
Grade 4 – Reading:	Lunenburg = 474.6	State = 484.3
Grade 4 – Mathematics:	Lunenburg = 476.7	State = 480.3
Grade 5 – ELA:	Lunenburg = 479.7	State = 482.6
Grade 5 – Mathematics:	Lunenburg = 467.2	State = 480.2
Grade 6 – ELA:	Lunenburg = 474.1	State = 477.9
Grade 6 – Mathematics:	Lunenburg = 482.8	State = 480.4
Grade 7 – ELA:	Lunenburg = 476.3	State = 478.0
Grade 7 – Mathematics:	Lunenburg = 474.6	State = 477.3
Grade 8 – ELA:	Lunenburg = 474.0	State = 477.3
Grade 8 – Mathematics:	Lunenburg = 478.8	State = 478.2
Grade 10–ELA:	Lunenburg = 484.5	State = 486.2
Grade 10–Mathematics:	Lunenburg = 481.3	State = 483.8

For the 2019 MCAS, Lunenburg Students with Disabilities SGP ratings were as follows:

Grades 3-8 - ELA:	Lunenburg = 40.0	State = 44.4
Grades 3-8 - Mathematics:	Lunenburg = 40.4	State = 45.0

For the 2019 MCAS, Lunenburg Students with Disabilities CPI rating was as follows:

Grade 10 – Sci/Tech/Eng:	Lunenburg = 85.0	State = 72.5
--------------------------	------------------	--------------

Indicator 4 – Suspension (more than 10 days)/Expulsion for Students with IEPs. For Lunenburg, our rate was 0.4% (last year it was 0%). The state rate was .6%. Additionally, Indicator 4B records significant discrepancies with the Suspension/Expulsion rates by race or ethnicity. In 2019, Lunenburg was not found to have any significant discrepancies due to these factors.

Indicator 5 - Educational Environments for Students Aged 6-21 with IEPs. For 2018-2019, the state's rates are as follows: for Full Inclusion of students = 65.6%, Partial Inclusion = 14.4%, Substantially Separate Placements = 13.3%, and for Separate Schools/Residential Facilities/Homebound/Hospitals = 6.6%. In Lunenburg, our percentages are as follows: Full Inclusion = 67.7%, Partial = 13.7%, Substantially Separate = 9.7% and Separate schools, Residential, etc = 8.8%.

Indicator 6 – Educational Environments for Students Aged 3-5 with IEPs. The 2018-2019 state rates showed the percent of students receiving a majority of their special education and related services in a Full Inclusion early childhood program was 54.8%, in a Partial Inclusion Program was 18.6%, a Substantially Separate Placement (special education class, separate school, or residential facility) was 16.2%, and students not attending an early childhood program but receiving only a related service (e.g. speech, OT, PT) was 10.5%. In Lunenburg, our early childhood Full Inclusion rate was 34.0%, our Partial Inclusion rate was 15.1%, Substantially Separate rate was 26.4%, and Related Services was 24.5%.

Indicator 7 – Early Childhood Outcomes. Districts participate in Indicator 7 data collection as part of a 4 year cycle in which they report exit data on children for whom they have collected entry level data; exit may occur at any time during the subsequent three year period as the children leave the preschool program. Lunenburg did not have a cohort completion year in 2018-2019.

Indicator 8 – Parent Involvement. This indicator measures the % of parents with a child receiving special education who report that school facilitated parent involvement as a means of improving services and results for students with IEPs. For 2018-2019 the state target was 86.5%. Lunenburg's rate was 57.1% and the state's rate was 60.1% (from information collected in the spring of 2019).

Indicator 9 & 10 - Both of these Indicators deal with Disproportionality in Special Education and in Special Education Categories. In Lunenburg, the state determined that there was no disproportionality found in either case.

Indicator 11 – Initial Evaluation Timelines. This indicator measures the % of children with parental consent to evaluate, who were evaluated within the State established timeline. Data is reported for all initial evaluations initiated in October, November, and December of the reporting year. Lunenburg was rated 90% in compliance and the state average for this Indicator was 100%.

Indicator 12 – Early Childhood Transition. This indicator measures the % of children referred by Part C, found eligible for special education services, and who have an IEP developed and implemented by their third birthdays. The state target for this indicator is 100% and Lunenburg is noted as "Suppressed". Data is suppressed if the number of students referred by Part C and found eligible for special education services is fewer than 10.

Indicator 13 – Secondary Transition. In all years, the state target for Secondary Transition is 100%. This indicator measures the % of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. Lunenburg was last reviewed in this area in 2017-2018 and was 83.3% in compliance.

Indicator 14 – Post-School Outcomes for Students with IEPs. This indicator measures the % of students with IEPs who exited high school during the 2017-2018 school year and self-reported post-school engagement in education or employment one year after leaving high school. Engagement is defined through three measurements:

- Measurement A: Enrolled in higher education within one year of leaving high school.

- Measurement B: Enrolled in higher education or competitively employed within one year of leaving high school.
- Measurement C: Enrolled in higher education, or in some other postsecondary education or training program; or competitively employed, or in some other employment within one year of leaving high school.

Measurements are cumulative with Measurement C reflecting the total number of exiters engaged in a post-secondary activity one year after leaving high school. For the 2018-2019 school year, state targets for the three measurements of Post-School Outcomes are Measurement A: 50.2%; Measurement B: 79.6%; and Measurement C: 87.3%. Lunenburg rates are as follows (from reporting year 2018-19): Measurement A = 50%, Measurement B = 75%, and Measurement C = 75%.

The Parent Advisory Council Supporting All Learners (PACSAL) continues to be an active support group for parents, teachers and administration. All parents and community members can join the group, which currently consists of parents of students receiving Title I services and parents of students with disabilities. Meetings are typically held the first Friday of each month, 11:00AM, in the Planning Room at the Middle School (for the 2020-2021 school year, meetings were held via Zoom due to Covid-19). The executive board is made up of Co-Chairpersons: Kelly Harvey and Liz Otero. Several events and presentations were organized by the PACSAL for both parents and teachers in Lunenburg this year. For more information, go to:

<https://sites.google.com/a/lunenburgschools.net/lps/special-services/pacsal?authuser=0>

In addition to the district PACSAL, Lunenburg also participates in a Regional SEPAC group. Information from this group is shared on Facebook at “Regional SEPAC – Central MA”

The Lunenburg Public Schools continues to provide a variety of special needs services to meet the varying needs of our students in the least restrictive environment. We have an experienced, hard working staff that works together with parents to provide these varied services. Our parents are equal partners in our efforts to develop challenging and focused educational programs for children. We remain committed to the Lunenburg Public Schools mission, “The mission of the Lunenburg Public Schools is to provide all students with the skills, confidence, and passion for life-long learning so that they may find their own paths to successful careers, active citizenship, and rewarding lives.” This mission, we feel, was even able to be upheld during the unfortunate school closings due to the pandemic this year from March - June 2020. During this time, special education services were still able to be delivered to students remotely and all DESE recommendations and protocols were put into place and followed in order to meet the needs of IEPs as best as possible. In addition, the Special Services Office also created a specific parent centered page called “Covid-19 Information” that worked to help keep parents as updated as possible on all the current pandemic concerns related to students with disabilities

<https://sites.google.com/a/lunenburgschools.net/lps/special-services/covid-19-information?authuser=0>

We are proud of our staff, students, and families and their resiliency during this time and how they came together to work under very stressful times. For additional information, please visit our website at:

<https://sites.google.com/a/lunenburgschools.net/lps/special-services>

or contact Julianna Hanscom, Director of Special Services, Special Services Office, 1025 Massachusetts Ave, (978) 582-4100, ext. 305.

Respectfully Submitted,

Julianna Hanscom, Director of Special Services

Teaching & Learning Models and PD Update

2020-2021

Lunenburg Public School's Instructional Leadership Team and the Reopening Team's Teaching and Learning Task Group developed multiple teaching and learning models for the 2020-2021 school year. Upon return to school in the fall, students had a choice to return to a hybrid model of learning or remain in a fully remote learning model.

Hybrid & Remote Learning Models

In our hybrid learning model, approximately 50% of students in the model attend school in person on Tuesdays and Thursdays while learning remotely the other days of the week, and the other 50% attend in person on Wednesdays and Fridays while learning remotely the other days of the week. High needs students are prioritized for in-person learning four days per week. Mondays are a remote learning day for all students during which students meet virtually with teachers during a portion of the day and complete independent work for the remainder. This allows for classroom configurations to be altered for social distancing.

A percentage of Lunenburg students chose to remain in a fully remote learning model. Specific teachers at each grade level have been assigned to fully remote classes which students attend virtually through Google Meet and which include a combination of synchronous and asynchronous learning experiences. At Lunenburg High School, some remote students are enrolled in select virtual education classes through Educere.

All students in the district were provided with 1:1 devices, Chromebooks for students in grades 3-12 and iPads for students in PreK-2.

Our teachers have worked diligently to create welcoming physical and virtual classrooms and to provide robust and rigorous learning and social emotional experiences for students in an environment where digitizing and reimagining curriculum is essential but extremely challenging. All teachers use Google Classroom as a learning management system in order to post assignments, announcements, instructions, videos, presentations, links to virtual meetings through Google Meet, and other instructional materials and tools. Some of the instructional and assessment platforms employed by teachers include district-purchased subscriptions to iReady, Lexia, IXL, Newsela, Brainpop, Raz-Kids, and Nearpod. In addition, teachers are using Google Workplace elements such as Docs, Slides, Sheets, Sites, Forms, and Jamboard to design and implement lessons in addition to other tools and resources such as Khan Academy, EdPuzzle, Kahoot, CommonLit, Gimkit, and Flipgrid to name a few. Many teachers have also recorded lessons or read alouds with Meet and Screencastify to provide students with additional personalized instruction.

Collaboration has been essential for this dramatic shift in teaching as teams of teachers consistently work together to create materials, plan lessons, engage students, and design curriculum for optimum learning outcomes for students.

Live streaming

In January 2021, our hybrid model changed to incorporate live streaming so that students in the remote cohort on Tuesday-Thursday join the in-person cohort for class as one community. Live streaming was piloted by select high school classes during the fall and by our 8th grade teachers in December, 2020, and best practices were shared with colleagues during professional development and multiple question and answer sessions. In preparation for live streaming throughout the district, teachers were provided with new laptops, a second monitor, microphones/speakers, docking stations, and tablets.

Students now experience synchronous instruction and learning each school day as each building has designed developmentally appropriate schedules. Already, students have gained live instruction time, participated in whole-class discussions, and partnered with members of the opposite cohort on collaborative documents and in breakout rooms. Teachers continue to refine and adjust practices in order to negotiate technology, engage students, encourage collaboration and discussion, and strengthen learning.

Professional Development & Training

Our district has provided professional development and training sessions throughout the school year in order to support teachers with these learning models and to prepare for live streaming. District staff participated in professional development during the opening 10 days of school which included professional learning in the areas of social emotional learning, preparing for hybrid and remote learning models, safety training, literacy planning, creating a safe and supportive school environment, reviewing social justice standards, and Response to Intervention. We also offered 20 choices of technology training sessions led by experienced district staff, including sessions on Google Classroom and Meet, interactive notebooks, EdPuzzle, Google Sites for student portfolios, Nearpod, choice boards, bitmoji classrooms, using document cameras, and iMovie. Formal training on purchased instructional platforms, iReady and IXL, was also offered to the district.

A cross-district professional development day was held on November 3rd in collaboration with North Middlesex Regional School District. Our keynote speaker, Lynn Lyons, presented, “Teaching in a Time of Uncertainty: The Emotional Skills Our Kids Need and the Patterns to Target.” Lynn also offered secondary and elementary seminars on approaches to anxiety, worry, and depression. A variety of professional learning sessions were offered including multiple technology sessions, special interest groups, and sessions on educator self-care, mindfulness, engagement strategies, fostering mentoring relationships, best teaching practices, supporting transgender and binary students, creating virtual bookrooms, and trauma response. Staff had the choice as to which learning best suited their needs.

In preparation for the shift to live streaming, we held four half PD days during which tech demo rooms were available for teachers in each building and live streaming training was offered in addition to tech tools and Q&A sessions.

Data sessions with iReady have been ongoing this year, and PD for responding to data, reading and writing workshops, phonics, and phonological awareness will also continue.

Our Professional Development Committee will proceed to check-in with the district to evaluate needs and prepare for upcoming professional learning including future book studies and workshops.

Respectfully Submitted,

Annica Scott

Interim Director of Teaching & Learning

Title I and Literacy Update

2020-2021

A comprehensive assessment of Title I and Literacy in grades K-5 conducted in July 2020 revealed many strengths and some areas for improvement particularly in light of new considerations caused by the pandemic. The need for clarity and communication of standards that needed reinforcement at the start of the new school year; a well articulated and communicated scope and sequence of standards for the 2020-2021 school year; reliable, vertically aligned assessments that provide real-time and actionable information for teachers; and print and digital resources to support the standards and student needs identified were the key areas that educators focused on to assure robust implementation and learning for all students.

In the area of Title I services the following actions were taken and will continue to be a focus for deep implementation throughout the remainder of the 2020-2021 school year.

- identify and set expectations for the use of resources (human and curricula) as additional support for identified students
- hire highly qualified Title I staff- 3 tutors to join a paraprofessional and Reading Specialist
- acquire and support the effective use of an assessment system as a component of eligibility and to monitor student progress including PD provided by iReady to implement the system and respond to results through changes in instruction.
- ensure that all identified students have equitable access to instructional time with Title I staff through master scheduling and refreshed selection criteria informed by Title I federal guidelines
- acquire and support the consistent implementation of instructional resources for Title I intervention (LLI, iReady, Lexia)
- acquire and support the effective use of an instructional platform for Title I intervention (iReady, Lexia)
- provide training, coaching, modeling for Title I staff in pedagogy and programming-phonemic awareness, Leveled Literacy Intervention, Developmental Reading Inventory, iReady, Lexia
- Title I presentations delivered synchronously and asynchronously during curriculum nights, school committee meeting, SEPAC meeting, and School Council Meetings

In Literacy, the following actions were taken and will continue to be a focus for deep implementation throughout the remainder of the 2020-2021 school year.

- concerted, collaborative effort to implement a cohesive reading and writing program with fidelity so that every child has access to core resources and pedagogy every day achieved through vertically articulated scope and sequence in reading and writing, continuous acquisition and evaluation of print and digital resources to support the scope and sequence, and collaborative grade level and vertical planning
- consistent use of assessments and collection and use of data to adjust and plan instruction and monitor student growth and achievement
- evidence based universal screeners through the acquisition of iReady diagnostic assessment to identify student needs, students who are potentially at risk for reading failure, including those who may have developmental reading disabilities, and as a component for determining Title I eligibility.

Upcoming activities to support Title I and Literacy actions for continuous improvement

- Continued PD Grades K-5 for responding to data
- Continued PD for grade 2 in reading and writing workshop
- Continued PD for grades K and 1 in phonics
- Implementation of early childhood grant with procurement of phonological awareness curriculum for grades PreK and K with professional development and coaching'
- Supporting family engagement with the relaunch of Footsteps to Brilliance application with PD for families in February and April and summer reading launch in June.

Eating a healthy breakfast before starting the school day is linked to improved concentration. Breakfast is especially important for young students whose brains use up about half of the body's energy. Eating lunch is important because it provides nourishment to the body and brain and reduces stress. Therefore, in the spring of 2020 when the COVID-19 pandemic began, we knew we had to get meals to children somehow. We quickly devised a plan, set up a curbside grab and go meal site. With the help of the nursing and central office staff, we delivered meals to families that could not get to us. In April 2020, we could only provide meals to families that qualified for meal benefits through the National School Lunch Program (NSLP). By May 2020, the United States Department of Agriculture (USDA) Food and Nutrition Service (FNS) approved a request by the Department of Elementary and Secondary Education (DESE) to allow school food authorities flexibility while continuing to feed children. We applied for waivers and were able provide meals to all children 18 and under at no cost to families but allowing our program reimbursement for each meal served. As of December 23 2020, we have distributed 31,636 meals to children and teens 18 and under.

Dalia Marzuca, Zack Welton and Valerie Martin resigned from their position to pursue different options. We wish them luck in their new endeavors.

Respectfully Submitted,
Nadine Lorenzen, Food Service Director

LUNENBURG PRIMARY SCHOOL 2020-2021

The Lunenburg Primary School is an early childhood education center for students in preschool to second grade. Our students range from three years old to eight years old. Our school community consists of students, teachers, parents and support staff working together to maintain a learning environment that focuses on the academic and social emotional needs of the whole child.

The October 1, 2020 student enrollment reported to the Department of Elementary and Secondary Education was 363 students. The following grade level class sizes reflect the adjustment to the Hybrid reopening model following the guidelines from the Department of Elementary and Secondary Education and the Center for Disease Control.

Currently, our Preschool program services 36 three and four year old students in two classrooms with multiple sessions. We have six Kindergarten classes servicing 106 students. Class sizes in our in-person Kindergartens range from 14-16 and are broken into two cohorts of 7-9 students. The full remote Kindergarten class has 33 students. There are four in person first grade classrooms with class sizes ranging between 21-25 and are broken into two cohorts of 10-13 students. Our Full remote first grade classroom has 18 students. We have five in person second grade classrooms that serve 135 students with class sizes averaging 22 -24 students broken into two cohorts of 10-14 students. Our full remote second grade classroom has 31 students.

The COVID -19 Pandemic changed the context in which the Primary School provides instruction to the student population that it serves. Consideration for the safety and welfare of students and staff became part of our usual overall planning process. Guidelines for physical distancing, wearing masks and sanitizing were at the forefront of any planning. Staff collaborated on developing protocols for classroom routines, hallway transitions, arrival and dismissal procedures, changes to traditional recess practices, and the distribution of needed instructional materials. Virtual meetings have become the norm for staff meetings, common planning meetings, professional development remote cohort student instruction, IEP, 504, and parent meetings. Communication to families and the community have also used virtual platforms. Parent forums or surveys to solicit feedback on the school's performance have also become part of our routine.

Professional development continues to focus on literacy instruction this year. Working with the district's Title I Coordinator we identified, and secured additional units of study from Lucy Calkins' Reading and Writing Workshop model that would be beneficial for staff at all grade levels to continue their work with regard to literacy instruction. The goal is to prepare students for any reading and writing task they will face and to turn kids into life-long, confident readers and writers who display agency and independence.

Additional professional development focusing on technology, instructional software and their use in instruction became a priority. Providing instructional opportunities for students in person and remotely required additional technologies including, document cameras and additional monitors. Google Classroom has taken the place of teacher webpages as the main platform providing information, assignments and resources for students and their families. Instructional programs such as IXL, RAZ kids, Epic have become additional tools for teachers to use to assist with student support and growth. We have adopted a new diagnostic tool that is used to assess student growth throughout the year. The iReady diagnostic assessment tool provides student performance and growth data. It provides an additional data point that is used to provide instruction and support for students.

Building Culture and Climate continues to be of the utmost importance during this school year. The staff has made great efforts to include traditional activities for students while being mindful of the necessary safety protocols. Our staff works to maintain a school culture which is positive, inclusive, and supportive. Through the continued use of Positive Behavior Intervention and Supports (PBIS). Positive Behavioral Interventions and Supports (PBIS) is an evidence-based three-tiered framework for improving and integrating all of the data, systems, and practices affecting student outcomes every day. We have worked on establishing and teaching the school wide expectations along with having a continuum of encouraging expected behavior and discouraging problem behaviors. This system is aligning nicely with The Anchors of Emotional Intelligence, a whole-school/district-wide approach to teaching social emotional learning, which the staff has been trained in and is using to help students recognize, understand, describe, communicate and regulate their emotions. These approaches have been supplemented by the creation of the Behavioral Health Support Team (BHST) which provides tiered support strategies for students behavioral and mental health.

The Primary School is a Title One school and we have continued our tiered instructional system to ensure that all students have the services they need to be successful. Common assessments are completed in the fall, winter, and spring for all children in grades K-2 in the areas of reading, writing, and math. These common assessments serve to monitor the effectiveness of teacher instruction and the progress of students. Struggling students are identified for additional support in Reading, Math, Speech, Occupational and Physical Therapy through our TST (Teacher Support Team) process.

The Primary School Advisory Council meets each month to discuss school related concerns. Serving as an advisory group to the principal, the council is charged with reviewing the school building budget and developing the school improvement plan.

Members of the School Advisory Council for the 2020-2021 school year are:

Principal:	Chad Adams
Assistant Principal	Kevin White
Teachers:	Sara Doyle, Kathryn Gerrior, Kara Slattery, Kirsten Snape
Parents:	Tiffany Tavares, Shaunna Baril, Meghan Arnold
Community Representative:	Vacant
School Committee Rep:	Laura Kelly

I am honored and humbled to be afforded the opportunity to work with a highly dedicated staff and a caring community in order to provide the best possible educational opportunities for our youngest students. For more information about the work that we do at the Lunenburg Primary School please visit our website: <https://sites.google.com/a/lunenburgschools.net/primary/>

Respectfully submitted,

Turkey Hill Elementary School

2020-2021

The challenges of 2020 were monumental across the world, COVID-19 an unprecedented calamity with profound effects for the world's population. No school in the United States was untouched. The pandemic brought with it sweeping changes, some positive, others difficult, but our school community, like our country, will never be quite the same.

Turkey Hill Elementary School is in its fourth year as a grade 3-5 building. There are currently 344 students, with 111 third graders, 108 fourth graders, and 125 fifth graders. We employ 25 teachers, 100% of whom are licensed in their assignment area. Our special areas include physical education, art, music, technology/library and social emotional learning. We are fortunate to have a half time assistant principal, a full time nurse, a psychologist, BCBA, and a part time adjustment counselor/social worker. Other support personnel who work across the district include two EL teachers, a speech and language pathologist, OT, and PT.

January and February of 2020 were unremarkable: the annual TIGER anti-bullying presentation for grades 3 and 4, professional development in the Calkins Units for reading teachers, EMOTE pilot training (a program that tracks student behavior), formative assessments for teacher evaluation, TST (teacher support team) meetings and learning walks for administrators. The calm before the storm.

On a Friday afternoon in mid-March we were called together in an emergency meeting to grapple with news about COVID-19. After hours of discussion and searching for the best information at hand, we made the decision to close the schools for two weeks. It was a difficult call, but we understood we were working in the best interests of our community to keep kids safe. That started us down a road to fully remote learning right through June, a reality no one anticipated. Our teachers had a single day, the following Monday, to gather their materials, laptops, teacher's guides, plan books, whatever they felt necessary. In a remarkably short amount of time they created Google Classrooms and invited their students to it. We were hampered by the fact that not every student had equitable access to computers and internet capacity. We followed the state guidelines to provide enrichment work; we encouraged students to participate and learn, but in the absence of accountability or grades it was an uphill battle. MCAS testing was canceled, as was the 5th grade graduation ceremony, the field trips, assemblies, and end-of-year field days. Teachers were only allowed to retrieve other items from school via appointments. In an attempt at some semblance of school community, the administration created morning messages with birthday shout outs, question-of-the-day challenges, as well as kid-humor riddles. Teachers were not obliged to "live meet" with students but many did to reassure, answer questions, and provide support. They also worked closely with colleagues to present a grade level set of instructions and expectations for consistency. We embraced the challenges as they presented, and made it through the year amidst community fear, isolation, huge changes in working conditions, childcare issues, and grieving the loss of "live" interactions with students.

Over the summer, the superintendent created a number of committees to plan for fall reopening. We talked through all the scenarios: fully remote, fully in person, hybrid. Ultimately, given the constraints of social distancing we settled on a hybrid model with a fully remote option. That meant we would have no more than half of our students in two days a week, either Tuesday and Thursday or Wednesday and Friday, and Monday became a fully remote day for all students/staff so teachers would have time to collaborate and plan in this new setting. About 100 students (of about 350) opted for fully remote classes. One teacher from each grade level took on that responsibility. The other 250 students were divided into Cohort A or B.

Classrooms were reconfigured to hold 12-13 desks, spread six feet apart. Teachers created buffer zones of six feet at the front of each room to use their white boards. Hand sanitizer was distributed throughout the building, including dispensers at each entrance, and students were obliged to use it upon arrival. Signage was posted that gave students safe places outside the classroom to take a water/mask break, to stay to the right side of the hallway, to line up six feet apart.

It was understood that all students and staff would wear masks in classrooms, and mask breaks each hour were added into schedules. Routes were planned for entering and exiting the building, as well as transitioning to lunch, special areas, and breaks. Outside areas were identified for each cohort and grade where students could safely play. The playground was off limits because of safety concerns. The playground equipment (balls and jump ropes) were put away. Students could bring their own soccer balls but had to commit to hands-free play. Teachers had to reconsider when/how to distribute or collect papers; plastic gloves were distributed to each room to allow children access to classroom libraries. Team teachers and special area teachers sprayed down every desk at every transition.

Individual desk shields were purchased and distributed for small or 1:1 group work. Chromebooks were purchased and distributed at the beginning of the year so that every student had equitable access, and if there were home challenges with the internet, equipment was sent home to create “hot spots”. Boxes of disposable masks and other PPE was distributed, and professional development was provided. Extra headphones were distributed with “safe” plastic covers for the earpieces.

The first ten days of school were dedicated to professional development opportunities for teachers. There were new programs to use, strategies to implement, and obstacles to overcome. They planned how to present to A cohort students while still providing instruction for remote B cohort students. They learned new programs. They prepared for a new normal.

The lunchroom was transformed. Instead of 12 to a table, there are either 2 or 3 to each table, all facing forward, designated and assigned spots, six feet apart. There is no longer a table for condiments or utensils. Every item is in disposable containers and custodians walk around with rolling containers for trash. Students remain seated unless there is a specific reason. At first glance it was difficult to fathom, that lunchrooms which are meant for informal social interaction as much as eating lunch had become such a sterile environment. Remarkably, in the cafeteria and throughout their days, students have adapted and cooperated with the new rigid safety protocols. They are just happy to see each other, and overall enthusiasm about coming to school has never been so universally apparent.

We developed a new arrival and dismissal protocol for car students: in the morning, they entered through a separate entrance as bus riders and in the afternoon they spread out in the cafeteria and waited for their names to be called as their parents pulled in to the driveway. Initially that was a slow moving process, but eventually parents faithfully displayed their rearview mirror name tags for easy identification. Buses were exited two at a time to limit any clustering. Again, all students were prompted to use hand sanitizer when entering the building.

School visitors were infrequent. IEP meetings were held via Zoom, as were first term parent conferences. Faculty meetings and building leadership team meetings were held via computer. Administrative meetings were also remote. Individual conferences between admin and teachers, grade level meetings, and vertical team meetings were held online. The front office door was locked, a startling transformation from a frequent staff check in to a need-based only visit. Strict protocols were implemented for anyone at the front door, including “can I help you?” before the door was opened.

In December we were excited to receive the necessary means to reinvent the hybrid model. Every teacher received a large monitor to interact with remote students, a microphone/speaker that allowed remote students to hear both the teacher and the other students, a docking station, and a tablet that allows the teacher to “write” on the presentation screen. They started to prepare to move to a fully live stream model for term three in late January of 2021.

Another significant change has been the introduction of iReady, an evidence based reading and math diagnostic with learning platforms. All students participated in the initial assessment in October and it provided valuable information as to the strengths and areas for improvement for each student.

We were able to purchase the reading platform, which is individualized to support every child's growth. The ideal time spent is 45 minutes weekly and in November and December we acknowledged and celebrated students who put in the effort to meet that expectations; the same occurred for math work in the IXL platform. iReady offers a level of data detail we have previously not been able to access, right down to students' mastery of individual standards. It is meant to inform instruction for teachers, allowing them to focus on areas of concern, as well as providing challenging work for students who excel.

With the fortunate addition of a literacy specialist/Title 1 coordinator, we have been able to provide small group instruction for student's at all three grade levels in both math and ELA. This is a hugely important benefit to our school, to target specific areas for improvement and provide that service. Our coordinator has hired on three tutors who consistently meet with kids on their off cohort days and work with them. She has also provided several professional development opportunities for staff on iReady: how to analyze, interpret and use the data it provides. We have also received extensive support from our interim director of teaching and learning. She works closely with our literacy specialists for the iReady support and has organized extensive pd on a long list of teaching tools, including Epic, Nearpod, Google classroom, Footsteps to Brilliance, Newsela, Jamboard, Kahoot, and Padlet. She is a frequent visitor to classrooms to provide individualized support for teachers. She organizes our vertical team meetings to document productivity. She organizes the monthly feedback from staff, students, and parents to help administration analyze and respond to the trends. Both professionals ensure that our curriculum is evidence based, research driven, and aligned to our state standards. Our journey to improve literacy and math skills for all students have wonderful new navigators.

It's been a steep learning curve for our staff and students this year to integrate the technology into learning, but we acknowledge that it has forced us to move forward to a "connected" level that enhances educational opportunities. We have all been swept into 21st century teaching and forever gone are the days of overhead projectors, reams of worksheets and kids missing school unnecessarily. While we anticipate the hope of being mask free, of offering a high five or even a hug without repercussion, of sitting close to friends or playing on the slide and swing set again, we also embrace the 1:1 student to Chromebook capacity and all that comes with that. We will all continue to use hand sanitizer consistently and maybe stay home unhesitatingly when we're not feeling good. But, we can also connect to each other despite snow storms, doctor's appointments, or having to quarantine. 2021 holds promise.

Respectfully Submitted,

Heidi Champagne, Principal

Lunenburg Middle School

February 2021

Lunenburg Middle School provides a rigorous academic curriculum as well as strong programs that support students' social and emotional growth. These programs ensure that each child becomes a self-motivated, creative, lifelong learner in a safe, stimulating environment that encourages diversity and open honest communication. The dedicated and accomplished staff of professionals within the school embraces the philosophy of educating the whole child academically, socially, and emotionally. This philosophy is a means by which all students become positive community members that possess the skills to be successful in high school and beyond.

Lunenburg Middle School is in its fifth year as a co-located middle - high school serving grades six through eight. Effective, student centered middle schools embrace interdisciplinary teams of teachers that enable teachers to work with smaller groups of students. Smaller groups of students allow teachers to learn and engage students in their preferred learning style, making them more confident and successful.

Our effective middle school model is student centered and provides opportunities to explore a variety of different interests and talents through special areas and enrichment classes and extracurricular activities. One of our goals is for students to discover something they are passionate about and want to continue exploring as they move through high school and beyond. We will continue to seek out opportunities for students that foster critical thinking and problem solving skills that prepare them for high school and beyond or where their passion may lead them to.

Hybrid model of instruction

On August 5, 2020, due to the global pandemic, the Lunenburg School Committee voted and approved a hybrid model of instruction for Lunenburg Public Schools for the beginning of the 2020-2021 school year. The hybrid model includes limited, smaller groups of learners in the building at one time and some students learning exclusively from home remotely.

Prior to the students return to school in September, we faced many logistical and educational challenges with the hybrid model of instruction. Classrooms needed to be reorganized to allow students six feet of distance between their peers, and their teachers. Disinfecting protocols and mask mandates were adopted. The cafeteria was redesigned to ensure and how students were seated in accordance with CDC guidelines. Additionally, the food distribution process needed to be changed.

Outside areas were designated for students to take "mask breaks" with their classroom teachers. Space markers were placed in hallways and offices to assist students in keeping six feet apart. School buses also needed to adhere to physical distancing guidelines therefore the number of students allowed to ride the bus to school was greatly reduced.

Students who chose the hybrid model of instruction were divided into "cohorts" or smaller groups of learners that attend in person classes twice a week. Assignments of students into cohorts took district wide coordination as families with children in different schools needed their children attending school on the same day in the same cohort.

The "Zoom" platform of teleconferencing became an essential communication tool. Parent Zoom Drop In meetings were held to inform parents of the changes and guidelines of reopening school. Lunenburg Middle School has held several Zoom meetings for parents.

With students learning both at home and in person, each student now required a Chrome book in order to access learning. All students at LMS were assigned a Chrome book. LMS faculty became skilled at utilizing educational platforms such as Google Classroom and Google Meets.

The district invested in a variety of on line tools and assessments to assist teachers to assess and educate students both in person and remote. Before school opened in the fall, all teachers were provided with ten days of professional development to become more proficient in utilizing the tools necessary for effective hybrid learning.

The social and emotional health of our student population was our top priority when students returned to school in September. LMS put several safety nets in place for students. Child study teams were developed that met frequently to discuss and review any students who were struggling and referred them to our behavioral health support team (BHST). The BHST reviewed students referred to them and offered supports to both the student and their families. Both teams were responsible for tracking students' progress, or lack of progress, to determine what strategies were successful or what other resources we could offer.

In order to support students, LMS also created the position of Engagement Coordinator for the 2020-2021 school year. The Engagement Coordinator assists students who struggle to attend classes regularly or are not completing assignments to the best of their ability. The Engagement Coordinator works with students and their families to identify roadblocks in the student's success and develops an engagement success plan with helpful strategies for students and families.

In early December, Lunenburg Middle School 8th grade teachers piloted "live streaming", a synchronous learning model. Students were now able to engage in face-to-face instruction while at home on remote learning days. Live streaming increased the amount of face time students have with their teachers and assisted with engaging students who were at home with quality instruction. On January 29, Lunenburg Middle School adopted synchronous learning at all grade levels to adhere to the new requirements of the Department of Elementary and Secondary Education of 35 hours of synchronous instruction over a ten day period.

Although the pandemic has forced us to postpone most after school activities, faculty at Lunenburg Middle School worked to offer students virtual access to some after school activities. Yearbook Club and LMS Science Olympiad were able to meet virtually and our Ski Club was still able to participate, without the bus transportation. Some seventh and eighth graders were able to participate in high school athletics like Cross Country and a pandemic version of Indoor Track, held outdoors.

Lunenburg Middle School continues to provide high quality educational services and supports that ensure student success and promote a passion for lifelong learning even during this unprecedented time of a global pandemic. The key components to our success continue to be our talented faculty committed to making a positive impact on students, our parents and community who support our teaching and learning, and most of all, our students who inspire us through their commitment to learning during this difficult time. Together we continue to make the difference in the lives of students.

Respectfully Submitted,

Tim Santry, Principal

Lunenburg High School 2020-2021

Lunenburg High School has been busy with academic and school activities in 2020-2021. This year has been a rollercoaster with all the changes and protocols due to the COVID-19 pandemic. Teachers have provided our students with rigorous coursework and hold our students to high standards. Teachers have worked so hard to completely change how they deliver curriculum during this pandemic. Our students have met these challenges through collaboration, self-advocacy, and a strong work ethic. All students in grades 9-12 have been issued a Chromebook and there are wireless capabilities throughout the building. All teachers are using Google Classroom, numerous online teaching platforms, the interactive projectors, and voice-lift capabilities. Our students are fortunate to be in a building that can meet the needs of the 21st century learner.

During the fall sports season, our students practiced and competed on our fields and artificial turf field. During the fall season, most of our fields were being used from 3:00 pm to 8:00 pm.

The winter season has been very busy, as well. The gym for a large portion of the afternoon and evening is being used by our basketball teams. Additionally, we have the hockey team practicing and competing at: Wallace Civic Center.

NEASC ACCREDITATION

Lunenburg High School has been accredited after going through the NEASC evaluation process. Lunenburg High School is currently working on growth areas and incorporating the graduate profile for the next NEASC accreditation process.

SCHOOL/COMMUNITY PARTNERSHIPS

Throughout the year, Lunenburg High School students are involved in a multitude of fundraising and collection endeavors. Lunenburg High School participated in a canned goods drive to help feed people in need. Around the holiday season, advisories, LEA, STUCO, NHS and numerous other agencies collected items for the Annual Lunenburg Public Schools Secretaries Gift Card Drive. The LEA made a significant contribution to the gift card drive to help families in need. Thank you to all who participated in these very worthy causes.

MCAS RESULTS

We do not have MCAS results this year because MCAS was canceled, by the DESE, due to COVID-19 and the closure.

COMMUNITY BUILDING

National Honor Society successfully supported the “Gift Card Drive” during the holidays, helping to provide joy to needy children and families in conjunction with local agencies. The World Hunger Task Force will be raising money through Penny Wars this spring. The money will be donated toward the fight against hunger.

CURRICULUM

The staff at Lunenburg High School has been outstanding at working through this pandemic. Having to completely change how we educate students. The work they have put in and the dedication to the student body is commendable. The staff have focused professional development in 2020-2021 working on social & emotional health, online learning, vertical teaming, rubrics, the graduate profile, and technology. A large focus of professional development has been on online learning and how to teach students during a global pandemic.

ANNUAL REPORT 2020

129

As I reflected on the 2019-2020 school year, and considered what might be included in the 2020 Annual Report, I was reminded of the progress and accomplishments made by our students and staff, during an incredibly challenging time. While each year at Monty Tech is exciting and includes many “firsts”, traditional instruction ended abruptly in 2019-2020, and students and instructors were forced to turn to technology to watch, learn and collaborate. The all-important hands-on learning was not possible because of the unexpected pandemic, and so for the first time ever, our vocational instructors relied solely on their creativity, their understanding of instructional technology, and their technical skills to carry them through the end of the year. Our academic teachers collaborated to create lessons and assessments that would effectively measure learning in a remote setting, and explored countless apps and platforms to increase engagement. Students who looked forward to events like SkillsUSA competitions, prom and graduation, grappled with disappointment and the unknown, and Guidance Counselors worked diligently to reach out to students who were now more isolated from their peers than ever before. To say 2019-2020 was challenging may be an understatement, but to disregard our progress as an educational community would be a disservice to everyone who worked so hard to serve our students. While the traditional school year may have been abbreviated, so many incredible achievements were recognized in this historic year.

A project more than 7 years in the making, the Monty Tech Veterinary Clinic, opened and began providing affordable veterinary care to pets in need, across our district. Routine wellness care visits, affordable medications and vaccinations, diagnostic services, primary care surgical services, stable urgent care, compassionate end of life care, and dentistry services were delivered by our talented Veterinary Medical Director, Dr. Kayla Sample. Students worked in the new state-of-the-art clinic, learning techniques and gaining knowledge that align with veterinary assistant programs across the Commonwealth. In fact, Becker College has recognized the Monty Tech Veterinary Science program for its rigor and content, and has offered qualified program graduates up to 13 college credits. Further, relying on the school’s trusted model of school-to-business partnerships, a unique collaboration between Monty Tech and VCA has resulted in co-op placements for Seniors in the program.

In August 2019, Monty Tech accepted a \$384,257 award from the Massachusetts Skills Cabinet. This award provided funding to update technology and equipment in two shops: Health Occupations and Automotive Technology. Health Occupations students worked and learned in updated shop facilities, to include new hospital beds and lifts, as well as new diagnostic equipment to train students in the proper procedures for testing for cholesterol, blood sugar, lead, lung volume, and more. In addition, the program received state-of-the-art virtual dissection technology, bringing lessons in anatomy and physiology to new heights. This equipment, provided by Anatomage and most often found on college campuses, immediately engaged students, bringing a deeper level of knowledge and understanding to students as they explored the human body and its complex systems.

Students in the Automotive Technology program were introduced to an all-new simulation lab, that now includes the latest technology in trainers and simulators aligned with NATEF standards. The shop was updated to include new automotive lifts, floor jacks, engine stands, chargers, an air table, and a redesigned tool crib with all new hand tools. Further, in 2019-2020, in partnership with Snap On Tools, instructors rolled out a more sophisticated technical training program and increased opportunities to earn all-new diagnostic credentials, validating their experience and ability to diagnose and service today’s computer-controlled vehicles. With new curriculum, technology and the addition of NC3 Automotive Diagnostic Certifications to the program, our Automotive Technology program graduates will enter a competitive workforce poised for success.

Students who attend Monty Tech have chosen a high school experience unlike any other. While completing all of the same high school requirements of students enrolled in a traditional, comprehensive high school, our students are also learning a valuable trade – skills they will carry with them for a lifetime. In the most challenging times, our students are called upon to demonstrate creativity, innovation and technical skill proficiency, and though face-to-face instruction may have been interrupted, their achievements continued. On behalf of our talented educators and administrators, who remain focused on delivering the highest quality academic and vocational-technical education possible, I am delighted to present the District’s 2019-2020 annual report to you.

Respectfully submitted, Sheila M. Harrity, Ed.D., Superintendent-Director

Our Mission

Every student will graduate from Montachusett Regional Vocational Technical School with the skills, knowledge, and abilities to be a productive and effective member of an ever-changing society.

Our District

Montachusett Regional Vocational Technical School is a four-year career and technical high school serving the member towns of:

Ashburnham	Harvard	Princeton
Ashby	Holden	Royalston
Athol	Hubbardston	Sterling
Barre	Lunenburg	Templeton
Fitchburg	Petersham	Westminster
Gardner	Phillipston	Winchendon

Leadership

The leadership team at Montachusett Regional Vocational Technical School is comprised of ten talented administrators whose varied educational backgrounds, professional experiences, and areas of expertise contribute to the success of the school. Working collaboratively, and under the direction of the Superintendent and Principal, the team has transformed the school into one of the most sought-after high schools in North Central Massachusetts.

Sheila M. Harrity, Superintendent-Director

Tom Browne, Principal

Dayana Carlson, Assistant Principal

Tammy Crockett, Business Manager

Christina Favreau, Director of Academic Programs

Jim Hachey, Director of Vocational Programs

Michael Gormley, Director of Facilities

Donald Kitzmiller, Director of Technology

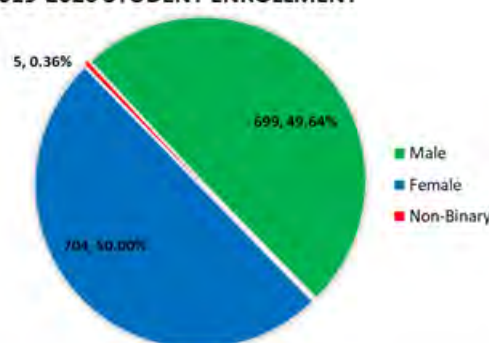

Katy Whitaker, Development Coordinator

Victoria Zarozinski, Director of Student Support Services

Enrollment

On June 1, 2020, student enrollment at Monty Tech included 1,408 students in grades nine through twelve, representing each of the district's eighteen sending communities. Each class of students is comprised of a relatively equal balance of male vs. female students, and each student attending Monty Tech has elected to do so, prepared to explore an interest in one of the school's twenty-one rigorous vocational-technical programs. While the school currently offers only five programs non-traditional for male students, and twelve programs non-traditional for female students, we are proud to have a student population that is well- balanced by gender and a variety of academic interests and achievements.

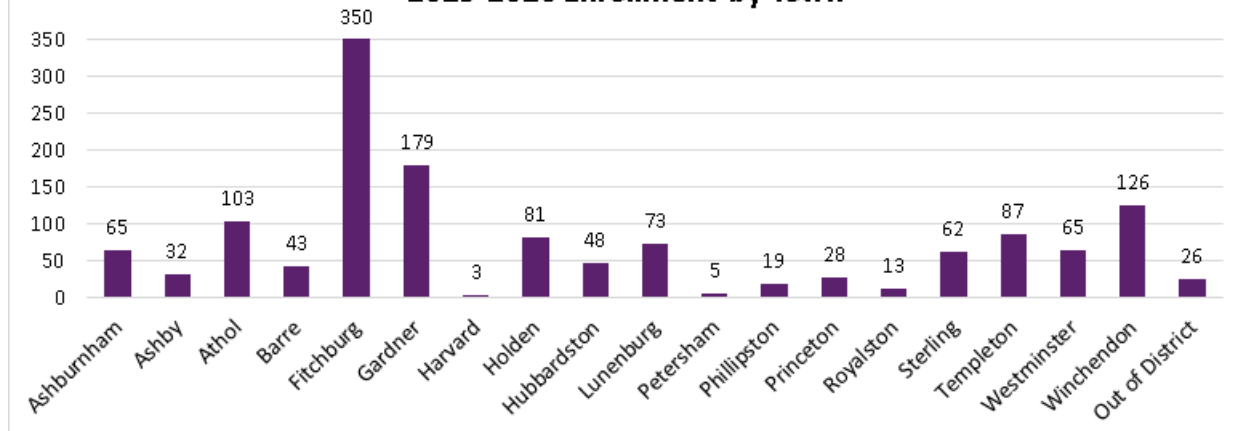

2019-2020 STUDENT ENROLLMENT

Throughout 2019-2020, Monty Tech offered a variety of opportunities for students, parents, and community members to learn about and visit the school. In October 2019, approximately 450 district eighth graders participated in the annual “Tour Day” event. Students toured our twenty-one vocational-technical areas and learned about the school’s challenging academic offerings and exciting athletic and extracurricular programs. Career Awareness Night offered interested students the opportunity to return in the evening with their family members to further explore the facilities and speak with staff members.

The Vocational Interest Program (V.I.P.) offers area seventh and eighth grade students the chance to visit Monty Tech after school and participate in hands-on learning experiences across a variety of vocational-technical areas. While the program continued to attract a large number of students during the Fall and Winter sessions in the 2019-2020 school year, serving 518 area students, the Spring session was cancelled due to the widespread pandemic.

2019-2020 Enrollment by Town

Class of 2020 Awards

Members of the Class of 2020 were awarded approximately \$200,000 in scholarships, tools, and equipment. The Monty Tech Foundation generously provided \$28,000 in scholarships to graduating seniors, ranging in amounts from \$400 to \$2,000. The Foundation also awarded \$3,570 to the Practical Nursing graduates. Once again, local and state organizations, as well as generous individuals, continue to recognize the ability and potential of Monty Tech graduates in the form of financial donations. The School Committee, administration, faculty, and graduates are grateful for this support.

Articulation Agreements with local colleges also play an important role in helping reduce the cost of higher education. Qualified Monty Tech students are eligible to receive college credits through a number of articulation agreements with public and private colleges across the country.

Approximately 31% of the graduating class of 2020 reported plans to enroll at a 4-year college/university upon graduation. By earning college credits while still in high school, these students will save both time and money as they pursue advanced educational programs.

Financial Report

In an effort to develop a cost-effective budget for the fiscal year 2019-2020, a great deal of effort was put forth by the School Committee, administration, and staff. The final fiscal year 2019-2020 Educational Plan totaled \$28,760,202 which represents a 3.62% increase over the 2018-2019 Educational Plan. The District's FY20 budget only exceeds the minimum spending required by Massachusetts General Law Chapter 70 by \$145,657 or .6%.

The District was audited in December 2020 as part of the yearly financial audit by the accounting firm of Melanson, Heath and Co. from Greenfield, MA and expects to receive a good report.

Grants and Contracts

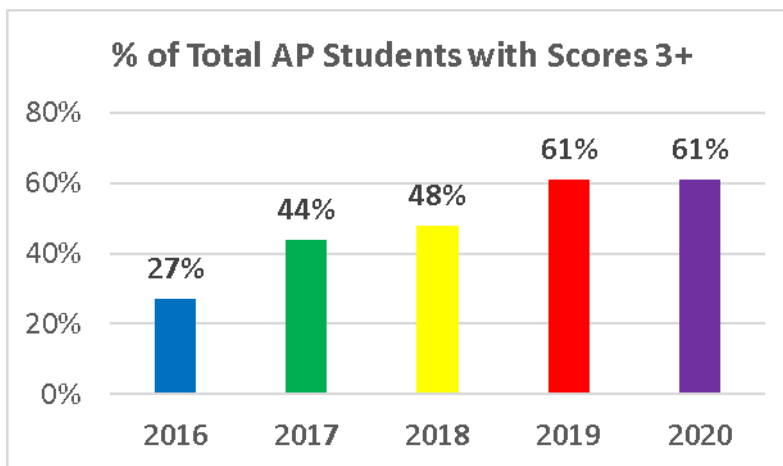

Monty Tech continues to pursue grant funding on an annual basis. These funds help provide many educational and social services to the student population. For fiscal year 2020, state and federal grant sources provided the school with \$978,827. Programs funded by these grants include: Essential Health Services, Improving Teacher Quality, Special Education Services and Program Improvement, Title I Support, Perkins Occupational Education, Student Support and Academic Enrichment and Marine Corp Junior Reserve Officer Training.

Academic Achievement

During the spring of 2020, the administration of the MCAS was postponed due to COVID-19 safety precautions. Last year, Monty Tech's passing rate on the English Language Arts was 99%, Mathematics 97%, Biology 99%. Monty Tech students exceeded the state averages in all 3 subjects. With regard to our Accountability status, Monty Tech made "Substantial Progress Toward Meeting Targets."

Monty Tech is committed to providing students with rigorous STEM learning opportunities, and so in recent years, the curriculum has been expanded to include Advanced Placement Programs (two English courses, two mathematics courses, two science courses, and one computer science course). In addition, teachers have participated in meaningful, high-quality professional development which has enabled us to successfully implement two Project Lead the Way biomedical courses and 2 dual enrollment science courses (Biology and Biotechnology).

During the spring of 2020, students at Montachusett Regional Vocational Technical School continued to demonstrate high academic achievement, earning commendable scores on AP exams. It is important to remember that these exams took place during remote learning. AP exams were modified significantly prior to testing, the testing environment was remote, and teachers may have faced some challenges in planning some of the components of the curriculum (due to COVID-19). Although we are pleased with the results, we are aware that these issues, in addition to potential internal scaling applied by the College Board, may have significantly impacted the final results.

The school is in its 8th year of administering Advanced Placement exams, and students enrolled in AP courses continue to improve their performance.

- In the spring of 2020, 89 out of 146 (61%) exams earned qualifying credit - the highest number of “exams” with qualifying scores we’ve ever had.
- This year, more than half of the students who tested in the following subjects received qualifying scores: AP Literature, AP Language, AP Environmental, AP Chemistry and AP Statistics (5 out of 7 subjects).
- The AP subject with the highest number of students with qualifying scores was AP Literature & Composition with 41 out of 54 students (76%). It was also the AP subject with the most “test takers” with 54 students taking this exam.
- Students who completed the AP Literature, AP Chemistry, and AP Environmental exams exceeded the “state” averages in Massachusetts. In addition, students who completed the AP Literature, AP Language, and AP Environmental exceeded “global” averages.
- Most notably, AP Literature and AP Environmental exceeded both state and global averages.

	Spring 2016 (SY15-16)	Spring 2017 (SY16-17)	Spring 2018 (SY17-18)	Spring 2019 (SY18-19)	Spring 2020 (SY19-20)
MT AP Courses	5	6	7	7	7
MT AP Student Enrollment	188	151	135	157	179
Students with Qualifying Scores	39 (27%)	53 (44%)	46 (48%)	68 (61%)	89 (61%)
AP Test Takers	145	120	95	111	146
Total # of Qualifying Exams	44 (24%)	65 (44%)	58 (43%)	79 (54%)	75 (71%)
Total # of AP Exams	187	148	134	146	106

Vocational Projects in the District Communities

Unlike students in traditional, comprehensive high schools, students at Monty Tech are asked to put their education into practice on a daily basis. Students across the twenty-one different vocational-technical education programs are building homes, reconstructing damaged properties, repairing service vehicles, making walkways more accessible, and performing countless community services. Unfortunately, the widespread pandemic forced a school closure, and vocational instruction was delivered remotely beginning March 2020. In turn, opportunities for hands-on learning were impacted, and cooperative education placements available to students were also restricted, as business partners were unable to sustain full staffing.

Auto Body Collision Repair Technology: The Monty Tech Auto Body program benefitted from much-needed, new instructional equipment in 2019-2020, receiving a new Snap-On Air conditioning machine and a wall-mounted pressure washer, which provided additional floor space. Students were trained with the Pro-Spot M.I.G brazing and aluminum M.I.G.Welder, and all Seniors received their EPA 6 H Certificate, I-Car Pro Level 1 in Refinishing and Non- Structural Repair Certifications. A bridge project was completed in collaboration with Worcester Polytechnic Institute (WPI), and soon thereafter our community service projects were discontinued due to the pandemic. Three Seniors and two Juniors earned co-op placements, and students performed quite well at the SkillsUSA District competition, earning a gold medal in Collision Damage Appraisal, a silver medal in Refinishing, and silver and bronze medals for Collision Repair. (Total student enrollment: 63)

Automotive Technology: The Monty Tech Automotive Technology program was awarded the FY20 Skills Capital Grant, and as a result students and instructors began the 2019-2020 school year in a shop that included a newly designed and outfitted tool crib, five new floor jacks, three new automotive lifts, one air table, five engine stands, three chargers, and an all-new Auto Lab that includes high tech trainers and simulators aligned with NATEF standards. Two additional certification opportunities (digital multimeters and scan tool applications) were made available to students, using the newly purchased Snap-On NC3 certified training equipment. These industry-recognized credentials and the new equipment will enhance our students' level of competency within the automotive industry for years to come. Until the pandemic forced a building closure, students and staff in the Automotive Technology program had worked on or diagnosed more than 200 vehicles. Students performed repairs that included transmission replacements, intake manifolds, brake work, and various other technical repairs, demonstrating technical skills that are required for any service technician in our area. Three Seniors and one Junior earned co-op placements, while instructors continued to utilize e-learning program options to keep the remaining students on track and engaged during the closure. (Total student enrollment: 62)

Business Technology: Monty Tech's Business Technology program continues to benefit from a unique partnership with Workers Credit Union. The opportunity to participate in teller training and financial literacy workshops has been met with great enthusiasm from students, who completed 9 modules and earned a financial literacy certificate. Instructors, in collaboration with their post-secondary colleagues, continue to refine and develop new articulation agreements. The agreement with Mount Wachusett Community College will provide qualified students with college credits at no cost to the student. Students are eligible to receive 24 credits from Mount Wachusett Community College. Opportunities to demonstrate customer service, cash handling, and accounting skills are ever-present as the Business Technology students successfully operate an in-house retail location, The Gear House School Store, and the Monty Tech Greenhouse. Five Seniors and five Juniors were out on co-op placements during the 2019-2020 school year. (Total student enrollment: 71)

Cabinetmaking: Monty Tech Cabinetmaking students are called upon for a number of projects small and large, across the campus and beyond. 2019-2020 was no exception. Students completed projects that include: building a beautiful solid oak cabinet for the Fitchburg Alumni class of 1969, to be presented as a gift to Fitchburg High School's library; designing and using CNC technology to manufacture signage for the Devens Fire Department; and collaborating with Worcester Polytechnic Institute to mill and CNC over 400 pieces of ash to be used for strength testing for their engineering students. Sophomores in the Cabinetmaking program also designed and constructed three hundred fifty 10"x19" sapele charcuterie boards with pocketed cut-outs to accommodate two serving dishes and slate tray. The finished pieces will be used to raise funds for the Student Scholarship Program, supporting the Class of 2021. Eight Seniors and four Juniors earned co-op placements, representing the program so well. (Total student enrollment: 67)

CAD/Drafting & Design: In 2019-2020, the Monty Tech CAD/Drafting & Design program welcomed a new instructor, Jesse Veinotte, whose talents will help guide the Freshmen and Senior experience for years to come. While the school closure certainly curtailed the number of community serve jobs our students were able to complete, the curriculum was easily adapted into an online platform, and students were able to achieve a number of valuable industry-recognized certifications, including AutoCAD, Inventor, Revit, and Solidworks. Twelve students advanced to the SkillsUSA States competition, representing the program well, while two Senior students were proud to earn coveted co-op placements, working at Process Cooling in Leominster, MA and United Plastic Fabricating in North Andover, MA. (Total student enrollment: 61)

Cosmetology: The Monty Tech Cosmetology program is one of the only programs that students may leave and directly enter the industry, fully-licensed and ready for a career. The state-approved program is rigorous and provides students with countless opportunities to refine their cosmetology skills on clientele who understand and appreciate the learning environment. 2019-2020 was an exceptionally busy year for the Monty Tech Cosmetology students, who were compelled to raise funds for a local family in need, and did so by hosting "Staff Nights." Monty Tech staff and their families were invited into the shop for discounted services, and proceeds were donated to support a young girl who tragically lost her father in an accident. Their dedication to community service and "giving back" was a hallmark of the Cosmetology Class of 2020, and a testament to the students who worked so hard and learned so much while in the Monty Tech program. Eighteen students took and passed the Cosmetology State Board exam, and are now prepared for careers in the field. In addition, a total of one nine Seniors earned co-op placements in local salons – more than any year before. (Total student enrollment: 86)

Culinary Arts: In a typical year, Monty Tech Culinary Arts students and instructors operate a full-service restaurant and bakery, serving 90-120 patrons daily. They might also showcase their talents at regional events and fundraisers, working side-by-side with some of the area's finest chefs. But 2019-2020 was no ordinary year. The school's Mountain Room Restaurant closed in March, and all in-person dining/serving experiences were cancelled for the students. Curriculum transitioned from in-person to a virtual platform, which is challenging for the culinary trade, but the instructors did so effectively, seeking meaningful opportunities for their students to continue to develop in their chosen trade. Despite the pandemic, all students successfully earned Allergen Awareness and ServSafe Certifications, which are important credentials to have for any entry-level position in the culinary and hospitality trades. (Total student enrollment: 97)

Dental Assisting: A critical component of the Monty Tech Dental Assisting curriculum is the preparation for the Dental Assisting National Board certification exams. In 2019-2020, all students who sat for both the DANB Infection Control exam and the DANB Radiology exam, passed. This 100% pass rate is a true testament to the high quality instruction in the Monty Tech Dental Assisting program, and something we continue to be so proud of. A total of four students (two Seniors and two Juniors) earned co-op placements, while the remaining Juniors and Seniors participated in affiliation/externship experiences in area dental clinics and offices. Monty Tech Dental Assisting students and instructors also worked closely with local health provider, Community Health Connections, and provided dental services to more than 35 students in need through this beneficial school-based dental hygiene program. This experience provided valuable hands-on experience, as students were called upon to assist the staff from CHC during each dental procedure performed. (Total student enrollment: 60)

Early Childhood Education: Students and instructors in the Monty Tech Early Childhood Education program are committed to community service activities, and the 2019-2020 school year was no exception. Students and instructors raised funds for SkillsUSA Change for Children and held a Sesame Street themed "Baby Show" for the Gardner VNA "Healthy Families" program. Two Juniors and one Senior were out on co-op, gaining valuable experience working with young children, and instructors worked closely with colleagues at Fitchburg State University to develop the program's first-ever articulation agreement between the two institutions. Fitchburg State University will now grant qualified program graduates up to 6 college credits, at no charge, recognizing the work they have completed while enrolled in the Monty Tech Early Childhood Education Program. The Monty Tech Child Care Center continues to operate at full capacity but in a hybrid model, providing meaningful hands-on learning opportunities for all students in the Early Childhood Education program. (Total student enrollment: 60)

Electrical: Throughout 2019-2020, students and instructors in the Electrical program wired numerous machines, equipment, computers, and lights throughout Monty Tech. Students and instructors successfully completed wiring new equipment in the AutoBody Shop, and CAD/ Drafting & Design shop. The students wired the new electronic parking lot gate, and began wiring two homes in Ashburnham, constructed in collaboration with Habitat for Humanity. Unfortunately, when the school closed in March 2020, all hands-on projects for students ceased, so wiring those homes was completed by our instructors, who volunteered their time to do so. Fourteen Seniors and two Juniors earned co-op placements, and continued their work throughout the Spring and into the summer months. The Freshman class was filled with first choice students, which is a credit to the talents of the program's newest instructor, Alex Thibeault. (Total student enrollment: 89)

Engineering Technology: The Engineering Technology program at Monty Tech is a rigorous program, infused with a nationally certified curriculum provided by Project Lead the Way, and countless hands-on learning opportunities that provide students with opportunities to demonstrate creativity, make connections with prior learning, and earn college credits. On October 22, 2019, the school welcomed Lt. Governor Karyn Polito, to celebrate the completion and ribbon cutting of the school's new ARM (Automation, Robotics and Mechatronics) Lab. All Engineering Technology students benefitted from the new technology available in the lab, including three Amatrol tabletop mechatronics learning systems with Pegasus robots, one Fanuc LR Mate 200ID/4S robot, one Festo MPS 203 mechatronics system, and one Stratasys F270 3D printer. All Freshmen completed the OSHA 10-hour General Industry training and certification program, while two Seniors participated in meaningful co-op placements. (Total student enrollment: 57)

Graphic Communications: Throughout the 2019-2020 school year, the students in Monty Tech's Graphic Communications shop produced numerous projects for our district cities and towns, and a variety of non-profit organizations in the district. Due to the COVID-19 pandemic, hands-on learning opportunities were halted in March, so students were unable to complete all community services that were requested. A program highlight for the year was having twelve students earn awards at the Printing Industries of New England's Award of Excellence Gala. Having their talents recognized by industry professionals is not only rewarding to the student, but also validates the efforts of our talented teaching staff. Four Seniors and one Junior pursued and earned co-op placements. Of the twenty-one talented Seniors who graduated from the Graphic Communication program in 2020, all twenty-one were accepted into colleges/universities and eight chose to enter the workforce in related careers. (Total student enrollment: 85)

Health Occupations: The Health Occupations program continues to be one of the more popular programs here at Monty Tech, providing a rigorous education grounded in current medical knowledge and practice. A Skills Capital Grant award provided the program with \$180,246 in additional funding, so during the Summer of 2019, great efforts were made to improve the instructional spaces, and bring in added technology and equipment for student training purposes. In addition to new hospital/nursing home beds, exam tables, EKG machines, geriatric manikins, CPR manikins, stethoscopes, blood pressure and phlebotomy training arms, and five new testing/diagnostic machines, the school was able to purchase the program's first-ever Virtual Dissection Technology. The high-capacity Anatomage table is something most often found on college campuses, but has proven to be an invaluable training device to Monty Tech Health occupations students studying for one of their many certification exams. Every Junior enrolled in the Health Occupations program earned CPR certification; thirteen Juniors received their nursing assistant certificate (only fourteen students took the exam prior to school closing in March 2020. Those who did not pass or complete the CNA exam will be able to do so during the 2020-2021 school year.) Students at all levels completed pandemic-specific training, and obtained the National COVID-Ready Caregiver Certification, which was recommended by the Department of Public Health for all healthcare professionals. Finally, through a unique collaboration with Mount Wachusett Community College, three motivated Seniors completed the Emergency Medical Technician training program, earning eight college credits at no cost, and now have a valuable career pathway available to them. (Total student enrollment: 107)

House Carpentry: The Monty Tech House Carpentry program supported a number of community organizations during the abbreviated 2019-2020 school year, completing projects that include: building a 24'x40' lean-to roof at the Hubbardston DPW Salt Barn, construction of a Habitat for Humanity home in Ashburnham, and finishing all interior trim at the NEADS carriage house, located in Princeton. Students and instructors were also called upon construct a prefabricated stage for the Fitchburg State University Theatre Club, and were delighted to work closely with our post-secondary partners in doing so. Sophomore students handcrafted a number of beautiful Adirondack chairs, which will be used for charitable donations in the months to come. Finally, eight Senior students earned co-op placements, and enjoyed working with area businesses representing the carpentry and construction trades. (Total student enrollment: 54)

HVAC & Property Maintenance: Monty Tech HVAC and Property Maintenance students and instructors participate in the home building project each year, installing the HVAC system and a number of other tasks associated with residential construction efforts. In 2019-2020, Monty Tech HVAC students and instructors worked in Ashburnham to support the Habitat for Humanity community service project. In addition, they traveled to Sterling Municipal Light Department to complete work there. The Monty Tech HVAC & Property Maintenance program also established a partnership with the Monty Tech School of Continuing Education, to offer Oil Burner Technician training and certification to the high school students. After earning National EPA Certification for refrigerant recovery, a total of nine Seniors were placed in area businesses through the school's popular co-op program. HVAC Technicians, and specifically Oil Burner Technicians, are in demand across North Central Massachusetts, so the addition of this credential will prove to be beneficial to all program graduates who choose to stay in the HVAC and Property Maintenance trades. While Junior students were not eligible to go out on co-op in 2019-2020, instructors offered high-quality online instruction and support, so that they might continue to refine their technical skills and proficiency using various online lessons and assessments. (Total student enrollment: 64)

Information Technology: The Information Technology program continues to offer students more industry-recognized certificates than any other program at Monty Tech, an accomplishment our instructors are so proud of, as these certifications affirm the technical skill proficiency needed for entry-level careers in networking and information technology. In 2019-2020, all Freshmen completed the OSHA 10-hour General Industry training, and all Sophomore students passed the Test-out PC Pro Certificate exam, the Cisco IT Essential course for computer repair and maintenance, and the Introduction to Networking course. One Sophomore, one Junior, and one Senior elected to take, and passed, the COMPTIA A+ exam. All Seniors completed the Python Programming course and participated in the AP Computer Science Principles course. Seven Seniors and one Junior earned co-op placements, applying their technical skills in area businesses. In total, approximately 100 hours of community tech support were completed, which involved hardware and software troubleshooting on desktops, laptops, printers, and mobile devices. (Total student enrollment: 36)

Machine Technology: Throughout the 2019-2020 school year, Monty Tech Machine Technology instructors were able to effectively train students in precision measurement, CNC operation and cutter technology. Students worked on the shop floor and in the program's relatively new Clean Room environment, which was an addition to the program in 2018, funding by a \$435,000 Skills Capital Grant. A new print reading curriculum was adapted and applied, to expand the already comprehensive curriculum. All Freshman students earned the OSHA 10-hour general industry certification, while seven Seniors and four Juniors earned co-op placements, working and learning in area machine shops. (Total student enrollment: 45)

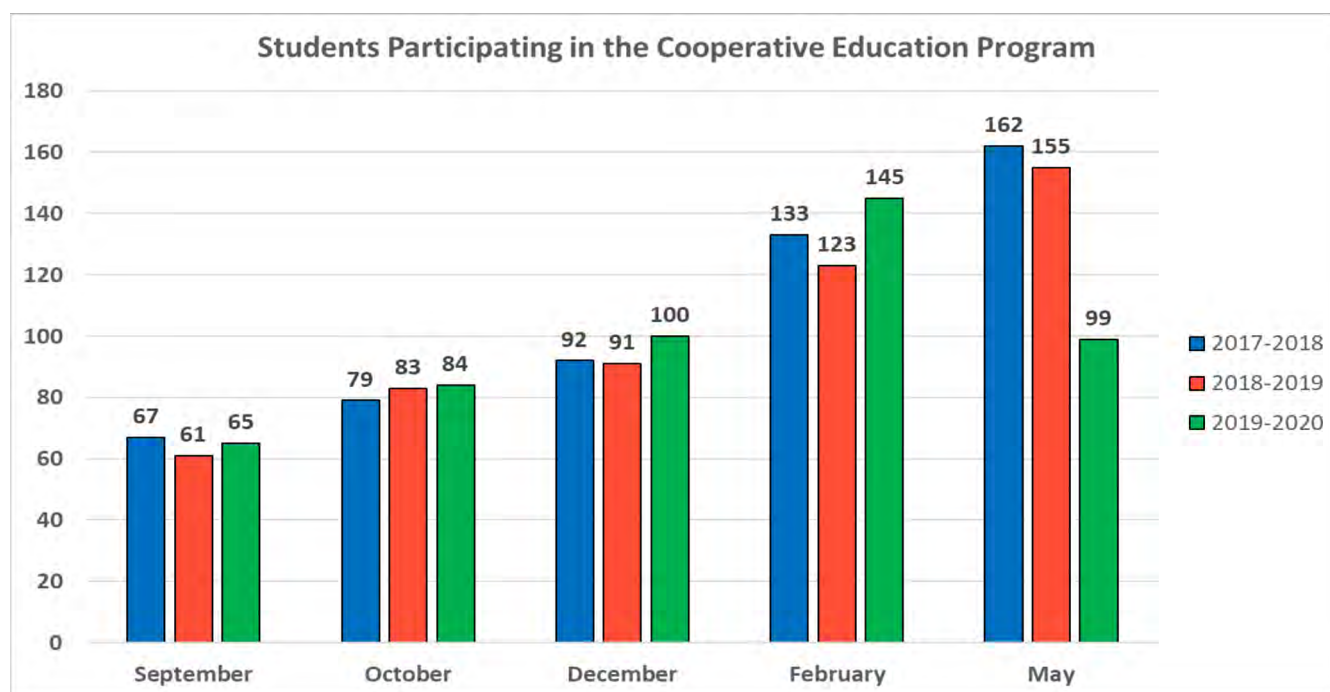

Masonry: The talents of Monty Tech Masonry students are on display throughout district communities, as projects that were completed during the 2019-2020 school year include: a block garage at the Lunenburg North Cemetery, block renovations for Sterling Municipal Light Department, a handicap ramp for the Hubbardston Police Department, and a detailed repair of the marble floor at the Forest Hill Cemetery Mausoleum. Students continued to maintain the OSHA silica standard, in a program that operates in compliance with all trade regulations. Three Seniors earned co-op placements, and continued to refine their skills working with business partners through the school's co-op program. Unfortunately, due to the restrictions in place due to COVID-19 closure, Juniors were not able to participate in the co-op program. (Total student enrollment: 53)

Plumbing: In the 2019-2020 school year, eighteen Freshmen entered the Plumbing trade at Monty Tech, all of whom successfully completed OSHA 10-hour General Industry safety training. Sophomore Plumbing students completed OSHA 10-hour Construction Training. Students and instructors completed replacement of water coolers throughout the Winchendon Public School District. Juniors and Seniors also gained valuable experience working on the plumbing at the two Habitat for Humanity homes in Ashburnham. Ten Seniors and one Junior participated in the co-op program. One Senior received the prestigious 2020 Vocational Tech Plumbing All-Star Award, given by the Plumbing, Heating, and Cooling Contractors Association of Massachusetts, and all Seniors earned industry-recognized NFPA Hot Works safety training certificates. The program proudly graduated 18 students. (Total student enrollment: 71)

Veterinary Science: The school's newest vocational training program, Veterinary Science, entered its third year, and after many years of planning, opened the doors of the clinic to pets in need. A successful Exploratory program resulted in a full class of twenty-two eager Freshmen, who were quick to get to work, completing the OSHA 10-hour healthcare training and certification program, and spending the remainder of the second semester engaged in introductory animal science lessons, with a virtual field trip to see cattle owned by a classmate. Sophomores worked through some very challenging curriculum, covering units in client services, hospital management, anatomy, pathology and laboratory procedures. They visited Flying High Farm in Lunenburg to work with horses and complete the program's large animal requirements, and also toured Idexx laboratories in North Grafton, MA to observe all aspects of clinical pathology. The Juniors delved into even more rigorous curriculum, which would complement their hands-on work in the clinic. Lessons in pharmacology, grooming, surgical and nursing care, and anesthesiology proved to be invaluable to the program's first class of students to work in the clinic, applying their knowledge as they worked alongside veterinarians, groomers, and veterinary technicians. (Total student enrollment: 64)

Welding/Metal Fabrication: The 2019-2020 school year brought new equipment to the school's popular Welding/Metal Fabrication program. A 4 ft. squaring shear was added to the training program, to better prepare students for entry level careers in the trade. Numerous projects were completed by talented students, including more than fifty requests for individual projects from community members residing in the school's sending district. In response to the school closure, instructors implemented a new online learning platform from Miller Welding Open Book for grades 11 and 12. All Freshmen students successfully completed the OSHA 10-hour General Industry training, and earned that certification. Juniors and Seniors participated in Careersafe Online Employability Interview skills, which is a targeted effort to compliment their already strong technical skills with the soft skills needed to succeed in life. Eight Seniors and one Junior were placed in area shops, working and learning from trade professionals who support the school's co-op program. (Total student enrollment: 55)

Co-operative Education and Student Placement

The Cooperative Education Program is an extension of the student's technical education that combines classroom instruction with on-the-job-training. The Co-op Program provides students with an opportunity to further develop academic, technical and employability skills in an industry work environment. All students are eligible to participate in the Co-op Program, provided they satisfy state and school grade, attendance and performance requirements. All Co-op students have completed the OSHA recognized Career Safe online health and safety course.

The Cooperative Education Program is beneficial for both student and employer. For the student, it is a chance to gain on-the-job training that improves both their technical and employability skills. Additionally, making industry connections enhances post-graduate employment opportunities. The Co-op Program allows students to earn while they learn.

Employer benefits include addressing workforce needs in an efficient manner. Co-op students provide a pool of temporary and potential full-time employees who are already trained, thus reducing employer training costs. Co-op work hours may be tailored to suit the needs of partnering employers. Monty Tech was on pace for a record-breaking year for co-op placements, with 145 students (Juniors and Seniors) working, learning and applying their technical skills related in area businesses in February of 2020. Unfortunately, due to the ongoing pandemic, co-op opportunities for our students have declined slightly, but are expected to rebound when local businesses are able to open and operate at full capacity.

Student Support Services

During the 2019-2020 school year, Montachusett Regional Vocational Technical School District provided special services to approximately three hundred students – measuring progress of over two hundred students on Individual Education Plans (IEPs) and just under one hundred students adhering to individualized Section 504 plans. While the Student Support Services (SSS) Department encompasses special education, the department provides support and is available to all Monty Tech students.

The department includes a full-time nursing staff that administers medications, performs state-mandated health screening exams, and provides, when necessary, health information to the special education team for a student's IEP meeting. The department benefits from a full-time school social worker that participates in departmental meetings and assists students who have needs concerning finances, family issues, homelessness, maternity, health issues, and proper food and clothing. The school is also fortunate to have on staff a full-time psychologist, whose role it is to evaluate all students referred for an initial evaluation or who require a three-year re-evaluation. In addition, we have a full-time speech language pathologist, who is available to assist students with disabilities, assess these students and consult with teachers. Our students also have access to the services of a full-time adjustment counselor and part-time school psychologist. All of these individuals are available for scheduled counseling sessions, mental health emergency treatment, medical/mental health re-entry and transition support services, as well as crisis intervention.

The school's Director of Student Support Services oversees the District's Special Education Program, which is reviewed annually in May, in accordance with regulatory requirements. The comprehensive review and evaluation are done in collaboration with the Parent Advisory Council, and the results of the evaluation are used to improve the special education procedures and programs in place at Montachusett Regional Vocational Technical School.

During the 2019-2020 Montachusett Regional Technical School District's Department of Student Support Services made a concerted effort to increase social, emotional, and community based supports. In addition to our current re-entry and school based counseling services, Monty Tech and LUK, Inc. joined forces with the help of the Department of Public Health to provide services to at-risk students and their families. Couple this with the further expansion of our partnership with the SHINE Initiative, it has allowed the district to build upon our mission to provide opportunities for all students to be engaged, lead, and access the supports necessary to improve their social and emotional well being.

Technology

The 2019-2020 school year proved to be a test in many ways for the Monty Tech educational community, but was no match for the school's Technology Department. Because of forward thinking on the part of the department's Director and the school's leadership team, 2019-2020 was the school's 4th year for the 1:1 Chromebook initiative, so students and instructors had previous experience with the tools and technology needed to learn in a remote setting. To support the additional and now required use of this technology, the Technology Department spent countless hours during the school year upgrading the network and increasing the bandwidth coming into the school to sustain video and audio conferencing.

Department personnel upgraded the learning experience for students, by purchasing laptops for students and teachers, building new iMacs for the Graphic Communications program, and rebuilding surplus computers for full remote students in CAD Drafting & Design, Graphic Communications, Business Technology, and Engineering, so that they may work from home on their vocational assignments. A ZOOM license was purchased, and the Instructional Technologist worked diligently to purchase and deploy software for all teachers. Camcorders, wireless headsets, interactive displays and a variety of apps were purchased, installed, and put into the hands of our educators to engage learners at all levels.

Finally, to ensure "business as usual," we invested in Splashtop, VPN client and configured the firewall, so that faculty and staff laptops could be fixed remotely if a software issue presented itself, and so that the Business Office would have remote access into the school to maintain a secure working environment, even when the building was closed.

Marine Corps JROTC

The Monty Tech Marine Corps Junior Reserve Officer Training Corps (MCJROTC) remains one of the school's most worthwhile and engaging programs available to our students. Due to outstanding performance throughout the year, Monty Tech's Marine Corps Junior Reserve Officers' Training Corps program was, once again, designated as a Marine Corps Honor School. Selection for the Marine Corps Honor School means that the school's Marine Corps JROTC program was in the top 15% of the 68 other programs in Region 1. Region 1 includes schools from the mid-Atlantic and Northeast U.S. The selection is based on several criteria including:

- *Inspector General's inspection results*
- *Number of cadets in the program*
- *Number of community service hours conducted*
- *Number of public affairs events attended by cadets*
- *Number of academic awards presented to cadets*
- *Participation in drill team competitions, marksmanship competitions, physical fitness competitions, and field trips that support the growth and development of the cadet*

Because of this distinction, Monty Tech MJROTC instructors are allowed to nominate up to six cadets to each of the three service academies — U.S. Naval Academy, U.S. Military Academy and U.S. Air Force Academy. This is the 9th time the program has earned this distinction since 2007.

The 2019-2020 Corps of Cadets completed over 4,800 hours of community service in the abbreviated year, completing a 10 mile March A Thon that raised \$20,000 to support local nonprofit organizations. The Cadets volunteered time during their weekends, working with the local Salvation Army, and helped raise more than \$25,000 for families in need. Finally, the Monty Tech Cadet Corps provided 11 Color Guards for local civic and veteran ceremonies, a highlight for students and instructors alike.

Monty Tech School of Continuing Education

The Monty Tech School of Continuing Education continues to update and add courses that emphasize a commitment to excellence by offering affordable, quality, and enjoyable educational experiences. For the Fall of 2019, Monty Tech offered 142 classes and another 114 in the Spring 2020 semester.

The program is on track to support the North Central Massachusetts workforce readiness pipeline with an increase in career and licensure courses. The pivot to a hybrid learning model has been beneficial to both our career/licensure students as well as our personal enrichment students. During the Fall 2019 and Spring 2020 sessions, we realized the resiliency of our students and their willingness to persevere with their training despite the challenges. Our instructors worked tirelessly to maintain training programs timelines.

Our medical students' skill set was and continues to be in high demand due to the pandemic. We were able to support our local medical facilities with newly license healthcare workers, to include Pharmacy Technicians, Medical Billing and Coding Specialists, EKG Technicians, Phlebotomists, CNAs, and Patient Care Technicians.

The continued success and sustainability of an adult education program is based on hiring quality instructors and meeting the needs of the community and supporting workforce development. Our goals in the coming year include: identifying additional training opportunities to meet the needs of the regional workforce, provide affordable and meaningful training opportunities to our nontraditional student population, and expanding programming to include off-site, daytime training opportunities across the region.

Practical Nursing Program

The Monty Tech Practical Nursing Program is designed to prepare graduates to practice safely and ethically in a caring manner for patients who are experiencing common variations in health status in diverse health care settings.

On June 25, 2020 a graduating class of 28 students completed the Practical Nursing Program and entered the nursing profession.

The class has thus far achieved a pass rate of 75%, with 21 of the 28 graduates passing the NCLEX-PN exam (National Council Licensure Examination for Practical Nurses). Due to the pandemic, the testing period has been extremely delayed. Seven graduates will pursue the examination in the coming months.

All of the 2020 graduates are currently employed in the health care profession throughout Massachusetts, working in various health care settings, such as long-term care, sub-acute care, mental health/substance abuse facilities, physician's offices and correctional medicine.

The Monty Tech Practical Nursing Program continues to strengthen the “LPN to BSN (Bachelor of Science in Nursing) Bridge” relationship with Fitchburg State University. Several 2019 and 2020 graduates are pursuing seats in the LPN to BSN program at FSU and will be continuing their education to the Bachelors in Nursing. Many class applicants cited their attraction to Monty Tech as the opportunity to complete a ten-month accelerated program and then bridge to Fitchburg State University. In the 6-year history of the Bridge Program, all of Monty Tech’s Practical Nursing graduates reaching graduation at FSU have passed their RN -NCLEX exam.

Monty Tech Practical Nursing students are now completing patient scenarios in the Sim Lab on a weekly basis in Terms 2, 3, and 4. The Faculty Sim team has implemented National League of Nursing (NLN) patient scenarios and authored several others consistent with our curriculum frameworks, and have also utilized the Sim lab setting to instruct students in developing nursing skills that they may not be experiencing in the clinical setting. Instructors have successfully developed and implemented a library of scenarios reflecting INASCAL Standards (International Association for Clinical Simulation and Learning).

In Maternity Sim Lab Boot Camp, students utilize the new simulation models to imitate the birthing process, from obstetric office visits through labor and common post-partum complications. Well newborn care is also taught. Student feedback has been positive regarding these new maternity scenarios, stating it better prepares them for an unexpected outcome during a delivery. This expanded content also better prepares students for NACE (Nursing Acceleration Challenge Exam) success at FSU.

Substance abuse and the mental health setting job opportunities have increased with more funding being provided to combat the opiate crisis. Even without having specialty clinical rotations, students performing simulation scenarios involving substance abuse clients, has prepared our graduates to work in a substance abuse clinical setting, as well.

We are expecting an accreditation visit from the Massachusetts Board of Registration in the coming year. Our goals include stabilization of faculty positions, securing a certified Simulation Instructor, and pursuance of ACEN (Accreditation Commission for Education in Nursing) to more accurately reflect the changing environment of nursing education.

Looking Ahead

While 2019-2020 ended in an unexpected manner, with students and instructors working and learning from home, we were able to use that time to reflect on the core values represented within our educational community and consider how we might improve the educational experience for all students upon their return. We understand that the pandemic brought about many changes to the way we live and work. Our students were isolated for weeks and months, while our instructors were asked to completely redefine their instruction to deliver an entirely remote curriculum. People of all ages, socio-economic classes and intellectual abilities feared for the safety of their family, friends and loved ones – compounding feelings of loneliness and uncertainty. As we looked ahead, then, a number of priorities for the upcoming school year emerged.

Supporting students and staff both socially and emotionally, providing the resources needed to succeed in a remote learning environment, and maintaining a clean and safe learning environment have become our latest priorities.

The changes brought upon by the pandemic were not expected. There was no time to prepare our staff and students for what might lie ahead, but I am thankful for the expertise and flexibility demonstrated by our very talented faculty and staff, and the students who made the most of a very difficult end of the 2019-2020 school year.

Programs and initiatives that we expect to implement in 2020-2021 that will have a positive impact on our school and students are as follows:

Support faculty, staff and students' socio-emotional wellness, and develop a community-wide understanding of equity (or lack thereof) and how it contributes to a safe and supportive learning environments for all students. We recognize that students and staff have been home and isolated from others for months.

Learning from home may have presented an unintended result - unequal learning opportunities. There are fears and concerns among staff, and there is a heightened sensitivity to what this isolation has meant to our student population. Collaborating with community service agencies, we will address efforts to create a healthy school climate, and will provide targeted training opportunities to better serve our students. A diverse team of professionals (teachers, paraprofessionals, guidance counselors, and support staff) will review existing district and school documents and policies, survey staff and students regarding school climate, and develop a comprehensive action plan, and infuse those elements into the 2021-2024 District Improvement Plan.

Expand technology resources and infrastructure to support Hybrid and/or Remote Learning Platforms.

Monty Tech is fortunate to have been able to provide all students with a Chromebook for the past several years, and all teachers with Chromebooks or laptops to support curriculum development efforts while away from the school. That technology proved to be invaluable during the 2019-2020 school year, and so the District is committed to maintaining and expanding access to instructional technology that will enhance at-home learning moving forward. During the summer of 2020, we learned that school would not resume with all students in-person. A complex schedule (balancing academic and vocational in-person instructional time) was negotiated and agreed upon, and students/parents were given the option of returning in a hybrid of fully remote model. By purchasing and maintaining ZOOM licenses, increasing bandwidth, reconfiguring surplus equipment, and continuing to work with the school's Instructional Technologist to provide a variety of workshops to academic and vocational instructors who have come to rely on any one of the two school's Learning Management Systems (Google Classroom or Schoology), Monty Tech will be well-positioned and prepared to deliver instruction either in-person or remotely, at a moment's notice.

Modify facilities and infrastructure to ensure students, faculty and staff are working and learning in a safe environment. While the school is prepared to provide all faculty and staff with required and requested PPE, many upgrades to the school building must be completed prior to and maintained throughout the 2020-2021 school year. All rooftop units will be upgraded from MERV 8 to MERV 13 rated air filters, which are high quality air filters typically used in general surgery or hospital settings, capturing down to 0.3 – 1.0 micron particle size. iWave units will be added to the HVAC system, reducing pathogens, allergens, particles, smoke and odors in the air, creating a healthy environment without producing any harmful byproducts. Installing sanitizing stations, redirecting traffic patterns, and limiting the number of desks/seats in a confined space will provide a comfortable setting for the students during their in-person learning days, while limiting access to the school (parents and visitors must wait outside) will aid in screening and tracing efforts throughout the year.

The Monty Tech School Committee

The Montachusett Regional Vocational Technical School District Committee is comprised of twenty-two dedicated individuals, whose expertise proves invaluable in advising the district's operations, policies, and procedures. Our students continue to benefit from the broad scope of their experiences and varying perspectives, and we are thankful to the following members of the 2019-2020 School Committee for their outstanding service.

Brian J. Walker, Fitchburg

TOWN CLERK

VITALS REPORT:

AT THE RECOMMENDATION OF THE REGISTRY OF VITAL RECORDS AND U.S. DEPARTMENT OF STATE AND FOR THE SAFETY AND SECURITY OF THE RESIDENTS OF TOWN, NAMES OF INDIVIDUALS HAVE BEEN ELIMINATED AND INSTEAD THE NUMBER OF OCCURANCES OF EACH BIRTH, MARRIAGE AND DEATH ARE TOTALLED FOR THE YEAR.

DURING 2020 THE TOWN CLERK RECORDED THE FOLLOWING:

BIRTH – 97

DEATHS – 108

MARRIAGES - 34

2020 was quite the challenge! In March we had the Presidential Primary, in addition to that election we had a Special State Primary to fill the vacancy created by Representative Benson's resignation. Thank you Representative Benson for your service!

Just ten days later should have been the Citizens Party Caucus - then- PANDEMIC - SHUTDOWN – Social Distancing – Masks – Sanitizer... The Caucus was rescheduled two more times and finally dropped; only a few candidates were able/willing to gather signatures to have their names placed on the ballot. All was not lost, facebook to the rescue, a slate of candidates was produced (private citizens) and the list handed out (150 feet away) to voters as they went in to the polls.

March again saw an election postponed, the Special State Election was moved to June 2nd.

Special legislation was enacted to change our Annual Town Meeting and Election from May to June. Deadlines were moved, early voting was extended to local elections (in-person and mail-in) along with the number of days of in-person Early Voting; many thanks to United Parish for the use of their building.

The State mailed post card applications to every voter in the system for both the September Primary and the November State (Presidential) Election; as you can see in the picture below, we were inundated with applications for one or both of the elections and instead of three to six hundred absentee ballots we were closer to two thousand.

Thankfully, we were able to get through it safely but not without a LOT of help from ALL town departments; biggest thanks to the Registrars shown in photo Ruth Anderson, Shirley McBride (who, by the way, were never doing another Presidential election again after 2016) and Karen Kemp who is our resident sign maker etc. These ladies worked tirelessly making Early/Absent voting happen for five and ten day stretches without a glitch! Also, couldn't have managed without the Election Workers who bravely stepped up to cover all the polling hours of six elections but covered check-in for two Town Meetings as well – Thank you all for a job well done!

TOWN MEETING EXCERPTS

ANNUAL TOWN MEETING – JUNE 13, 2020

Due to the COVID-19 pandemic, voters were checked-in outside to provide the appropriate distancing. Several officers from the Lunenburg Police Department were on hand to assist, direct and usher attendees to appropriate locations depending on whether they were a voter or visitor.

The Moderator called the meeting to order at 9:10 a.m. in the auditorium of the Middle/High School. The Moderator declared that a quorum was present and the warrant had been properly served. After the Pledge of Allegiance, the National Anthem was sung by Rose Beardmore (2020 graduate of Lunenburg High School). Selectman Tom Alonzo recognized Phyllis Luck and Damon McQuaid for their service to the town of Lunenburg. The Town Manager presented flowers to Mr. McQuaid. Mrs. Luck did not attend the town meeting. The Moderator then nominated Robert Bowen as Deputy Moderator for the rest of the year. The Moderator went over the rules for this Annual Town Meeting (in order to help keep everyone safer during this COVID-19 pandemic):

- The cards given to voters when they arrived were to be used for all votes (no voice votes).
- Lunenburg police officers were available to escort voters to the auditorium and show apart in each open row were taped off to allow for social distancing) as well as the disinfectant station that was available for hand washing. If a registered voter chose not to wear a facemask, there was a section of the auditorium reserved for them to sit; this area was not used as everyone wore a face covering.
- When wishing to speak on an article, the voter needed to stand behind either of the two microphones available. Maintaining social distancing as noted by the markings on the floor, the voter was not to touch the microphone while stating their name and address prior to speaking to the article. Staff was available to raise or lower microphone and clean as needed.
- For point of order, seven (7) voters needed to stand up with cards raised (not calling out from seat).
- After a warrant article was read, raising your voting card would second the motion (again, no calling out).
- The consent calendar included articles considered non-controversial (in order to shorten the time needed to complete the articles for this annual town meeting).

The first order of business was the Consent Calendar which included those articles considered to be non-controversial – the articles passed by Unanimous Consent were: #1, 2, 4, 9, 10, 11, 12, 13, 14, 15, 16, 17 and 18. Article 18 was amended to add the written report (which was given to voters when checking in) to the Consent Calendar.

ANNUAL TOWN MEETING – JUNE 13, 2020

ARTICLE 1. To see if the Town will vote to hear and/or accept the regular written reports of the Town Officers and Committees; or take any other action relative thereto. (Submitted by the Town Manager) (Board of Selectmen recommend approval; Finance Committee no recommendation) **VOTED UNANIMOUS CONSENT**

ARTICLE 2. To see if the Town will vote to authorize revolving funds for various departments, boards, committees, agencies or officers pursuant to Massachusetts General Law Chapter 44, Section 53E ½ for the fiscal year beginning July 1, 2020 to be expended in accordance with Chapter 138 of the Town's General By-laws; or take any other action relative thereto. (Submitted by the Town Manager) (Board of Selectmen and Finance Committee recommend approval) **VOTED UNANIMOUS CONSENT**

<i>Revolving Fund</i>	<i>FY21 Spending Limit</i>
Ambulance Billing	\$100,000
Timber Rights	\$10,000
School Custodial Special Details	\$13,000
Green Thumb	\$5,000
Library Revolving	\$12,000
Council on Aging/MART Revolving	\$45,000
Stormwater Task Force	\$5,000
Electrical, Gas, Plumbing Inspector	\$46,000
Technology	\$30,000

ARTICLE 3. To see if the Town will vote to raise and appropriate, or transfer from available funds, a sum of money for payment of prior year expenses; or take any other action relative thereto. (Submitted by the Town Manager) (Board of Selectmen and Finance Committee recommend approval) **VOTED UNANIMOUSLY to transfer the sum of \$476.21 from Free Cash for payment of prior year expenses.**

ARTICLE 4. To see if the Town will vote to transfer from available funds, all sums of money necessary to amend the amounts voted for the Town's FY 2020 Budget, under Article 7 of the May 4, 2019 Annual Town Meeting and Article 1 of the November 12, 2019 Special Town Meeting; or take any other action relative thereto. (Submitted by the Town Manager) (Board of Selectmen and Finance Recommendations – deferred) **VOTED UNANIMOUS CONSENT TO PASS OVER ARTICLE 4.**

ARTICLE 5. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to fund the first year of the FY 20, FY 21 and FY 22 Police Officers Collective Bargaining Agreement dated July 1, 2019 – June 30, 2022 with IBPO Local 353, AFL-CIO; or take any action relative thereto. (Submitted by the Town Manager) (Board of Selectmen and Finance Committee recommend approval) **VOTED UNANIMOUSLY to raise and appropriate \$0 to fund the first year of the FY20, FY21, and FY22 Police Officers Collective Bargaining Agreement dated July 1, 2019-June 30, 2020 with IBPO Local 353, AFL-CIO.**

ARTICLE 6. To see if the Town will vote to raise and appropriate, borrow, or transfer from available funds a sum of money for the FY 2021 Capital Plan, as appearing in the Capital Planning Committee Report, or take any action relative thereto. (Submitted by the Town Manager) (Board of Selectmen recommend approval; Finance Committee –no recommendation)

VOTED to transfer from Free Cash the sum of \$647,880 to fund the FY21 Capital Plan, as appearing in the Capital Planning Report as printed in the Town Meeting warrant booklet. Here is the revised FY 2021 Capital Plan as recommended by both the Capital Planning Committee and the Town Manager:

Revised Priority #	CIP#	Dept.	Project Name	Category	Revised FY21 CP for ATM
1	FM20-01	DPW	Town Hall, ADA Ramp/Sidewalk	Facilities	\$22,000
2	INFRA20-01	Highway	Flat Hill Culvert Design	Infrastructure	\$112,500
3	LPS16-19-C	Schools	THES Asbestos Abatement/Ceiling Replacement	Facilities	\$123,500
4	PD19-01	Police	Police Vehicle, 1 Marked New	Vehicle	\$67,000
5	FD17-05-B	Fire	SCBA Complement, Replacement (1/2)	Equipment	\$115,000
6	FD16-20-A	Fire	ALS Equipment Phase 1	Equipment	\$54,800
7	PD20-01	Police	ACO Vehicle	Vehicle	\$26,000
8	FD20-01	Fire	Mdlife Overhaul of Squad 3	Vehicle	\$65,000
9	PD16-18	Police	Portable Radios	Equipment	\$45,000
10	LPS19-03-A	Schools	Design AC for Classrooms at Primary	Planning	\$10,000
11	FM17-16A	DPW	Senior Center, Reconfigure Front Entrance	Facilities	\$24,000
			Total Capital Plan		\$664,800
		Funding:	Raise & appropriate		\$0
			Free cash		\$664,800
			Unexpended Capital		\$0
			Premium Reserved for Capital		\$0
			Total		\$664,800

ARTICLE 7. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to defray the charges and expenses of the Town for FY 2021 and to fix the salaries and compensation of all elected officials of the Town and any other items included in the budget of the Town Manager; or take any other action thereto. (Submitted by the Town Manager) (Board of Selectmen and Finance Committee recommend approval)

VOTED UNANIMOUSLY to raise and appropriate \$37,569,980.43, transfer \$877,011.90 from the Sewer Enterprise Fund, transfer \$48,000 from the PEG Access Enterprise Fund, transfer \$60,812.19 from the Reserve for MSBA Debt, transfer \$46,473.00 from the Artificial Turf Revolving Fund, and transfer \$55,837.50 from Water Betterment Revenue to defray the charges and expenses of the Town for Fiscal Year 2021 of \$38,658,115.02, and to fix the salaries and compensation of all elected officials of the Town and any other items included in the budget of the Town Manager. As follows:

ANNUAL TOWN MEETING – JUNE 13, 2020

<i>FY 2021 Omnibus Budget</i>		
Line No.	Account	VOTED
	<i>Maturing Debt & Interest</i>	
1	Principal-Loans	\$ 3,226,042.07
2	Interest -Loans	\$ 1,469,113.25

ARTICLE 8. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to the Stabilization Fund; or take any action relative thereto. (Submitted by the Town Manager) (Board of Selectmen and Finance Committee recommend approval)

VOTED UNANIMOUSLY to transfer from Free Cash the sum of \$210,000 to the Stabilization Fund.

ARTICLE 9. To see if the Town will vote to transfer from available funds, all sums of money necessary to amend the amounts voted to operate the FY2020 Sewer Enterprise Fund, under Article 12 of the May 4, 2019 Annual Town Meeting, and Article 3 of the November 12, 2019 Special Town Meeting; or take any other action relative thereto. (Submitted by the Sewer Commission) (Board of Selectmen and Finance Committee – deferred recommendation) **VOTED UNANIMOUS CONSENT TO PASS OVER ARTICLE 9.**

ARTICLE 10. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to operate the Sewer Enterprise Fund for FY 2021; or take any action relative thereto. (Submitted by the Sewer Commission) (Board of Selectmen and Finance Recommend approval)

VOTED UNANIMOUS CONSENT to appropriate from Sewer Enterprise revenues the sum of \$790,027.63; appropriate from Sewer Enterprise retained earnings the sum of \$125,650.25; transfer from Sewer Capital Reserve Stabilization Fund the sum of \$20,000; transfer from Sewer Reserve Capacity Stabilization Fund the sum of \$7,513.66 for a total appropriation of \$943,191.54 to operate the Sewer Enterprise Fund for FY21; and further that \$877,011.90 be included in appropriations from the general fund for indirect costs and be allocated to the Sewer Enterprise Fund.

ANNUAL TOWN MEETING – JUNE 13, 2020

ARTICLE 11. To see if the Town will vote to transfer from available funds \$30,000 into the Sewer Capital Reserve Stabilization Fund; or take any other action relative thereto. (Submitted by the Sewer Commission) (Board of Selectmen and Finance Recommend approval) **VOTED UNANIMOUS CONSENT to transfer from Sewer Enterprise Retained Earnings the sum of \$30,000.00 into the Sewer Capital Reserve Stabilization Fund.**

ARTICLE 12. To see if the Town will vote to transfer from available funds, the sum of \$656 into the OPEB Sewer Trust Fund; or take any other action relative thereto. (Submitted by the Sewer Commission) (Board of Selectmen and Finance Recommend approval) **VOTED UNANIMOUS CONSENT to transfer \$656 from Sewer Enterprise Retained Earnings to the OPEB Trust Fund established at the November 30, 2010 Special Town Meeting.**

ARTICLE 13. To see if the Town will vote to raise and appropriate or transfer from available funds a sum of money to operate the Solid Waste Disposal Program Enterprise Fund for FY 2021; or take any other action relative thereto. (Submitted by the Town Manager)) (Board of Selectmen and Finance Recommend approval) **VOTED UNANIMOUS CONSENT to appropriate from Solid Waste Disposal Enterprise Revenues the sum of \$302,000 to operate the Solid Waste Disposal Program.**

FINANCE COMMITTEE RECOMMENDATION: Recommend Approval

BOARD OF SELECTMEN RECOMMENDATION: Recommend Approval

ARTICLE 14. To see if the Town will vote to raise and appropriate or transfer from available funds a sum of money to operate the Water Department/Water Enterprise Fund for FY 2021; or take any other action relative thereto. (Submitted by the Town Manager) **VOTED UNANIMOUS CONSENT** to appropriate from Water Enterprise Revenues the sum of \$25,000 to operate the Water Department.

FINANCE COMMITTEE RECOMMENDATION: Deferred

BOARD OF SELECTMEN RECOMMENDATION: Recommend Approval

ARTICLE 15. To see if the Town will vote to raise and appropriate or transfer from available funds the sum of \$191,000 to operate the Public Educational Government (PEG) Access Enterprise Fund for FY 2021; or take any other action relative thereto. (Submitted by PAC Committee) **VOTED UNANIMOUS CONSENT** to appropriate from PEG Access and Cable Related Enterprise Fund Revenues the sum of \$143,000.00 to fund the FY21 PEG Access operating budget and further that \$48,000 be included in appropriations from the general fund for indirect costs and be allocated to the PEG Access and Cable Related Enterprise Fund.

FINANCE COMMITTEE RECOMMENDATION: Recommend Approval

BOARD OF SELECTMEN RECOMMENDATION: Recommend Approval

ARTICLE 16. To see if the Town will vote to amend Chapter 70 of the Town's General By-laws, entitled "Salary Administration Plan," as follows: the position of Videographer to be added and assigned to Grade 3; the position of Senior Videographer to be added and assigned to Grade 6; and the position of Water Safety Instructor to be added and assigned to Grade 4; or take any other action relative thereto. (Submitted by the Personnel Committee) **VOTED UNANIMOUS CONSENT to amend Chapter 70 of the Town's General By-laws, entitled "Salary Administration Plan," as follows: the position of Videographer to be added and assigned to Grade 3; the position of Senior Videographer to be added and assigned to Grade 6; and the position of Water Safety Instructor to be added and assigned to Grade 4.**

ARTICLE 17. To see if the Town will vote to file a Home Rule Petition with the General Court for a special law authorizing the investment of Library trust funds and any future bequests to the Library in accordance with the prudent investor rule and related statutes. The proposed Special Act would read as follows:

AN ACT AUTHORIZING THE INVESTMENT OF TOWN OF LUNENBURG LIBRARY TRUST FUNDS

ANNUAL TOWN MEETING – JUNE 13, 2020

SECTION 1. Notwithstanding any general or special law to the contrary, the treasurer of the town of Lunenburg may invest library trust funds and any future bequests to the library in the custody of the treasurer in accordance with the prudent investor rule and sections 3, 4, 5, 8 and 9 of chapter 203C of the General Laws. The treasurer, in consultation with the town's library trust fund committee, shall develop investment policies which shall include an asset allocation policy and shall select professional investment advisors to manage such funds.

SECTION 2. Section 54 of chapter 44 of the General Laws shall not apply to the town of Lunenburg library trust funds.

SECTION 3. This act shall take effect upon its passage.

Or take any other action relative thereto. (Submitted by the Library Board of Trustees) **VOTED UNANIMOUS CONSENT to authorize the Board of Selectmen to file a Home Rule Petition with the General Court for a special law authorizing the investment of Library trust funds and any future bequests to the Library in accordance with the prudent investor rule and related statutes. The text of said Special Act to be as printed in the Town Meeting warrant booklet**

ARTICLE 18. To see if the Town will vote to hear an interim report from the TCP Building Design Committee and/or from representative (s) from the design firm; or take any other action relative thereto. (Submitted by the TCP Building Design Committee) (Board of Selectmen and Finance Committee recommend approval) **VOTED UNANIMOUS CONSENT to amend Article 18 to add written report to the Consent Calendar that was given to registered voters when they checked in to the Annual Town Meeting.**

ARTICLE 19. To see if the Town will vote to amend Chapter 110 of the Town's General Bylaws, entitled "Animals," by deleting therefrom in its entirety Section 110-3, entitled "Dog kennels," and substituting the following therefor:

- A. Any person maintaining a kennel, as defined in MGL c. 140, § 136A, shall obtain a kennel license in accordance with MGL c. 140, § 137A, by first applying for a kennel license with the Town Clerk. A copy of a special permit from the Zoning Board of Appeals must be included or such application shall be denied. Upon review of the application the Animal Control Officer shall inspect the proposed facility for compliance with all applicable Massachusetts General Laws prior to the issuance of a kennel license and anytime thereafter, should the license issue.
- B. Any person who receives a kennel license shall comply with the confinement and other provisions of MGL c. 140, § 174E.
- C. The licensing authority of the Town of Lunenburg shall issue a kennel license without charge to a domestic charitable corporation incorporated exclusively for the purpose of protecting animals from cruelty, neglect or abuse or for the relief of suffering.
- D. Petitions or complaints against any kennel may be filed in accordance with MGL c. 140, § 137C.
- E. Any person who violates the provisions of this by law shall be subject to Article 1 section 1-3; provided, however, that the Town may pursue enforcement and collect such fines or penalties as may otherwise be authorized by law;

Or to take any other action relative thereto. (Submitted by the Police Chief) (Board of Selectmen and Finance Committee recommend approval) **VOTED UNANIMOUSLY to amend Chapter 110 of the Town's General Bylaws, entitled "Animals," by deleting therefrom in its entirety Section 110-3, entitled "Dog kennels," and substituting the following therefor:**

- A. Any person maintaining a kennel, as defined in MGL c. 140, § 136A, shall obtain a kennel license in accordance with MGL c. 140, § 137A, by first applying for a kennel license with the Town Clerk. A copy of a special permit from the Zoning Board of Appeals must be included or such application shall be denied.

ANNUAL TOWN MEETING – JUNE 13, 2020

Upon review of the application the Animal Control Officer shall inspect the proposed facility for compliance with all applicable Massachusetts General Laws prior to the issuance of a kennel license and anytime thereafter, should the license issue.

- B. Any person who receives a kennel license shall comply with the confinement and other provisions of MGL c. 140, § 174E.**
- C. The licensing authority of the Town of Lunenburg shall issue a kennel license without charge to a domestic charitable corporation incorporated exclusively for the purpose of protecting animals from cruelty, neglect or abuse or for the relief of suffering.**
- D. Petitions or complaints against any kennel may be filed in accordance with MGL c. 140, § 137C.**
- E. Any person who violates the provisions of this bylaw shall be subject to Article 1 section 1-3; provided, however, that the Town may pursue enforcement and collect such fines or penalties as may otherwise be authorized by law;**

ARTICLE 20. To see if the Town will vote to amend Chapter 1 of the Town's General By-laws, entitled "General Provisions," Section 1-3, entitled "Noncriminal disposition," by adding the following to the list of bylaws included within the scope thereof:

<u>General Bylaws</u>	<u>Enforcing Person</u>	<u>Fine</u>
Chapter 110, § 3, Dog kennels	Animal Control Officer and Police Officers	First offense: \$100.00 Second and subsequent offenses: \$300.00

or to take any other action relative thereto. (Submitted by the Police Chief) (Board of Selectmen recommend approval, Finance Committee – no recommendation) **VOTED UNANIMOUSLY to amend Chapter 1 of the Town's General By-laws, entitled "General Provisions," Section 1-3, entitled "Noncriminal disposition," by adding the following to the list of bylaws included within the scope thereof:**

<u>General Bylaws</u>	<u>Enforcing Person</u>	<u>Fine</u>
Chapter 110, § 3, Dog kennels	Animal Control Officer and Police Officers	First offense: \$100.00 Second and subsequent offenses: \$300.00

ARTICLE 21. To see if the Town will vote to raise and appropriate, borrow, or transfer from available funds, a sum of money for the purpose of converting the Town's existing street streetlights to energy efficient and long lasting LED fixtures or, alternatively, acquiring said streetlights for potential future conversion to energy efficient and long lasting LED fixtures; or take any other action relative thereto. (Submitted by the Green Communities Task Force) (Board of Selectmen and Finance Committee recommend approval to pass over this article) **ARTICLE 21 WAS PASSED OVER**

FINANCE COMMITTEE RECOMMENDATION: Deferred
BOARD OF SELECTMEN RECOMMENDATION: Deferred

ARTICLE 22. To see if the Town will vote to amend the Code of Lunenburg, by deleting from Chapter 140 of the Town's General By-laws, entitled "Excavations and Earth Removal," both Article I, entitled "Earth Removal," and Article II, entitled "Excavations," in their entirety, and substituting the language below therefor; or take any other action relative thereto. (Submitted by the Planning Board)

ANNUAL TOWN MEETING – JUNE 13, 2020

§ 140-1 Purpose.

The purpose of this article and associated regulations is to regulate earth removal operations for the protection of human health, public safety, welfare, and the Town's natural resources in the Town of Lunenburg. Further, the provisions of this article are intended to protect abutting property owners from dust, washouts, noise, ponds, and other hazardous land conditions that could potentially be created by poorly managed earth removal operations.

§ 140-2 Definitions.

As used in this bylaw, the following terms shall have the meanings indicated:

ABUTTERS

The owners of property within 300 feet of the perimeter of the subject property.

APPLICANT

The owner of land from which earth will be removed, or the person of lawful standing in the stead of such owner. Any person, company, or agent standing instead of the actual property owner must have the owner's written permission to do so.

BOARD

The Planning Board of the Town of Lunenburg, which shall act as the permit granting authority (PGA).

EARTH

This term shall include soil, loam, sand, gravel, clay, peat, rock, or other native earth material in solid form.

EARTH REMOVAL OPERATION

Any commercial mining, stripping, quarrying, digging or blasting of earth originating from the Town of Lunenburg and its transportation into or out of the Town of Lunenburg.

EROSION

The process by which the ground surface is worn by forces such as wind, running water, ice, abrasion, gravity, transportation or by artificial means.

GRAVEL

Loose fragments of rock or coarse aggregate resulting from natural disintegration and abrasion of rock or processing of weakly bound conglomerate.

LOAM OR TOPSOIL

A soil consisting of a friable mixture of varying proportions of clay, sand, silt, and organic matter.

PGA

The permit granting authority, which will be the Planning Board for the purposes of this article.

PROCESSING

The sorting or separation of earth materials into distinct categories based on particle size or type usually through the use of a screening process, not including stone crushing.

SILT

Loose sedimentary material with rock particles usually less than 1/16 mm or less in diameter based on the Wentworth scale of measurement.

SITE

A distinct portion of one or more contiguous lots, under the same or different ownerships, on which an earth removal operation is conducted, or is proposed to be conducted, under the permit.

ANNUAL TOWN MEETING – JUNE 13, 2020

SLOPE

An area that is more or less steep, as measured by the vertical rise over the horizontal distance, expressed as a percentage or ratio. For example, a rise of one foot over three horizontal feet is a slope of 33% and is expressed as a ratio of 3:1 slope.

STONE CRUSHING

The mechanical operation which creates smaller-sized stones or stone products from larger-sized stones, boulders or particles typically using a crushing plant or similar machinery.

§ 140-3 Applicability.

A. All earth removal operations in the Town shall provide the following information, in writing, to the Building Inspector within six months of the effective date of this article:

- (1) The map and parcel number of the subject property;
- (2) An estimate of the amount of material left to be removed (if earth removal);
- (3) An estimate of the anticipated annual volume of activity;
- (4) A description of completed and planned reclamation of the property;
- (5) The date the operation began; and
- (6) The anticipated date of completion or cessation of the operations.

B. Except as provided in § 140-4 or 140-5, a permit shall be required for any of the following activities:

- (1) Earth removal that involves 1500 cubic yards or more of material per calendar year (January through December).
- C. An earth removal operation that does not exceed any of the above thresholds shall not require a permit but is subject to the following requirements (unless otherwise agreed to, in writing, by the abutting property owner):

- (1) The operation shall not encroach closer than 50 feet to a property line; and
- (2) No greater than a 3:1 slope shall exist between the operation and the fifty-foot (50') buffer.

§ 140-4 Exemptions.

The following earth removal operations are exempted from the requirement to obtain a permit under this article:

- A. Earth removal associated with the installation of septic systems, which shall be governed by the Commonwealth of Massachusetts Environmental Code (Title 5, 310 CMR 15.000).
- B. Earth removal associated with any activity, which shall be governed by MGL c. 143 and the Commonwealth of Massachusetts Building Code (780 CMR).
- C. Earth removal that involves less than 1500 cubic yards.
- D. Earth removal, where the operation occurs entirely within an individual parcel and where a Town-accepted public way is not used for the transportation of the material.

ANNUAL TOWN MEETING – JUNE 13, 2020

- E. Earth removal within the right-of-way for a new subdivision road that has been approved by the Planning Board where there is already a bond in place with the Town to ensure performance.
- F. Earth removal in conjunction with a Driveway Permit issued by the Town of Lunenburg.

The aforementioned items are exempted provided that they do not exceed any of the following thresholds:

- i) the earth removal operation is limited to no more than three contiguous lots and does not exceed a total area of six acres, and
- ii) the operation is not conducted, maintained, and/or left in a condition so as to alter the natural drainage flow beyond the property; or to cause dust, silt, soil, or other materials to be deposited on adjacent properties; or to otherwise cause nuisances, hazards, or other objectionable conditions detrimental to health, safety, or property values in adjacent areas.
- iii) The excavation is not active for a period of time greater than is reasonable for the activity being conducted.
- iv) Any earth removal is limited to the necessary scope of the project.

The PGA shall, upon petition by an abutter or by any Town Official or Town Board, review an operation that is proceeding as exempt from the permit requirement pursuant to this § 140-4. If it is determined that the operation does not qualify for any of the exemptions outlined in § 140-4, a permit will be required.

§ 140-5 Continuation of Existing soil removal operations.

- A. An existing operation that had been issued a permit by the Board of Selectmen under the Earth Removal Bylaw that was in effect prior to the effective date of this Bylaw may continue to operate according to the terms of such permit, which shall hereafter be enforceable by the PGA pursuant to this article.
- B. The right of an existing operation to operate pursuant to § 140-5A under a permit previously issued by the Board of Selectmen, or to operate without a permit pursuant to § 140-5B, shall expire if the operation is discontinued. An operation shall be deemed to have been discontinued if no earth removal activity occurs at the site for a period of 12 consecutive months.

§ 140-6 Permit criteria for earth removal operations.

- A. Permits for earth removal operations shall be granted by the PGA only upon its written determination that the proposed use shall not cause substantial detriment to the neighborhood, or the Town, taking into account the characteristics of the site and the proposal in relation to the site and surrounding environment. In addition to any specific factors that may be set forth elsewhere in this article and its associated regulations adopted pursuant to § 140-8, such determination shall include consideration of each of the following:
 - (1) Social, economic, or community needs which are served by the proposal;
 - (2) Impact of the Earth Removal Operation on traffic flow and safety, including loading and unloading;
 - (3) Neighborhood character and the effect of the proposed Earth Removal Operation on that character;
 - (4) Impacts on the natural environment, including any proposed remediation for Earth Removal Activities; and
 - (5) Potential fiscal impact, including impact on Town services, tax base and property values.

ANNUAL TOWN MEETING – JUNE 13, 2020

B. Determination for each of the five criteria shall be set forth in the permit decision as findings of fact.

§ 140-7 **General limitations.**

A. No permit shall be issued for the removal of earth in any location if such an operation:

- (1) Will endanger the public safety, public health or constitute a nuisance.
- (2) Will produce noise, dust, or other noxious effects observable at the lot lines of the property in amounts objectionable or detrimental to the normal use of adjacent properties.
- (3) Will result in the transportation of materials in such manner as to cause traffic congestion, dust, spillage, noise, or other nuisances or hazards, particularly on residential streets.
- (4) Will result in the transportation over ways which will be unduly injured thereby.
- (5) Will result in a change of topography and cover which will be disadvantageous to the most appropriate final use of the land or to the use of lands adjacent to the site.
- (6) Will cause irreparable harm to or loss of important wildlife, wildlife habitat or rare plant species indigenous to the area.
- (7) Will result in stormwater damaging abutting properties.

B. Applicants are encouraged to submit a written statement regarding how each of the previous items will be addressed and/or mitigated.

§ 140-8 **Regulations.**

The PGA may adopt and periodically amend rules and regulations for the implementation of this article, by majority vote. Such rules and regulations may set forth performance standards for earth removal operations, impose filing and consultant fees, define additional terms not inconsistent with the article, and establish administrative procedures. Proposed Rules and Regulations shall be adopted by the PGA at a public hearing. Notice of the hearing shall be published by the PGA in a newspaper of general circulation in each of two successive weeks, the first publication being not less than 14 days before the day of said hearing. Failure by the PGA to adopt such rules and regulations or a legal declaration of their invalidity by a court of law shall not act to suspend or invalidate the effect of this article.

§ 140-9 **Permit procedures.**

- A. Any person wishing to obtain a permit to remove material on a property in the Town, or to use any public way within the Town for transporting such material, shall file a completed application for a permit together with any required supporting data and maps with the PGA and the filing fee, as established in the regulations of the PGA.
- B. Any permit issued is nontransferable and shall automatically expire upon completion of the earth removal project for which it was issued or at such time as may be specified in said permit. In no case shall a permit be issued initially for a period longer than one year. A permit may be renewed for up to two years or lesser time as determined by the PGA after evidence is presented that all conditions of the expiring permit have been complied with and the work has been performed in good faith. There is no limit on the number of permit renewals an applicant can apply for. A public hearing may be required by the PGA, at its discretion, for renewal of permits.
- C. Upon approval of all permits will expire on the following June 30. Thereafter all renewals will be for a period of 1 or 2 years running from July 1 to June 30.

ANNUAL TOWN MEETING – JUNE 13, 2020

§ 140-10 Public hearing.

- A. Once a complete permit application is filed with the PGA, the PGA shall set a date for a public hearing and so notify the applicant. Notice of the hearing shall be published by the PGA, at the applicant's expense, in a newspaper of general circulation in each of two successive weeks, the first publication being not less than 14 days before the day of said hearing. Notice of the hearing shall be given to all owners of real estate abutting upon the land specified in the permit application or lying within 300 feet of the subject parcel, all as appearing on the most recent tax list. The PGA will arrange for the publication and transmission of the notice of the hearing to the abutters, and the costs will be billed to the applicant. Final approval for the permit shall not be made until all hearing fees have been paid in full.
- B. The PGA's final action, rendered in writing, shall consist of either:
- (1) Approval of the application based upon determination that the proposed plan is in compliance with the standards set forth in this Bylaw; or
 - (2). Disapproval of the application based upon a determination that the proposed plan does not meet the standards set forth in this Bylaw; or
 - (3) Approval of the application subject to any condition, modification or restriction required by the Planning Board which will ensure that the project meets the standards set forth in this Bylaw.

§ 140-11 Bond or security.

The Board may require suitable bond or other security adequate to assure compliance with any of the provisions of this bylaw.

§ 140-12 Enforcement; violations and penalties.

- A. The PGA or its authorized agent shall enforce this article, its regulations, and the requirements and conditions of permits issued thereunder and may pursue civil and criminal remedies for violations of the same.
- B. The Building Inspector is authorized to conduct inspections on behalf of the PGA. To the extent permitted by law, or if authorized by the owner, operator, or other person in control of the site, the Building Inspector or other agent of the PGA may enter on the site to conduct inspections.
- C. The Building Inspector or other authorized agent of the PGA may issue such orders as are deemed necessary to stop violations and ensure compliance with this article, its regulations, and permits, including an order to cease and desist operations. Such orders may be issued by certified mail, return receipt requested, or by delivery, to the property owner, permit holder, or person responsible for operations at the site.
- D. The PGA may seek injunctive relief to restrain violations or to compel abatement or remediation of violations.
- E. Any person who violates any provision of this article or regulations, permits, and orders issued thereunder may be punished by a fine of not more than \$300 per offense. Each day that such violation occurs or continues shall constitute a separate offense.
- F. As an alternative to a criminal fine, the Town may utilize the noncriminal disposition procedures of MGL c. 40, § 21D, in which case the Building Inspector shall be the enforcing person. The penalty for the first offense shall be \$50. The penalty for the second offense shall be \$100. The penalty for the third and subsequent offenses shall be \$200.
- G. If the violator holds a permit issued under this article, the PGA may revoke the permit after a public

ANNUAL TOWN MEETING – JUNE 13, 2020

hearing, at which point all operations shall cease until such time as the necessary measures are taken to assure compliance with this article and a new permit is issued.

§ 140-13 Severability.

The provisions of this article are severable, and the invalidity of any section, subdivision, paragraph, or other part of this article shall not affect the validity or effectiveness of the remainder of the article.

§140-14 Road Openings

A. Permit Required; liability for cost:

No Town way or other way, whether it be the traveled or untraveled portion thereof, which the Town of Lunenburg is, by law, obligated to maintain and keep in repair shall be dug up, no opening made therein for any purpose, nor shall any material be dumped or placed thereon or removed therefrom, and no obstruction or structure shall be placed thereon or removed therefrom or changed without written permit from a majority of the Board of Selectmen and then only in accordance with the Board's regulations and the work shall be done under the supervision of the Director of the Department of Public Works. The entire expense of replacing and resurfacing the highway at the same level and in as good a condition as before, with materials equal in specifications to those removed, shall be paid by the person or persons to whom the permit was given or by whom the work was done.

B. Bond:

The Board of Selectmen may require a bond to guarantee the faithful and satisfactory performance of the work and payment for any damage to any such way caused by or resulting from the operations authorized by such permit. The amount of the bond shall be determined by the Selectmen, not to exceed the estimated cost of the work and any possible damage. (Board of Selectmen –no recommendation; Finance Committee – no financial impact) **ARTICLE 22 was DEFEATED (NO-29; YES-27) needed majority vote to pass.**

ARTICLE 23. To see if the Town will vote to amend Chapter 140 of the Town's General By-laws, entitled "Excavations and Earth Removal," Sections 140-1, 140-14 and 140-15, by deleting the words "Board of Selectmen," wherever they so appear, and substituting the words "Planning Board" therefor; or take any other action relative thereto. (Submitted by the Planning Board)

Article I

Earth Removal

[Adopted 5-12-1990 (Art. IX, § 9, of the Town Bylaws)]

§ 140-1 Definitions.

As used in this bylaw, the following terms shall have the meanings indicated:

ANNUAL TOWN MEETING – JUNE 13, 2020

BOARD

The Planning Board of the Town of Lunenburg.

EARTH

Includes soil, loam, sand, gravel, and stone.

§ 140-2 Purpose.

The purpose of this bylaw is to protect the health, safety and welfare of the public by regulating the removal of earth so as not to create dust, washouts, noise, ponds, and other hazardous land conditions.

§ 140-3 Enforcement; violations and penalties.

Any person, firm or corporation willfully violating, disobeying or refusing to comply with any of the provisions of this bylaw shall be prosecuted under the terms of MGL c. 40, § 21, para. 17, and shall be subject to a fine of not more than \$50 for the first offense, not more than \$100 for the second offense, and not more than \$200 for any subsequent offense. Each day during any portion of which such violation is allowed to continue shall be considered a separate offense. The Board may revoke or suspend the permit of any person, firm or corporation holding a permit under this bylaw if such person, firm or corporation violates, disobeys, or fails to comply with any of its provisions.

§ 140-4 Existing soil removal operations.

Any person, firm or corporation engaged in the operation of soil removal on the effective date of this bylaw may continue such operation for 30 days after such date, but shall, within said 30 days, apply for a permit in accordance with this bylaw. At the end of such 30 days, the operation shall be governed by the terms of the permit issued or, if no such permit is issued, shall cease.

§ 140-5 Severability.

The invalidity of any section of this bylaw shall not invalidate any other section or provision thereof.

§ 140-6 Permit required.

No earth in an amount in excess of 10 cubic yards shall be moved from any parcel of land within the Town of Lunenburg to another parcel either within or without the Town unless such removal is authorized by a permit issued by the Board. No earth in an amount in excess of 10 cubic yards shall be moved in less than ten-cubic-yard quantities over a period of time, deemed by the Board to be for the purpose of evading any of the provisions of this bylaw. No earth removal permit shall be issued until an application therefor is filed with the Board and the Board has held a public hearing on the application, after publication of the time and place, and subject matter sufficient for identification, in a newspaper having general distribution in the Town once in each of two successive weeks, the first publication to be not less than 14 days prior to said public hearing, and notice of such hearing shall be sent by mail to owners of abutting property prior to said public hearing.

§ 140-7 Application for permit.

Applications for such permits shall be accompanied by exhibits and documentation deemed necessary by the Board for the proper issuance of a permit, which shall include the following:

- A. Name and address of the legal owner of the land in question.
- B. Name and address of petitioner, if different, and names and addresses of owners of abutting property.

ANNUAL TOWN MEETING – JUNE 13, 2020

- C. An adequate and sufficient plan of land prepared by a registered engineer or land surveyor and indicating tract boundaries, adjacent streets and roads, the limits of the proposed excavation, the locations of all structures within 200 feet of said limits, original topography of five-foot contours, proposed final contours of five-foot intervals, and the location and proposed use of all structures and buildings to be used in connection with the removal operation. Any of the above provisions may be waived at discretion of the Board.
- D. Statement of plans for the disposal of rock, tree stumps and other waste material, and for the drainage of the site and excavation during and after the removal operation.
- E. Proposed closure plan as provided in § 140-13, unless waived at the discretion of the Board.

§ 140-8 Denial of permit.

No permit for earth removal shall be issued if such removal will:

- A. Endanger the general health, safety, or welfare or constitute a public nuisance.
- B. Result in detriment to the normal use of adjacent property by reason of noise, dust, erosion, or vibration.
- C. Result in traffic hazard in residential areas, or congestion and physical damage to public ways.

§ 140-9 Duration of permit.

No permit for any earth removal shall be issued for more than one year's duration, and may be renewed thereafter.

§ 140-10 Control of operation.

In approving the issuance of a permit, the Board shall impose all reasonable requirements which shall be deemed necessary by the Board and may include: grading, seeding, and planting, fencing necessary for public safety and screening unsightly operations, methods of removal, location and use of structures, hours of operation, routes of transportation of material removed, control of drainage, control of dust, disposition of waste material incident to the operation, due consideration for the preservation of the Town's natural resources, including inland swamps and waters and the aesthetic values, and final appearance of the property on completion of the operation.

§ 140-11 Bond or security.

The Board may require suitable bond or other security adequate to assure compliance with any of the provisions of this bylaw.

§ 140-12 Exemptions.

[Amended 1-10-1968]

This bylaw shall not be construed to apply to any such removal incidental to the construction or alteration of any structure for which a building permit has been issued, or to the removal incidental to the installation of any cesspool or septic tank for which a permit has been issued by the Board of Health, or to the grading or development of any approved subdivision or public way.

§ 140-13 Completion and closure.

[Amended 5-30-1986]

- A. The Board may require a closure plan before issuance of a permit, expiration or termination of an existing permit.

ANNUAL TOWN MEETING – JUNE 13, 2020

B. The closure plan must be approved and completed to the satisfaction of the Board before any:

- (1) Building/Construction.
- (2) Transfer of ownership.
- (3) Termination of bond or security.

C. The closure plan shall include:

- (1) Proposed final contours.
- (2) Proposed final drainage.
- (3) Proposed final revegetation.
- (4) A drawing, drawn to scale, showing the location of any material (rock, tree stumps or any other waste material) buried on the site.

§ 140-14 Permit fees.

Fees shall be established from time to time by the Planning Board. Failure to pay the earth removal permit renewal fee shall result in the automatic nonrenewal of the earth removal permit.

**Article II
Excavations**

[Adopted as Art. IX, § 10, of the Town Bylaws]

§ 140-15 Barriers required.

Owners of land which has been excavated shall erect barriers or take other suitable measures within five days after such owners have been notified in writing by the Planning Board that, in their opinion, such excavation constitutes a hazard to the public safety.

§ 140-16 Violations and penalties.

The penalty for violation of this bylaw shall be as follows:

- A. For the first offense: \$50.
- B. For the second offense: \$100.
- C. For each subsequent offense: \$200.

Meeting adjourned at 12:10 pm

SPECIAL TOWN MEETING

November 17, 2020

The November 17, 2020 Special Town Meeting was called to order at 7:00 p.m. The Moderator declared that the warrant was properly served and that a quorum was present and went over the ground rules including the COVID-19 precautions. Action commenced on Article 1 at 7:05 pm.

ARTICLE 1. To see if the Town will vote to raise and appropriate, borrow, or transfer from available funds, all sums of money necessary to amend the amounts voted for the Town's FY 2021 Budget, under Article 7 of the June 13, 2020 Town Meeting; or take any other action relative thereto. (Submitted by the Town Manager) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUSLY** to transfer from line #6/Group Health Insurance the sum of \$57,871.00; transfer to line #29/Technology Director the sum of \$11,745.00; transfer to line #39/Police Department the sum of \$30,161.00; transfer to line #43/Fire Department the sum of \$38,928.00; transfer to line #54/General Health Expense the sum of \$3,816.00; transfer to line #61/General Highway Maintenance the sum of \$27,000.00; and to transfer to line #71/Facilities & Grounds the sum of \$33,000.00; for a total increase of \$86,779.00 in the amount raised and appropriated under Article 7 of the June 13, 2020 Annual Town Meeting.

ARTICLE 2. To see if the Town will vote to raise and appropriate all sums of money necessary to amend the amounts voted for the FY 2021 Capital Plan, under Article 6 of the June 13, 2020 Town Meeting; or take any other action relative thereto. (Submitted by the Town Manager) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUSLY** to raise and appropriate the sum of \$487,507.39; transfer from Article 14 of the 5/3/14 Annual Town Meeting the sum of \$1,667.02; transfer from Article 15 of the 5/3/14 Annual Town Meeting the sum of \$85.00; transfer from Article 14 of the 5/2/15 Annual Town Meeting the sum of \$323.82; transfer from Article 14 of the 5/7/16 Annual Town Meeting the sum of \$65.48; transfer from Article 6 of the 5/5/18 Annual Town Meeting the sum of \$2,901.65; and transfer from Article 6 of the 5/4/19 Annual Town Meeting the sum of \$1,585.91; for a total appropriation of \$494,333.00 to fund the FY21 Deferred Capital Plan, as appearing in the November 17, 2020 Special Town Meeting Warrant.

ARTICLE 3. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money for payment of prior year expenses; or take any other action relative thereto. (Submitted by the Finance Director) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUS CONSENT** to raise and appropriate the sum of \$150.00 for payment of prior year expenses.

ARTICLE 4. To see if the Town will vote to raise and appropriate, borrow, or transfer from available funds, a sum of money, for the purpose of converting the Town's existing streetlights to energy efficient and long lasting LED fixtures or, alternatively, acquiring said streetlights for potential future conversion to energy efficient and long lasting LED fixtures; or take any other action relative thereto. (Green Communities Task Force) (Finance Committee and Select Board recommend approval) **VOTED (2/3rds Declared)** to raise and appropriate the sum of \$91,000 for the acquisition of street lights for potential future conversion to energy efficient and long lasting LED fixtures.

SPECIAL TOWN MEETING - November 17, 2020

ARTICLE 5. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to the Stabilization Fund; or take any other action relative thereto. (Submitted by the Town Manager) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUSLY** to raise and appropriate the sum of \$212,252.00 to the Stabilization Fund.

ARTICLE 6. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to the Special Purpose Stabilization Fund; or take any other action relative thereto. (Submitted by the Town Manager) (Finance Committee and Select Board recommend approval) **VOTED (2/3rds Declared)** to raise and appropriate the sum of \$250,000.00 to the Special Purpose Stabilization Fund.

ARTICLE 7. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to the OPEB Trust Fund that was created at the November 10, 2010 Special Town Meeting; or take any other action relative thereto. (Submitted by the Town Manager)) (Finance Committee and Select Board recommend approval) **VOTED (2/3rds Declared)** to raise and appropriate the sum of \$110,000.00 to the OPEB Trust Fund established at the November 30, 2010 Special Town Meeting.

ARTICLE 8. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to fund the first year of the FY 21, FY 22 and FY 23 Lunenburg Professional Firefighters Collective Bargaining Agreement dated July 1, 2020 – June 30, 2023 with PFFM Local 5358A; or take any action relative thereto. (Submitted by the Town Manager)) (Finance Committee and Select Board recommend approval) **VOTED** to transfer from Article 7 of the 6/13/20 Annual Town Meeting, line #13A/Salary Reserve the sum of \$16,463.57 to fund the FY21 Lunenburg Professional Firefighters Collective Bargaining Agreement dated July 1, 2020 – June 30, 2021 with PFFM Local 5358A.

ARTICLE 9. To see if the Town will vote to raise and appropriate or transfer from available funds, a sum of money to fund the first year of the FY 21, FY 22 and FY 23 Lunenburg Municipal Employees Collective Bargaining Agreement dated July 1, 2020 – June 30, 2023 with AFSCME, Council 93; or take any action relative thereto. (Submitted by the Town Manager)) (Finance Committee and Select Board recommend approval) **VOTED** to transfer from Article 7 of the 6/13/20 Annual Town Meeting, line 13A/ Salary Reserve the sum of \$13,389.43 to fund the FY21 Lunenburg Municipal Employees Collective Bargaining Agreement dated July 1, 2020 – June 30, 2021 with AFSCME, Council 93.

ARTICLE 10. To see if the Town will vote to transfer from available funds the sum of \$120,000 to the capital line of the FY21 PEG Access and Cable Related Enterprise Fund; or take any other action relative thereto. (Submitted by PACC)) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUS CONSENT** to transfer from PEG Access and Cable Related Enterprise Retained Earnings the sum of \$120,000.00 to the capital line of the FY21 PEG Access and Cable Related Enterprise Fund.

ARTICLE 11. To see if the Town will vote to transfer from available funds \$68,097.59 into the Reserve Capacity Stabilization Fund; or take any other action relative thereto. (Submitted by the Sewer Commission)) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUS CONSENT** to transfer from Sewer Enterprise Retained Earnings the sum of \$68,097.59 into the Sewer Reserve Capacity Stabilization Fund.

ARTICLE 12. To see if the Town will vote to appropriate all or a portion of the premium paid to the Town upon the sale of the Town's \$1,695,000.00 General Obligation Municipal Purpose Loan of 2020 Bonds, dated May 21, 2020, to pay costs of projects financed by such bonds and to reduce the amount authorized to be borrowed for such projects by a like amount, and/or to reserve all or a portion of the net premium to be appropriated for future capital projects; or take any other action relative thereto. (Submitted by Finance Director)) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUS CONSENT** to appropriate the following amounts from the net premium paid to the Town upon the sale of the Town's \$1,695,000.00 General Obligation Municipal Purpose Loan of 2020, bonds dated May 21, 2020; \$24,662.60 to pay the costs of the pavement management project being financed by such bonds, and to reduce the amount authorized to be borrowed for each such project by a like amount; and the Town hereby reserves the amount of \$3,543.11 of the net premium for future capital

SPECIAL TOWN MEETING - November 17, 2020

projects as required by MGL Chapter 44, S20.

ARTICLE 13. To see if the Town will vote to amend the Code of Lunenburg, Chapter 70, entitled "Salary Administration Plan," as follows: the position of Intermittent Heavy Equipment Operator to be added and assigned Grade 9; and the position of Principal Assessor to be added and assigned Grade 15; or take any other action relative thereto. (Submitted by the Personnel Committee)) (Finance Committee and Select Board recommend approval) **VOTED UNANIMOUS CONSENT** to amend the Code of Lunenburg, Chapter 70, entitled "Salary Administration Plan," as follows: the position of Intermittent Heavy Equipment Operator to be added and assigned Grade 9; and the position of Principal Assessor to be added and assigned Grade 15.

ARTICLE 14. To see if the Town will vote to authorize the Select Board to acquire, by gift, purchase, eminent domain, or otherwise, that certain property, determined to be unique, known as and numbered 250 Howard Street, more specifically identified in the Assessor's records as Map 16, Parcel 12, or any lesser portion thereof, for conservation and passive recreation purposes, to be under the care, custody and control of the Conservation Commission; and to raise, appropriate, borrow, or transfer from available funds a sum of money for said purpose, including the payment of all costs incidental thereto; or take any other action relative thereto. (Submitted by the Select Board) (Select Board recommend approval; Finance Committee – No Financial Impact)) **VOTED UNANIMOUS** to authorize the Select Board to acquire, by gift, a portion of property owned by The Annette Alatalo Trust, Annette Alatalo, Trustee, at 250 Howard Street, described in a deed recorded at the Worcester North Registry of Deeds at Book 4036, Page 1, a.k.a. Lunenburg Assessor Parcel ID 016-0012-00, which portion is situated northerly of a line fixed at its westerly terminus a distance of 200feet southerly of where the centerline of the Mulpus Brook crosses the property's westerly boundary, which line thereafter runs parallel to the property's northerly boundary to its easterly terminus a the property's easterly boundary, to be acquired by the Town under the provisions of Massachusetts General Laws, Chapter 40, Section 8D, as it may hereafter be amended, and other Massachusetts statutes relating to conservation, to be under the care, custody and control of the Conservation Commission for conservation and passive recreation purposes.

ARTICLE 15. To see if the Town will vote to authorize the Select Board to exercise the Town's right of first refusal under the provisions of Massachusetts General Laws, Chapter 61, Section 8, as it may hereafter be amended, and to acquire, by gift, purchase, eminent domain or otherwise, that certain property, determined to be unique, owned by The Annette Alatalo Trust, Annette Alatalo, Trustee, being the land located at 250 Howard Street and that is described in a deed recorded at the Worcester North District Registry of Deeds at Book 4036, Page 1, containing approximately 15.22 acres and being shown on a plan of land recorded at said Registry in Plan Book 159, Plan 11, a.k.a. Lunenburg Assessor Parcel ID 016-0012-00, to be acquired by the Town under the provisions of Massachusetts General Laws, Chapter 40, Section 8C, as it may hereafter be amended, and other Massachusetts statutes relating to conservation, to be under the care, custody and control of the Conservation Commission for conservation and passive recreation purposes; and to raise and appropriate, borrow, or transfer from available funds a sum of \$50,000 for said purpose, including the payment of all costs incidental or relative thereto; and that authorize the Select Board to enter into all agreements and execute any and all instruments as may be necessary on behalf of said Town to effect the aforesaid acquisition; or take any other action relative thereto. (Submitted by the Open Space Committee) (Select Board recommend passing over this article; Finance Committee – No Financial Impact)

ARTICLE 15 was PASSED OVER.

ARTICLE 16. To see if the Town will vote, pursuant to Massachusetts General Law Chapter 40, Section 59, and Chapter 23A, Sections 3A through 3F, and the applicable regulations thereunder, (a) to approve a Tax Increment Financing (TIF) Agreement between the Town and MA Greenhouse LLC, for property shown on Assessors Map 57, Parcel 31, and located at 361 Massachusetts Avenue (the "TIF Agreement"), which TIF Agreement provides for real estate tax exemptions at the exemption rate schedules set forth therein; (b) to authorize the Select Board to execute the TIF Agreement, and any documents

SPECIAL TOWN MEETING - November 17, 2020

related thereto, and to take such other actions as are necessary or appropriate to implement those documents; and (c) to approve application to the Economic Assistance Coordinating Council (EACC) under the Economic Development Incentive Program for approval and designation of the Economic Opportunity Area, TIF Zone and TIF Plan for 361 Massachusetts Avenue; or to take any other action relative thereto.

(Submitted by the Select Board) (Finance Committee and Select Board recommend approval) **VOTED** pursuant to Massachusetts General Law Chapter 40, Section 59, and Chapter 23A, Sections 3A through 3F, and the applicable regulations thereunder, (a) to approve a Tax Increment Financing (TIF) Agreement between the Town and MA Greenhouse LLC, for property shown on Assessors Map 57, Parcel 31, and located at 361 Massachusetts Avenue (the "TIF Agreement"), which TIF Agreement provides for real estate tax exemptions at the exemption rate schedules set forth therein; (b) to authorize the Select Board to execute the TIF Agreement, and any documents related thereto, and to take such other actions as are necessary or appropriate to implement those documents; and (c) to approve application to the Economic Assistance Coordinating Council (EACC) under the Economic Development Incentive Program for approval and designation of the Economic Opportunity Area, TIF Zone and TIF Plan for 361 Massachusetts Avenue.

ARTICLE 17. To see if the Town will vote to hear an interim report from the TCP Building Design Committee and/or from representative (s) from the design firm; or take any other action relative thereto. (Submitted by the TCP Building Design Committee) (Finance Committee and Select Board recommend approval) **VOTED** to hear an interim report from the TCP Building Design Committee.

ARTICLE 18. To see if the Town will vote to transfer the care, custody, and control of certain property known as and numbered 111 Mulpus Road Rear, more specifically identified in the Assessor's records as Map 43, Parcel 25, from the Select Board for general municipal purposes to the Conservation Commission for conservation and passive recreation purposes; or take any other action relative thereto. (Submitted by the Conservation Commission) (Select Board recommend approval; Finance Committee – No Financial Impact) **VOTED UNANIMOUSLY** to transfer the care, custody, and control of certain property known as and numbered 111 Mulpus Road Rear, more specifically identified in the Assessor's records as Map 43, Parcel 25, from the Select Board for general municipal purposes to the Conservation Commission for conservation and passive recreation purposes.

ARTICLE 19. To see if the Town will vote to transfer the care, custody, and control of certain property known as and numbered 970 NW Townsend Road Rear, more specifically identified in the Assessor's records as Map 4, Parcel 1, from the Select Board for general municipal purposes to the Conservation Commission for conservation and passive recreation purposes; or take any other action relative thereto. (Submitted by the Conservation Commission) (Select Board recommend approval; Finance Committee – No Financial Impact) **VOTED UNANIMOUSLY** to transfer the care, custody, and control of certain property known as and numbered 111 Mulpus Road Rear, more specifically identified in the Assessor's records as Map 43, Parcel 25, from the Select Board for general municipal purposes to the Conservation Commission for conservation and passive recreation purposes.

ARTICLE 20: To see if the Town will vote to amend the Code of Lunenburg, Chapter 204-1, entitled "Stormwater Management; NPDES Phase II Permits," as depicted below, with additions underlined and deletions stricken-through, or take any other action relative thereto. (Submitted by the Planning Board) (Select Board recommend approval; Finance Committee – No Financial Impact) **VOTED** to amend the Code of Lunenburg, Chapter 204-1, entitled "Stormwater Management; NPDES Phase II Permits," as depicted below, with additions underlined and deletions stricken-through.

§ 204-1 Stormwater management; NPDES Phase II permits.

A. Purpose and intent.

SPECIAL TOWN MEETING - November 17, 2020

- (1) Regulation of discharges to the municipal separate storm sewer system (MS4) is necessary for the protection of the Town of Lunenburg's water bodies and groundwater, and to safeguard the public health, safety, welfare and the environment. Increased and contaminated stormwater runoff associated with developed land uses and the accompanying increase in impervious surface are major causes of impairment of water quality and flow in lakes, ponds, streams, rivers, wetlands, and groundwater which result in the contamination of drinking water supplies; erosion of stream channels; alteration or destruction of aquatic and wildlife habitat; and flooding. This bylaw establishes minimum stormwater management standards for the final conditions that result from development and redevelopment projects to minimize adverse impacts off-site and downstream which would be borne by abutters, townspeople and the general public.
- (2) This regulation requires local review and approval of a stormwater management plan for all development and redevelopment projects that disturb one acre or more. In addition to these regulations, the owner and/or developer is also obligated to meet the requirements of the Federal Environmental Protection Agency's (EPA) regulations for stormwater management.

B. The following definitions shall apply in the interpretation and implementation of this Bylaw. Additional definitions may be adopted by separate regulation:

- (1) ACRE: forty-three thousand, five-hundred and sixty square feet (43,560 sq. ft.)
- (2) AGRICULTURAL USE: The normal maintenance or improvement of land in agricultural or aquacultural use, as defined by the Massachusetts Wetlands Protection Act, M.G.L. c. 131, § 40, and its implementing regulations.
- (3) ALTER: Any activity, which will measurably change the ability of a ground surface area to absorb water or will change existing surface drainage patterns. Alter may be similarly represented as "alteration of drainage characteristics," and "conducting land disturbance activities."
- (4) APPLICANT: Any person, individual, partnership, association, firm, company, corporation, trust, authority, agency, department, or political subdivision, of the Commonwealth of Massachusetts or the federal government to the extent permitted by law requesting a Stormwater Management Permit for proposed land-disturbance activity.
- (5) BEST MANAGEMENT PRACTICE (BMP): Structural, non-structural and managerial techniques that are recognized to be the most effective and practical means to prevent and/or reduce increases in stormwater volumes and flows, reduce point source and nonpoint source pollution, and promote stormwater quality and protection of the environment. "Structural" BMPs are devices that are engineered and constructed to provide temporary storage and treatment of stormwater runoff. "Nonstructural" BMPs use natural measures to reduce pollution levels, do not require extensive construction efforts, and/or promote pollutant reduction by eliminating the pollutant source.
- (6) BETTER SITE DESIGN: Site design approaches and techniques that can reduce a site's impact on the watershed through the use of nonstructural stormwater management practices. Better site design includes conserving and protecting natural areas and greenspace, reducing impervious cover, and using natural features for stormwater management.
- (7) CERTIFICATE OF COMPLETION: Document issued by the Town of Lunenburg Planning Board, its employees, or authorized agents upon receipt of a final inspection report and acknowledgement that all conditions of the Stormwater Management Permit have been satisfactorily completed.
- (8) ENFORCEMENT ORDER: A written order issued by the Town of Lunenburg to enforce the provisions of this Article.

SPECIAL TOWN MEETING - November 17, 2020

- (9) MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) or MUNICIPAL STORM DRAIN SYSTEM: The system of conveyances designed or used for collecting or conveying stormwater, including any road with a drainage system, street, gutter, curb, inlet, piped storm drain, pumping facility, retention or detention basin, natural or man-made or altered drainage channel, reservoir, and other drainage structure that together comprise the storm drainage system owned or operated by the Town of Lunenburg, MA.
- (10) NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) STORMWATER DISCHARGE PERMIT: A permit issued by the EPA or jointly with the Commonwealth of Massachusetts that authorizes the discharge of stormwater to waters of the United States.
- (11) NEW DEVELOPMENT: Any construction, land alteration, or addition of impervious surfaces on previously undeveloped sites resulting in a total disturbance of land equal to or greater than 1 acre (or activities that are part of a larger common plan of development disturbing greater than 1 acre) that does not meet the definition of Redevelopment.
- (12) NONPOINT SOURCE POLLUTION: Pollution from many diffuse sources caused by rainfall or snowmelt moving over and through the ground. As the runoff moves, it picks up and carries away natural and human-made pollutants, finally depositing them into water resource areas.
- (13) OWNER: A person with a legal or equitable interest in property.
- (14) PERSON: Any individual, group of individuals, association, partnership, corporation, company, business organization, trust, estate, the Commonwealth or political subdivision thereof to the extent subject to Town Bylaws, administrative agency, public or quasi-public corporation or body, the Town of Lunenburg and any other legal entity, its legal representatives, agents, or assigns.
- (15) PRE-DEVELOPMENT: The conditions that exist at the time that plans for the land development of a tract of land are submitted to the Lunenburg Conservation Commission or Planning Board. Where phased development or plan approval occurs (preliminary grading, roads and utilities, etc.), the existing conditions at the time prior to the first plan submission shall establish predevelopment conditions.
- (16) POST-DEVELOPMENT: The conditions that reasonably may be expected or anticipated to exist after completion of the land development activity on a specific site or tract of land. Post-development refers to the phase of a new development or redevelopment project after completion, and does not refer to the construction phase of a project.
- (17) RECHARGE: The replenishment of underground water reserves.
- (18) REDEVELOPMENT: Development, rehabilitation, expansion, demolition, or phased projects that disturb the ground surface or increase the impervious area on previously developed sites. Any construction, land alteration, or improvement of impervious surfaces resulting in total disturbance of land equal to or greater than 1 acre (or activities that are part of a larger common plan of redevelopment disturbing greater than 1 acre) that does not meet the definition of New Development.

SPECIAL TOWN MEETING - November 17, 2020

(19) STORMWATER AUTHORITY: The Town of Lunenburg Planning Board or its authorized agent (s). The Planning Board is responsible for coordinating the review, approval and permit process as defined in this Bylaw.

(20)STORMWATER MANAGEMENT PERMIT (SMP): A permit issued by the Planning Board after review of an application, plans, calculations, and other supporting documents, which is designed to protect the environment of the Town from the deleterious effects of uncontrolled and untreated stormwater runoff.

(21) WATERS OF THE COMMONWEALTH: All waters within the jurisdiction of the Commonwealth of Massachusetts, including, without limitation, rivers, streams, lakes, ponds, springs, impoundments, estuaries, wetlands, coastal waters, groundwaters, and vernal pools.

(22)WETLAND RESOURCE AREAS: Areas specified in the Massachusetts Wetlands Protection Act Regulations, 310 CMR 10.00, as amended, and in the Town of Lunenburg Article XXI General Wetlands Protection Bylaw, as amended.

~~B.~~ C The objectives of this bylaw are:

- (1) To require practices to control the flow of stormwater from new and redeveloped sites to the Town's storm drainage system in order to prevent flooding and erosion;
- (2) To protect groundwater and surface water from degradation;
- (3) To promote groundwater recharge;
- (4) To prevent pollutants from entering the Town's municipal separate storm sewer system (MS4) and to minimize discharge of pollutants from the MS4;
- (5) To ensure adequate long-term operation and maintenance of structural stormwater best management practices so that they work as designed;
- (6) To comply with state and federal statutes and regulations relating to stormwater discharges; and
- (7) To establish Lunenburg's legal authority to ensure compliance with the provisions of this bylaw through inspection, monitoring, and enforcement.

(8) Establish regulations of land development activities that preserve the health of water resources.

(9) Require that the amount and quality of stormwater runoff from new development is equal to or better than pre-development conditions in order to reduce flooding, stream erosion, pollution, property damage and harm to aquatic life.

(10) Establish stormwater management standards and design criteria to control the quality and quantity of stormwater runoff.

(11) Encourage the use of low-impact development practices, such as reducing impervious cover and preserving greenspace and other natural areas.

SPECIAL TOWN MEETING - November 17, 2020

~~C~~ D. Applicability. No person may undertake a construction activity following the effective date of this Bylaw, including clearing, grading and excavation that results in a land disturbance that will disturb equal to or greater than one acre of land or will disturb less than one acre of land but part of a larger common plan of development or sale that will ultimately disturb equal to or greater than one acre of land ~~draining to the Town of Lunenburg's municipal separate storm sewer system~~, without a permit from the ~~special~~ permit granting authority. Construction activity does not include routine maintenance that is performed to maintain the original line and grade, hydraulic capacity or the original purpose of the site. Construction activities that are exempt are:

- (1) Normal maintenance and improvement of land in agricultural use as defined by the Wetlands Protection Act regulation, 310 CMR 10.04;
- (2) Maintenance of existing landscaping, gardens or lawn areas associated with a single-family dwelling;
- (3) The construction of fencing that will not substantially alter existing terrain or drainage patterns;
- (4) Construction of utilities other than drainage (gas, water, electric, telephone, etc.) which will not alter terrain or drainage patterns;
- ~~(5) Work activities of municipal, state or federal agencies or their agents outside of the Phase II boundaries as shown on the latest U.S. Environmental Protection Agency's National Pollutant Discharge Elimination System (NPDES) Phase II maps. Emergency repairs to any stormwater management facility or practice that poses a threat to public health or safety.~~
- ~~(6) As authorized in the Phase II Small MS4 General Permit for Massachusetts, stormwater discharges resulting from the activities identified in Subsection C(1) that are wholly subject to jurisdiction under the Wetlands Protection Act and demonstrate compliance with the Massachusetts Stormwater Management Policy as reflected in an order of conditions issued by the Conservation Commission are exempt from compliance with this bylaw.~~

~~D~~ E. Permits and procedures.

- (1) The ~~special~~ permit granting authority (~~SPGA~~) under this bylaw shall be the Lunenburg Planning Board. Such ~~special~~ permit shall be granted if the ~~SPGA~~ determines, in conjunction with the Conservation Commission, Department of Public Works, Board of Health and Building Commissioner, that the intent of this bylaw, as well as specific criteria, are met. The ~~SPGA~~ shall not grant a special permit under this section unless the petitioner's application materials include, in the ~~SPGA~~'s opinion, sufficiently detailed, definite, and credible information to support positive findings in relation to the standards given in this section. The ~~SPGA~~ shall document the basis for any departures from the recommendations of the other Town boards or departments in its decision.
- (2) The site owner or his agent shall file with the ~~SPGA~~ ~~130~~ copies of a completed application package for a stormwater management permit (SMP). Permit issuance is required prior to any site-altering activity. While the applicant can be a representative, the permittee must be the owner of the site. The SMP application package shall include:
 - (a) A completed application form with original signatures of all owners;
 - (b) ~~Ten~~ Thirteen copies of the stormwater management plan and project description as specified in ~~Subsection E(1)~~ F of this Bylaw;

SPECIAL TOWN MEETING - November 17, 2020

- (c) ~~Ten~~ Thirteen copies of the erosion and sediment control operation and maintenance plan as required by Subsection ~~F G~~ of this ~~bylaw~~ Bylaw;
 - (d) Thirteen copies of the operation and maintenance plan as required by Section H of this Bylaw.
 - (e) Payment of the application and review fees.
 - (f) A Certified List of Abutters within 300 feet of the property boundaries, obtained from the Assessor's Office, along with 2 stamped envelopes for each unique abutter contained in the list. Abutters located in other communities and within 300 feet of the property boundaries must also be included.
 - (g) A PDF file or files containing all application materials and plans emailed to the Planning Board Office.
- (3) Entry. Filing and application for a permit grants the SPGA, or its agent, permission to enter the site to verify the information in the application and to inspect for compliance with the resulting permit.
- (4) Other boards. The ~~SPGA~~ shall give one copy of the application package to the designated technical reviewers, which include the Conservation Commission, Department of Public Works, and Building Commissioner, for the purpose of reviewing the permit application. The SPGA may also engage the services of a peer review engineer at its discretion.
- (1) (5) Fee structure.
- (2) The PGA shall obtain with each submission an application fee established by the PGA. To assist the PGA in its review of plans during the Permit approval process, the PGA, at its discretion may hire an engineer or other qualified professional to act as a consultant to the Board. The cost of these consultant services shall be paid by the Applicant and the PGA will not sign any Permit decision until all consulting fees are paid in full.
- Applicants must pay the following fees before the permitting process may begin:
- (a) Application Fee \$100/ Acre rounded up to the nearest acre
(Maximum fee is \$1,000)
 - (b) Application fee for an amendment \$100
 - (c) Fees for a professional peer review Assessed on a case by case basis
- ~~The SPGA shall obtain with each submission an application fee established by the SPGA. The SPGA is authorized to retain a registered professional engineer or other professional consultant to advise the SPGA on any or all aspects of these plans. Applicants must pay review fees before the review process may begin.~~
- (6) Actions. The SPGA's action, rendered in writing, shall consist of either:
- (a) Approval of the stormwater management permit application based upon determination that the proposed plan meets the standards in Subsection ~~EF~~ (2) and will adequately protect the water resources of the community and is in compliance with the requirements set forth in this bylaw;
 - (b) Approval of the stormwater management permit application subject to any conditions, modifications or restrictions required by the SPGA which will ensure that the project meets the standards in Subsection ~~EF~~ (2) and adequately protects water resources, as set forth in this bylaw;

SPECIAL TOWN MEETING - November 17, 2020

- (c) Disapproval of the stormwater management permit application based upon a determination that the proposed plan, as submitted, does not meet the standards in Subsection ~~EF~~(2) or adequately protect water resources, as set forth in this bylaw.
- (7) Project completion. At completion of the project, the permittee shall submit as-built record drawings of all structural stormwater controls and treatment best management practices required for the site. The as-built drawing shall show deviations from the approved plans, if any, and be certified by a registered professional engineer.
- E. Contents of stormwater management plan.
 - (1) Application. The stormwater management plan shall contain sufficient information for the SPGA to evaluate the environmental impact, effectiveness, and acceptability of the measures proposed by the applicant for reducing adverse impacts from stormwater. The plan shall be designed to meet the Massachusetts stormwater management standards as set forth in Subsection ~~EF~~(2) below and the current edition of the Department of Environmental Protection guidelines and policies. The plan shall be designed to also meet the policy standards of the SPGA. The stormwater management plan shall fully describe the project in drawings, and narrative. It shall include, at a minimum:
 - (a) Names, addresses, and telephone numbers of the owner, applicant, and person(s) or firm(s) preparing the plan;
 - (b) Locus map;
 - (~~bc~~) The existing zoning, and land use at the site;
 - (~~ed~~) The proposed land use;
 - (~~ed~~) The location(s) of existing and proposed easements;
 - (~~ef~~) The location of existing and proposed utilities;
 - (~~fg~~) The site's existing and proposed topography, with contours at one or two-foot intervals and additional spot grades as needed to depict detailed drainage patternst~~two-foot intervals~~;
 - (~~gh~~) The existing site hydrology (both groundwater recharge and surface runoff);
 - (~~hi~~) A description and delineation of existing stormwater conveyances, impoundments, ~~and wetlands~~ drinking water resource areas, sewage disposal systems, swimming beaches, or other critical environmental resource areas, on or adjacent to the site or into which stormwater flows;
 - (~~ij~~) Description of subsurface conditions in areas to be used for stormwater retention, detention, or infiltration;
 - (~~k~~) A delineation of one-hundred-year floodplains, if applicable;
 - (~~jl~~) Estimated high groundwater elevation in areas to be used for stormwater retention, detention, or infiltration, determined as outlined in 310 CMR 15.103;

SPECIAL TOWN MEETING - November 17, 2020

- (~~km~~) The existing and proposed vegetation and ground surfaces, with runoff coefficient for each;
- (~~ln~~) A drainage area map showing pre- and post-construction watershed boundaries, drainage area and stormwater flow paths;
- (~~mo~~) A description and drawings of all components of the proposed drainage system, including:
- [1] Locations, cross sections, and profiles of all brooks, streams, drainage swales and their method of stabilization;
 - [2] All measures for the detention, retention, or infiltration of water;
 - [3] All measures for the protection of water quality;
 - [4] The structural details for all components of the proposed drainage systems and stormwater management facilities;
 - [5] Notes on drawings specifying materials to be used, construction specifications, and typicals; and
- [6] Analysis of existing and proposed hydrology with supporting calculations;
- [7] Calculations supporting the estimate of stormwater treatment performance; and
- [8] Calculations supporting the design of infiltration practices, including design infiltration rates, estimated dewatering times, and mounding analyses, where applicable.
- ~~Expected hydrology, with supporting calculations;~~
- (~~np~~) Proposed improvements, including location of buildings or other structures, impervious surfaces, and drainage facilities, if applicable;
- (~~eq~~) Timing, schedules, and sequence of development, including clearing, stripping, rough grading, construction, final grading, and vegetative stabilization;
- (~~pr~~) A maintenance schedule for the period of construction; ~~and~~
- (~~qs~~) Stormwater runoff shall be calculated using latest Northeast Regional Climate Center (NRCC) extreme precipitation amounts for recurrence intervals (storm events) 2-, 10-, 25-, 50- and 100-year frequencies; Any other information requested by the SPGA.
- (t) An Erosion and Sediment Control Plan as detailed in Section G;
- (u) An Operation and Maintenance Plan as detailed in Section H; and,
- (v) Any other information requested by the PGA.

(2) Standards. Projects shall meet the standards of the Massachusetts Stormwater Management Policy, which are as follows:

SPECIAL TOWN MEETING - November 17, 2020

(a) No new stormwater conveyances (e.g., outfalls) may discharge untreated stormwater directly to or cause erosion in wetlands or water of the commonwealth;

(b) Low Impact Development (LID) site planning and design strategies must be implemented if practicable in order to reduce the discharge of stormwater from development sites;

(c) Stormwater management system design shall be consistent with the intent and guidance provided by the latest Massachusetts Stormwater Handbook and per industry standard methods. While design should be completed per Massachusetts Stormwater Handbook specifications to the fullest extent feasible, the PGA reserves the right to waive and/or modify minor disparities between the design and the Massachusetts Stormwater Handbook on a project-specific basis.

(d) Stormwater management systems on new development shall be designed to meet an average annual pollutant removal equivalent to 90% of the average annual load of Total Suspended Solids (TSS) related to the total post-construction impervious area on the site AND 60% of the average annual load of Total Phosphorus (TP) related to the total post-construction impervious surface area on the site.

[1] Average annual pollutant removal requirements in E.2.(d) are achieved through one of the following methods:

(i) Installing BMPs that meet the pollutant removal percentages based on calculations developed consistent with EPA Region 1's BMP Accounting and Tracking Tool (2016) or other BMP performance evaluation tool provided by EPA Region 1, where available. If EPA Region 1 tools do not address the planned or installed BMP performance, then any federally or State-approved BMP design guidance or performance standards (e.g., State stormwater handbooks and design guidance manuals) may be used to calculate BMP performance; or

(ii) Retaining the volume of runoff equivalent to, or greater than, 1.0 inch multiplied by the total post-construction impervious surface area on the new development site; or

(iii) Meeting a combination of retention and treatment that achieves the above standards; or

(iv) Utilizing offsite mitigation that meets the above standards within the same USGS HUC12 as the new development site.

(e) Stormwater management systems on redevelopment sites shall be designed to meet an average annual pollutant removal equivalent to 80% of the average annual post-construction load of TSS related to the total post-construction impervious area on the site AND 50% of the average annual load of TP related to the total post-construction impervious surface area on the site.

SPECIAL TOWN MEETING - November 17, 2020

[1] Average annual pollutant removal requirements in E.2.(e) are achieved through one of the following methods:

- (i) Installing BMPs that meet the pollutant removal percentages based on calculations developed consistent with EPA Region 1's BMP Accounting and Tracking Tool (2016) or other BMP performance evaluation tool provided by EPA Region 1, where available. If EPA Region 1 tools do not address the planned or installed BMP performance, then any federally or State-approved BMP design guidance or performance standards (e.g., State stormwater handbooks and design guidance manuals) may be used to calculate BMP performance; or
- (ii) Retaining the volume of runoff equivalent to, or greater than, 0.8 inches multiplied by the total post-construction impervious surface area on the redevelopment site; or
- (iii) Meeting a combination of retention and treatment that achieves the above standards; or
- (iv) Utilizing offsite mitigation that meets the above standards within the same USGS HUC12 as the redevelopment site.

(f) Redevelopment activities that are exclusively limited to maintenance and improvement of existing roadways, (including widening less than a single lane, adding shoulders, correcting substandard intersections, improving existing drainage systems, and repaving projects) shall improve existing conditions where feasible and are exempt from part Section F.2.(e). Roadway widening or improvements that increase the amount of impervious area on the redevelopment site by greater than or equal to a single lane width shall meet the requirements of Section F.2.(e).

(3) Project changes. The permittee, or its agent, shall notify the PGA in writing of any change or alteration of a land-disturbing activity authorized in a stormwater management permit before any change or alteration occurs. If the PGA determines that the change or alteration is significant, based on the design standards listed in Subsection F(2) and accepted construction practices, the PGA may require that an amended stormwater management permit application be filed and a public hearing held. If any change or deviation from the stormwater management permit occurs during a project, the PGA may require the installation of interim measures before approving the change.

~~No new stormwater conveyances (e.g., outfalls) may discharge untreated stormwater directly to or cause erosion in wetlands or water of the commonwealth.~~

~~(b) Stormwater management systems must be designed so that post-development peak discharge rates do not exceed pre-development peak discharge rates.~~

~~(c) Loss of annual recharge to groundwater should be minimized through the use of infiltration measures to the maximum extent practicable. The annual recharge from the post-development site should approximate the annual recharge rate from the pre-development or existing site conditions, based on soil types.~~

~~(d) For new development, stormwater management systems must be designed to remove 80% of the average annual load (post-development conditions) of total suspended solids (TSS). It is presumed that this standard is met when:~~

~~[1] Suitable nonstructural practices for source control and pollution prevention are implemented;~~

- ~~[2]—Stormwater management best management practices (BMPs) are sized to capture the prescribed runoff volume; and~~
- ~~[3]—Stormwater management BMPs are maintained as designed.~~
- ~~(e)—Stormwater discharges from areas with higher potential pollutant loads require the use of specific stormwater management BMPs. The use of infiltration practices without pretreatment is prohibited.~~
- ~~(f)—Stormwater discharges to critical areas must utilize certain stormwater management BMPs approved for critical areas (see MA DEP's Stormwater Management Volume I: Stormwater Policy Handbook). Critical areas are outstanding resource waters (ORWs), cold water fisheries, and recharge areas for public water supplies.~~
- ~~(g)—Redevelopment of previously developed sites must meet the stormwater management standards to the maximum extent practicable. However, if it is not practicable to meet all the standards, new (retrofitted or expanded) stormwater management systems must be designed to improve existing conditions.~~
- ~~(h)—Erosion and sediment controls must be implemented to prevent impacts during disturbance and construction activities.~~
- ~~(i)—All stormwater management systems must have an operation and maintenance plan to ensure that systems function as designed.~~
- ~~(j)—When one or more of the standards cannot be met, an applicant may demonstrate that an equivalent level of environmental protection will be provided.~~
- ~~(3) Project changes. The permittee, or its agent, shall notify the SPGA in writing of any change or alteration of a land disturbing activity authorized in a stormwater management permit before any change or alteration occurs. If the SPGA determines that the change or alteration is significant, based on the design standards listed in Subsection E(2) and accepted construction practices, the SPGA may require that an amended stormwater management permit application be filed and a public hearing held. If any change or deviation from the stormwater management permit occurs during a project, the SPGA may require the installation of interim measures before approving the change.~~
- (G.) Erosion and sediment control plans. An erosion and sediment control plan is required at the time of application for all projects. The erosion and sediment control plan shall contain sufficient information about the nature and purpose of the proposed development, pertinent conditions of the site and adjacent areas, proposed erosion and sedimentation controls, and proposed control for other wastes on construction sites such as demolition debris, litter, and sanitary wastes to ensure they are not discharged to the MS4, drainage system, or waters of the commonwealth. The applicant shall submit such material as is necessary to show that the proposed development will comply with the design requirements as follows:
- (1) Minimize total area of disturbance.
- (2) Sequence activities to minimize simultaneous areas of disturbance.
- (3) Minimize soil erosion and control sedimentation during construction, provided that prevention of erosion is preferred over sedimentation control.

(4) Divert uncontaminated water around disturbed areas.

(5) Maximize infiltration and groundwater recharge.

(6) Install, inspect, and maintain all Erosion and Sediment Control measures in accordance with the manufacturer's specifications and good engineering practices.

(7) Prevent off-site transport of sediment and wastes.

(8) Protect all storm drain inlets and armor all newly constructed outlets.

(9) Protect and manage on and off-site material storage areas (overburden and stockpiles of dirt, borrow areas, or other areas used solely by the permitted project are considered a part of the project).

(10) Comply with applicable federal, state and local laws and regulations including waste disposal, sanitary sewer or septic system regulations, and air quality requirements, including dust control.

(11) Institute interim and permanent stabilization measures, which shall be instituted on a disturbed area as soon as practicable but no more than fourteen (14) days after construction activity has temporarily or permanently ceased on that portion of the site.

(12) Properly manage on-site construction waste and materials.

(13) Stabilize construction site entrances and exits and prevent off-site vehicle tracking of sediments.

(14) Ensure that any stormwater BMP (for post-construction stormwater management) installed during construction will be protected from compaction, siltation, and erosion or will be restored or replaced such that the BMP will be capable of functioning as designed in accordance with these stormwater regulations.

F.H. Operation and maintenance plans. An operation and maintenance plan (O&M plan) is required at the time of application for all projects. The maintenance plan shall be designed to ensure compliance with the permit, this bylaw and that the Massachusetts Surface Water Quality Standards, 314 CMR 4.00 are met in all seasons and throughout the life of the system. The operation and maintenance plan shall remain on file with the **SPGA** and shall be an ongoing requirement. The O&M plan shall include:

- (1) The name(s) of the owner(s) for all components of the system.
- (2) Maintenance agreements that specify:
 - (a) The names and addresses of the person(s) responsible for operation and maintenance.
 - (b) The person(s) responsible for financing maintenance and emergency repairs.
- (3) Maintenance schedule for all drainage structures, including swales and ponds.
- (4) List of easements, with the purpose and location of each.

SPECIAL TOWN MEETING - November 17, 2020

- (5) The signature(s) of the owner(s).
- (6) Stormwater management easement(s).
 - (a) Stormwater management easements shall be provided by the property owner(s) as necessary for:
 - [1] Access for facility inspections and maintenance.
 - [2] Preservation of stormwater runoff conveyance, infiltration, and detention areas and facilities, including flood routes for the one-hundred-year storm event.
 - [3] Direct maintenance access by heavy equipment to structures requiring regular cleanout.
 - (b) The purpose of each easement shall be specified in the maintenance agreement signed by the property owner.
 - (c) Stormwater management easements are required for all areas used for off-site stormwater control, unless a waiver is granted by the SPGA.
 - (d) Easements shall be recorded with the Worcester County Registry of Deeds prior to issuance of a certificate of completion by the SPGA.
- (7) Changes to operation and maintenance plans.
 - (a) The owner(s) of the stormwater management system must notify the SPGA of changes in ownership or assignment of financial responsibility.
 - (b) The maintenance schedule in the maintenance agreement may be amended to achieve the purposes of this bylaw by mutual agreement of the SPGA and the responsible parties. Amendments must be in writing and signed by all responsible parties. Responsible parties shall include the owner(s), persons with financial responsibility, and persons with operational responsibility.
- (8) Stormwater infrastructure shall be privately owned, inspected and maintained per the operation and maintenance plan approved for the project. Inspection and maintenance logs shall be provided to the Planning Board on a yearly basis by final day in June for the Town to use in preparation of its annual report to the EPA as part of the NPDES permit requirements.
- (9) The O&M Plan shall include procedures for using dedicated funds, establishing an escrow account, and/or developing a maintenance contract, if determined appropriate to ensure adequate long-term maintenance.
- (10) Stormwater Management operation and maintenance duties shall be recorded with the deed for each lot in a subdivision. The applicant may elect to setup a home owner's association (HOA) or other means to ensure all BMPs are inspected and maintained as required.
- (11) Long-term operators responsible for O&M Plan implementation shall submit an annual report to the Planning Board documenting all inspection and maintenance completed on the stormwater system.

SPECIAL TOWN MEETING - November 17, 2020

G.J. Surety. The **SPGA** may require the permittee to post, before the start of land disturbance or construction activity, a surety bond, cash, or other acceptable security. The form of the bond shall be approved by Town Counsel, and be in an amount deemed sufficient by the **SPGA** to ensure that the work will be completed in accordance with the permit. If the project is phased, the **SPGA** may release part of the bond as each phase is completed in compliance with the permit, but the bond may not be fully released until the **SPGA** has received the final inspection report as required by Subsection **H J** and issued a certificate of completion.

H.J. Inspections.

- (1) At the discretion of the **SPGA**, periodic inspections of the stormwater management system construction may be conducted by the Town via the Planning Board, Conservation Commission, DPW or a professional engineer approved by the **SPGA**. Written reports shall include:
 - (a) Inspection date and location.
 - (b) Evaluation of compliance with the stormwater permit.
 - (c) Any variations from approved specifications or any violations of the stormwater management plan.
- (2) At a minimum, the **SPGA** or its designee may inspect the project site at the following stages:
 - (a) Initial site inspection: prior to approval of any plan.
 - (b) Erosion control inspection: to ensure erosion control practices are in accord with the filed plan.
 - (c) Bury inspection: prior to backfilling of any underground drainage stormwater conveyance structures.
 - (d) Final inspection. After the stormwater management system has been constructed and before the surety has been released, the applicant must submit a record plan detailing the actual stormwater management system as installed. The **SPGA** or its agent may inspect the system to confirm its "as-built" features. This inspector may also evaluate the effectiveness of the system in an actual storm. If the inspector finds the system to be adequate he shall so report to the **SPGA**, which will issue a certificate of completion. As-built plans shall be full-size plans that include all final grades, prepared by a professional engineer. All changes to project design should be clearly depicted on the as-built plans.
 - (e) If the system is found to be inadequate by virtue of physical evidence of operational failure, even though it was built as called for in the stormwater management plan, it shall be corrected by the permittee before the performance guarantee is released. If the permittee fails to act, the Town of Lunenburg may use the surety bond to complete the work. If the system does not comply with the plan, the permittee shall be notified in writing of the violation and the required corrective actions. A stop-work order shall be issued until any violations are corrected and all work previously completed has received approval by the **SPGA**.

SPECIAL TOWN MEETING - November 17, 2020

~~I~~K. Waivers.

- (1) The **SPGA** may waive strict compliance with any requirement of this bylaw or the rules and regulations promulgated hereunder, where such action:
 - (a) Is allowed by federal, state and local statutes and/or regulations;
 - (b) Is in the public interest; and
 - (c) Is not inconsistent with the purpose and intent of this bylaw.
- (2) Any applicant may submit a written request to be granted such a waiver. Such a request shall be accompanied by an explanation or documentation supporting the waiver request and demonstrating that strict application of the bylaws does not further the purposes or objectives of this bylaw.
- (3) All waiver requests shall be discussed and voted on at the public hearing for the project.
- (4) If, in the **SPGA's** opinion, additional time or information is required for review of a waiver request, the **SPGA** may continue the hearing to a date certain announced at the meeting. In the event the applicant objects to a continuance, or fails to provide requested information, the waiver request shall be denied.

~~J~~L. Certificate of completion. The **SPGA** will issue a letter certifying completion upon receipt and approval of the final inspection reports and/or upon otherwise determining that all work of the permit has been satisfactorily completed in conformance with this bylaw.

M. Building Permits. The Building Commissioner shall issue a Building Permit without first confirming that and Stormwater Permit has been obtained or is otherwise not required for the project.

~~K~~N. Enforcement.

- (1) Enforcement agents. The Building Commissioner, in conjunction with the Planning Board, Conservation Commission and DPW Director, shall enforce this bylaw, regulations, orders, violation notices, and enforcement orders, and may pursue all civil and criminal remedies for such violations.

~~L~~O. Civil relief. If a person violates the provisions of this bylaw, regulations, a permit, notice, or order issued thereunder, the Planning Board, through the Building Commissioner, may seek injunctive relief in a court of competent jurisdiction restraining the person from activities which would create further violations or compelling the person to perform abatement or remediation of the violation.

~~M~~P. Orders.

- (1) The Planning Board, in conjunction with the Conservation Commission and DPW Director, may issue a written order to the Building Commissioner to enforce the provisions of this bylaw or the regulations thereunder, which may include:

SPECIAL TOWN MEETING - November 17, 2020

- (a) Elimination of illicit connections or discharges to the MS4;
 - (b) Performance of monitoring, analyses, and reporting;
 - (c) That unlawful discharges, practices, or operations shall cease and desist;
 - (d) Remediation of contamination in connection therewith.
- (2) If the Building Commissioner, in conjunction with the Planning Board, Conservation Commission and DPW Director, determines that abatement or remediation of contamination is required, the order shall set forth a deadline by which such abatement or remediation must be completed. Said order shall further advise that, should the violator or property owner fail to abate or perform remediation within the specified deadline, the Town may, at its option, undertake such work, and expenses thereof shall be charged to the violator.
- (3) Within 30 days after completing all measures necessary to abate the violation or to perform remediation, the violator and the property owner will be notified of the cost incurred by the Town, including administrative costs. The violator or property owner may file a written protest objecting to the amount or basis of costs with the Planning Board within 30 days of receipt of the notification of the cost incurred. If the amount due is not received by the expiration of the time in which to file a protest or within 30 days following a decision of the Planning Board affirming or reducing the costs, or from a final decision of a court of competent jurisdiction, the costs shall become a special assessment against the property owner and shall constitute a lien on the owner's property for the amount of said costs. Interest shall begin to accrue on any unpaid costs at the statutory rate provided in MGL c. 59, § 57 after the 31st day at which the costs first become due.

N. Noncriminal disposition; right of entry.

- (1) As an alternative to criminal prosecution or civil action, the Planning Board may elect, through the Building Commissioner, to utilize the noncriminal disposition procedure set forth in MGL c. 40, § 21D, and Chapter 1, Article 1, of the General Bylaws of the Town, in which case the Planning Board, its authorized agents and the Building Commissioner of the Town shall be the enforcing person. The penalty for the first violation shall be \$25. The penalty for the second violation shall be \$50. The penalty for the third violation shall be \$100 and \$200 for the fourth and each subsequent violation. Each day or part thereof that such violation occurs or continues shall constitute a separate offense.
- (2) Entry to perform duties under this bylaw. To the extent permitted by state law, or if authorized by the owner or other party in control of the property, the Planning Board, its agents, and employees may enter upon privately owned property for the purpose of performing their duties under this bylaw and regulations and may make or cause to be made such examination surveys or sampling as the Planning Board deems reasonably necessary.

OR. Appeals. The decisions or orders of the Planning Board, in conjunction with the Conservation Commission and DPW, shall be final. Further relief shall be to a court of competent jurisdiction.

PS. Remedies not exclusive. The remedies listed in this bylaw are not exclusive of any other remedies available under any applicable federal, state or local law.

SPECIAL TOWN MEETING - November 17, 2020

QT. Severability. The invalidity of any section, provision, paragraph, sentence, or clause of these regulations shall not invalidate any section, provision, paragraph, sentence, or clause thereof, nor shall it invalidate any permit or determination that previously has been issued.

Meeting adjourned at 9:55 p.m.
