

Town of Lunenburg

Capital Investment Plan

January 18, 2022

Heather Lemieux, Town Manager

What qualifies as a Capital Project?

- The Town's Policy on Capital Expenditures (Financial Policy Section 3.02) defines capital projects as items that cost \$20,000 or more and have a useful life of three years or longer.
- The Massachusetts Association of Town Finance Committees defines capital projects as “major, non- recurring expenditures, for one of the following purposes:
 - acquisition of land for a public purpose;
 - construction of a new facility or external expansion or major rehabilitation of an existing one. Examples of such town facilities include public buildings, water and sewer lines, roads and playing fields;
 - any planning, feasibility, engineering or design study related to a capital project or to a capital improvement program consisting of individual projects.
 - equipment for public improvements when they are first constructed such as furniture, office equipment, or playground equipment;
 - major equipment which is expensive and has a relatively long life such as a fire apparatus, garbage trucks, and construction equipment.

Capital Planning Process

- The Capital Planning Committee (CPC) creates a Capital Plan that consists of all capital requests submitted by each town department for the next five fiscal years.
- The CPC's first meeting to begin the FY23 Capital Planning process was on September 14th, the Capital Planning documents were sent to departments in late September and the Capital Planning Committee met with departments throughout November and early December to review all the capital project requests as a group.
- The forms which are sent to departments were based on the UMass Collins Center Capital Planning documents that include various categories such as effectiveness of government, the effect on operating costs, effect on revenues, whether the project is mandated by the State or Federal government, whether grant funds are available, and how the project contributes to such things as economic growth, public safety, public health and education. The Capital Planning Committee evaluates capital requests based on the responses to these categories with each category being assigned a value depending on the response, and a project receives a composite score. The CPC used this information as a starting point for prioritizing projects but also discussed projects in context of the verbal discussions with the requesting department representatives relative to each project.

Capital Planning Process

- The CPC prioritized 31 capital project requests for FY23 and provided the prioritized list to the Town Manager on January 4th.
- The Town Manager may modify this list of capital projects as part of the proposed budget for the next fiscal year. This capital budget is presented at the Annual Town Meeting, amended as necessary to reflect the will of Town Meeting, and voted on. This plan reflects the same projects that the CPC provided the Town Manager with a difference in the prioritization of some of the projects.

FY 2023 Capital Plan TM Priority #1

Project Title: **INFRA21-02 Page Street Culvert Construction**

Project Cost: **\$150,000**

Description and Justification: This project is to replace Page Street Culvert where the bottom of the culvert has deteriorated. The roadway over the culvert is showing signs of failure in settlement of the pavement. The design costs for this project were funded as part of the FY 2022 Capital Plan.

The culvert is beyond its expected lifespan, the replacement will increase efficiencies/effectiveness, reduce potential liabilities, contributes to public safety and environmental sustainability.

FY2023 Capital Plan TM Priority #2

Project Title: **DPW17-08 10 Wheel Truck with plow and sander**

Project Cost: **\$250,000**

Description and Justification: This request is for a new 10 Wheel Truck with plow and sander. This truck will replace the 1994 Mack 10 Wheeler, which is beyond its reasonable life. This truck will increase the effectiveness of the department, decrease costs due to repairs needed on current truck, and contributes to public safety.

FY 2023 Capital Plan TM Priority #3:

Project Title: **FM22-01 PSB
Engineering Design for Drainage**

Project Cost: **\$25,000**

Description and Justification: This request is for engineering design to address the drainage and pavement deterioration that is causing excess water and moisture in the building. Paving at the rear of the building is breaking apart due to lack of proper drainage and poor construction. This year mold grew in the meeting/training room and an air quality assessment was performed that the air quality was acceptable.

This project reduces potential liabilities, does not impact the operating budget, and contributes to public health.

FY 2023 Capital Plan TM Priority #4

Project Title: **FM22-04 Senior Center, HVAC Upgrades**

Project Cost: **\$25,000**

Description and Justification: This project is to install 4 new condensers, 4 new coils, and copper line sets on cooling system for the newer section of the building.

The current equipment is beyond its reasonable life. The project will increase efficiencies and reduce operating costs.

FY 2023 Capital Plan Priority #5

Project Title: **GG22-01 Master Plan**

Project Cost: **\$110,000**

Description and Justification:

This project will supplement the remaining \$43,000 from the FY20 Capital Plan article for updating certain elements of the Master Plan. This funding and the remaining funding will be for the completion of the entire Master Plan. This request is based on feedback that the current allocation would not be adequate for 2 elements of the MP and is more cost effective to do the entire update at once. The Master Plan should be updated every 10 years; the 8 elements that need to be updated were last updated in 2002.

This project is mandated by the State, will increase effectiveness/efficiencies of town government, contributes to economic development, cultural or recreational opportunities, environmental sustainability, and aesthetics/historic preservation.

Lunenburg, Massachusetts

Updated Master Plan

For

The New Millennium

Lunenburg Planning Board

April 2002

FY 2023 Capital Plan TM Priority #6

Project Title: **DPW22-03 Two Way Radio System**

Project Cost: **\$35,000**

Description and Justification:

Currently the DPW uses old portable radios from the Police Department and need to use cell phones during winter road clearing operations. The updated radio system would provide better coverage all over town.

The project would increase effectiveness/efficiencies, reduces potential liabilities, has no impact on the operating budget, and contributes to public safety.

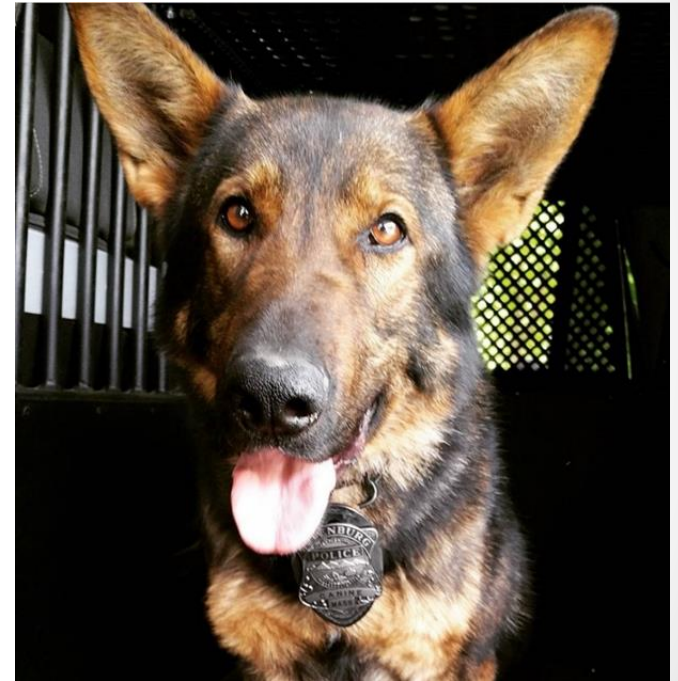

FY 2023 Capital Plan TM Priority #7

Project Title: **PD22-01 Canine Replacement**

Project Cost: **\$24,250**

Description and Justification: This request is to purchase a new K9 and related costs. The current canine, Jerry, has been in service since 2014 and has served longer than is usually expected for a K9. Jerry will be retiring in FY 2023. The cost of a new K9 is \$8,500 and the cost for the training and equipment is \$15,750.

This project increases efficiencies, decreases potential liabilities, does not impact the operating budget, and contributes to public safety.

FY 2023 Capital Plan TM Priority #8

Project Title: **PD20-03 Police
Marked Ford Hybrid**

Project Cost: **\$62,000**

Description and Justification: This cruiser would be an addition to the current fleet to accommodate the 10 year staffing plan. The new cruiser would be a Ford Interceptor Hybrid. The project would increase effectiveness/efficiency, reduces potential liabilities, has no impact on the operating budget, and contributes to public safety and environmental sustainability.

FY 2023 Capital Plan TM Priority #9

Project Title: **FM19-05 Town Hall
Repairs, Vertex Year 2 Items 7-11 & 13**

Project Cost: **\$96,000**

Description and Justification:

This project would be for building interior work and mechanical system work including replacement of the 2 furnace units that heat/cool second floor. The 2 units in attic were installed in the 1990s and need to be worked on frequently.

The furnaces are beyond their lifespan and this project would increase effectiveness/efficiencies, improve customer service, and reduces potential liabilities,

FY 2023 Capital Plan TM Priority #10

Project Title: **INFRA21-05 Flat Hill Road Drainage Design**

Project Cost: **\$45,000**

Description and Justification: This project would be for final design and preparation of construction and bid documents. Preliminary design work has been done for this project. Project will address long standing drainage issues on this section of Flat Hill Road that have historically been a concern raised by residents in this area.

This project will increase effectiveness/efficiencies, reduce potential liabilities, and adds to customer service.

FY 2023 Capital Plan TM Priority #11

Project Title: **LPS19-05 One Ton Dump (F-350) Truck with Plow**

Project Cost: **\$58,833**

Description and Justification:

This vehicle will replace a 2008 Ford F-350 for the Schools. The current truck has significant corrosion that has made the dump body unusable. This vehicle is a key vehicle for snow removal operations on school grounds.

The current vehicle is beyond its expected lifespan, the new vehicle will increase effectiveness/efficiencies, reduce potential liabilities, decrease operating costs, and contributes to public safety.

FY 2023 Capital Plan TM Priority #12

Project Title: **GG22-02 Records Retention Project**

Project Cost: **\$62,500**

Description and Justification: This project is seeking to hire a specialized public records retention company to identify all our archived records, inventory them through a computerized indexing system, move them to appropriate storage containers and shelving. Estimated that we will need to purchase 36 sections of shelving, boxing, indexing, cataloguing approx. 334 boxes (56 days of labor), and boxing material supplies. This project will improve efficiencies, effectiveness of departments managing records, reduces liabilities by preserving records properly, and improves customer service by locating archived records quickly. This project reduces the overall expenses by using only the space needed and destroying records per the retention schedule and eliminating the need for additional storage space.

This project will increase effectiveness/efficiencies, reduce potential liabilities, add/expand customer service, and will reduce operating costs.

FY 2023 Capital Plan TM Priority #13

Project Title: **DPW21-01 Utility Tractor/Rotary Mower Combo**

Project Cost: **\$170,000**

Description and Justification:

This piece of equipment would replace the flail mower that is an attachment on the Trackless tractor. The attachment is approx. 13 years old, is frequently out of service for repair, and is undersized for our current needs. Roadside mowing is among top resident complaints. This piece of equipment will allow for an increase and more efficient mowing/clearing capability.

This equipment will include a replacement of an attachment that is beyond its expected lifespan, increase effectiveness/efficiencies, reduce potential liabilities, add/expand customer service, decrease operating costs, and contributes to public safety.

FY 2023 Capital Plan TM Priority #14

Project Title: **INFRA22-03
Marshall Park Survey**

Project Cost: **\$25,000**

Description and Justification: This project will fund a property line and topographic survey. The survey will be used in the future design improvements that will be completed in FY22.

This project is will reduce potential liabilities, does not impact the operating budget, and contributes to cultural and recreational opportunities.

FY 2023 Capital Plan TM Priority #15

Project Title: **FM21-05 Senior Center, Vertex Items #4, #7**

Project Cost: **\$35,661**

Description and Justification:

This project would replace the section of the 1998 portion of the roof that has not been replaced and has reached its expected lifespan.

This project will reduce potential liabilities and will not have an impact on the operating budget.

FY 2023 Capital Plan TM Priority #16

Project Title: **DPW17-09 One Ton Dump Truck with Plow**

Project Cost: **\$58,000**

Description and Justification:

This vehicle would replace the 2012 Ford F350 (One Ton).

The current vehicle is at its reasonable lifespan and the new vehicle will increase effectiveness/efficiencies of the department.

FY 2023 Capital Plan TM Priority #17

Project Title: **LPS19-10**

Mower

Project Cost: **\$45,000**

Description and Justification:

This piece of equipment would replace the 2000 Toro 455D Mower with Exmark 96.

Availability of parts becoming a significant problem particularly for items related to hydraulics.

This project will reduce operating costs and contributes to environmental sustainability.

FY 2023 Capital Plan TM Priority #18

Project Title: **FM21-06 Brooks House, Vertex Items #3 and #4**

Project Cost: **\$24,000**

Description and Justification: This project would repair the stone foundation and remove and replace the deteriorated steel columns and replace with new sonotubes. Replace stone bearing at northwest corner of building with new sonotube foundation. This project will reduce potential liabilities and contributes to aesthetics/historic preservation.

FY 2023 Capital Plan TM Priority #19

Project Title: **PD16-14-2 Police Marked Ford 150 Responder**

Project Cost: **\$67,805**

Description and Justification: This cruiser would be an addition to the current fleet as there is no multipurpose vehicle. The truck would allow for towing of the 2 utility trailers and boat. During the winter months would be used for patrols during inclement vehicle and to transport snow removal equipment to assist the elderly. The project would increase effectiveness/efficiency, reduces potential liabilities, and contributes to public safety.

FY 2023 Capital Plan TM Priority #20

Project Title: **FM19-08A Old Primary, Vertex Hazardous Materials Abatement**

Project Cost: **\$371,000**

Description and Justification: This project was identified in the Vertex Property Condition Assessment to be done in Years 0-1 (2018) for the abatement of hazardous materials.

The project would reduce potential liabilities, would not impact the operating budget, and contributes to public safety and public health.

Capital Requests Not Included in Plan

TM Ranking	CPC Ranking	Project #	Project Title	Project Description	FY 2023
21/30	21/30	FM17-16B	Senior Center, Install Generator	Generator would provide continuing of use in building when there are power outages. The fire suppression system requires a power supply and has to be manually turned back on when power goes out. This issue caused water damage during the 2008 Ice Storm. Both COA Director and Fire Chief in favor of creating a second emergency shelter at senior center that would be only for seniors.	\$ 90,000
22/30	22/30	FM19-06A	Ritter Repairs, Vertex Year 0-1	Evaluation and Hazardous Materials Abatement	\$ 182,000
23/30	23/30	FM22-03	Senior Center, Patio	Project is currently in the design phase and this project would be to construct a new multi purpose patio with hardscape area at rear of building.	\$ 100,000
24/30	26/30	LPS19-3-B	AC for classrooms at Primary School	This project will install condensers to allow the Energy Recovery Units on the Primary School roof to be able to cool the classrooms. In 2004 when the Primary School was constructed, 2 ERUs were provided with cooling capability and locations and sizes were set for providing condensers at a later date. Includes classrooms, library area, gym, and cafeteria.	\$232,800
25/30	24/30	FM21-07	Brooks House Vertex Items #5-12	Building exterior work and roof repairs	\$132,000
26/30	25/30	FM19-09A	Brook House Vertex Costs in Yrs 0-1	This project would include abatement of hazardous materials and installation of backflow preventer for water line.	\$111,000
27/30	27/30	FM20-05	Senior Center New Parking Lot	Creation of new parking lot between Eagle House and Kids Kingdom to create more off street parking. This would address safety concerns with seniors parking in the street to access the Eagle House. This project was not ranked due to insufficient information and that further preliminary information is needed.	\$150,000
28/30	28/30	FM16-04	Public Safety Building, Police Records Room (new)	This project would finish the unfinished space on the second floor on the Police side of the PSB (34 x 28) for records storage and office space.	\$ 230,000
29/30	29/30	FM16-06	Public Safety Building, Unused Space, Fire	This project would finish the unfinished space on the second floor on the Fire side of the PSB (28 x 84) for gym area, records storage and equipment storage.	\$ 132,000
30/30	30/30	FM19-07A	TC Passios Repairs, Vertex Year 0-1	Evaluation and Hazardous Materials Abatement, Electrical service testing and inspection, backflow preventer	\$ 943,000

The total cost of projects not funded in the current plan is
\$2,303,000

Our five year average expenditure on capital is \$1.3M and the three year average is \$1.47M. Given there are capital project requests totaling \$28.98M at this point in time for the next 10 years, and if our funding remains consistent, we will not be funding between \$14.28M-\$15.98M in capital requests. However, this total includes the repairs to the TC Passios Building (\$4.5M) and Turkey Hill Elementary School (\$14.7M), which both projects would be expected to be debt exclusions.

- This slide demonstrates the scenario of using a foundation of \$700,000 from R&A increasing at 2.5% each year, a foundation of \$500,000 from Free Cash each year, and the use of the Special Purpose Stabilization Fund for costly equipment;
- Continue putting funding into the Special Purpose Stabilization each year and eliminate the need to borrow for costly equipment;
- Depending on what the end use for certain town buildings is, if the projects in the 10 year plan for certain buildings are eliminated it will reduce the amounts needed in the Capital Plan. Ultimately there will be a financial impact for both buildings but end use will determine the extent and effect the decisions that will need to be made regarding financing.

Next Steps

- Re-evaluate the FY2023 Capital Plan as the FY2023 budget development progresses to see if additional funding can go towards the FY2023 projects that were not funded. Deferred projects will compound the amount needed for capital in future years.
- Consider adoption of a policy that dedicates a portion of the budget for capital outlay to have a consistent amount dedicated towards capital. Tax revenue is a reliable source of funding as opposed to free cash, which fluctuates. This will help establish a baseline for funding future capital budgets.
- Plan on using the Special Purpose Stabilization Fund in years that have items such as a Fire Squad 3 or Ambulances unless there were sufficient funds through other regular sources (R&A, Free Cash, Unexpended Capital). Current balance of SPS approx. \$1.45M.
- Once a plan for THES and TCP are known, this will determine the need for the capital projects for those two buildings on the 10 year plan and if funded outside the levy.
