

Town of Lunenburg

Capital Investment Plan Presentation

January 19, 2021

Heather Lemieux, Town Manager

What qualifies as a Capital Project?

- The Town's Policy on Capital Expenditures (Financial Policy Section 3.02) defines capital projects as items that cost \$10,000 or more and have a useful life of three years or longer.
- The Massachusetts Association of Town Finance Committees defines capital projects as “major, non- recurring expenditures, for one of the following purposes:
 - acquisition of land for a public purpose;
 - construction of a new facility or external expansion or major rehabilitation of an existing one. Examples of such town facilities include public buildings, water and sewer lines, roads and playing fields;
 - any planning, feasibility, engineering or design study related to a capital project or to a capital improvement program consisting of individual projects.
 - equipment for public improvements when they are first constructed such as furniture, office equipment, or playground equipment;
 - major equipment which is expensive and has a relatively long life such as a fire apparatus, garbage trucks, and construction equipment.

Capital Planning Process

- The Capital Planning Committee (CPC) creates a Capital Plan that consists of all capital requests made by each town department for the next five fiscal years.
- The CPC's first meeting to begin the FY22 Capital Planning process was on September 9th, the Capital Planning documents were sent to departments in October and the Capital Planning Committee met with departments throughout November and December to review all the capital project requests as a group.
- The forms which are sent to departments were based on the UMass Collins Center Capital Planning documents that include various categories such as effectiveness of government, the effect on operating costs, effect on revenues, whether the project is mandated by the State or Federal government, whether grant funds are available, and how the project contributes to such things as economic growth, public safety, public health and education. The Capital Planning Committee evaluates capital requests based on the responses to these categories with each category being assigned a value depending on the response, and a project receives a composite score. The CPC used this information as a starting point for prioritizing projects but also discussed projects in context of the verbal discussions with the requesting department representatives relative to each project.

Capital Planning Process

- The CPC prioritized 19 of the 23 capital project requests for FY22 and provided the prioritized list to the Town Manager on January 5th.
- Certain projects were not ranked, certain projects initially submitted by departments were removed due to the department receiving a grant to pay for the project and one project was removed as it was below the \$10,000 threshold.
- The Town Manager may modify and/or add to this list of capital projects as part of the proposed budget for the next fiscal year. This capital budget is presented at the Annual Town Meeting, amended as necessary to reflect the will of Town Meeting, and voted on. This plan reflects the same projects that the CPC provided the Town Manager, discusses the prioritization of projects, and amends the costs for 2 of the projects due to new information received after the CPC finalized their prioritization.

FY2022 Recommended Capital Plan

FY 2022 Capital Requests

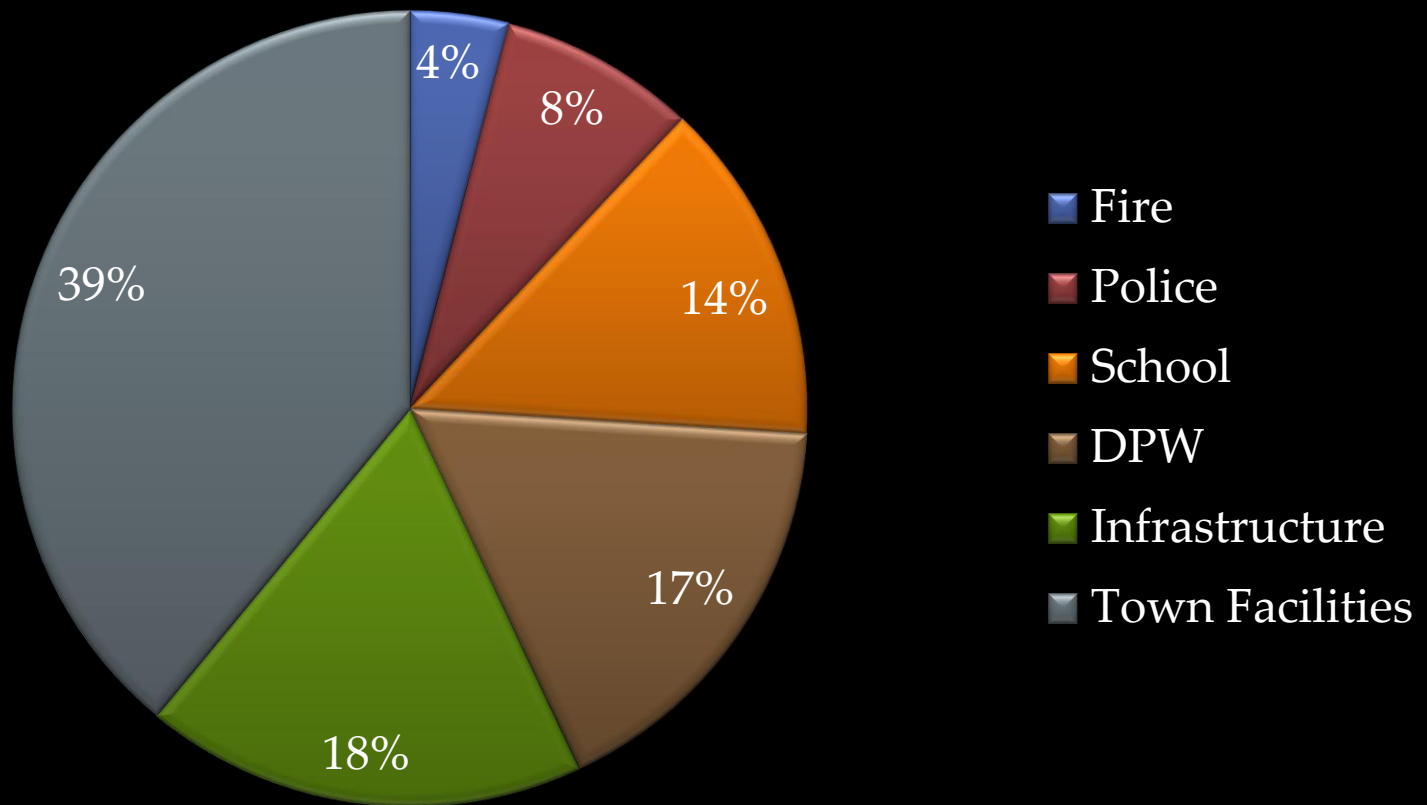

There were 23 capital requests totaling \$2,547,312 for FY 2022:

CIP#	Dept.	Project Name	Category	FY2022 Projected
FM16-04	Town Facilities	PSB, Construct Records Room	Facilities	175,000
FM16-05	Town Facilities	PSB, Replace Carpet 1st Floor	Facilities	55,000
FM17-05	Town Facilities	PSB, Chiller Replacement	Facilities	150,000
FM20-04	Town Facilities	Senior Center, Interior Painting	Facilities	15,500
FM20-05	Town Facilities	Senior Center, New Parking Lot	Facilities	125,000
FM20-03	Town Facilities	Ritter, ADA Ramp Construction	Facilities	127,500
FM21-03	Town Facilities	Ritter, Envelope Repair Projects in Vert	Facilities	120,000
FM21-02	Town Facilities	Town Hall Repairs- Vertex Year Items 2	Facilities	69,425
FM19-09A	Town Facilities	Brooks House- Vertex Year 0-1	Facilities	91,992
FM21-06	Town Facilities	Brooks House-Vertex Items #3, #4 Four	Facilities	19,995
FM21-08	Town Facilities	Marshall Park Masterplan	Facilities	50,000
TOTAL Facilities				999,412

FY 2022 Capital Requests

CIP#	Dept.	Project Name	Category	FY2022 Projected
PD16-07	Police	Bulletproof Vests, 29 Officers	Equipment	17,500
PD17-02-B	Police	Police Vehicle, Marked Replacement	Vehicle	66,950
PD20-02	Police	Police Vehicle, Marked Replacement	Vehicle	66,950
PD18-02	Police	Police Vehicle (Replacement Canine Cruiser)	Vehicle	67,000
Subtotal Police				218,400
FD21-01	Fire	Turnout Gear	Equipment	100,000
Subtotal Fire				100,000

FY 2022 Infrastructure Capital Request

Project Title: **INFRA20-01 Flat Hill Culvert Reconstruction**

Project Cost: **\$428,500**

Description and Justification: This request is to reconstruct the Flat Hill Culvert. At the June 2020 Annual Town Meeting funding was approved to proceed with the engineering and design necessary to reconstruct this culvert through the MassDOT design standards and process. MassDOT typically does inspections every 1-2 years; in the fall of 2019 the inspection raised the pipe and headwall and rated it severely deficient with the urgency of repairs to be addressed ASAP. At a follow-up inspection on January 5th, the inspector raised the deficiencies for the Headwall and Pipe from severely deficient to a Critical Structural Deficiency with the urgency of repairs raised to immediate and due to settlement on the southbound lane, the bridge was reduced to one lane. The Town is working with our engineer that is doing the design for the reconstruction to submit a Small Bridge Grant application but funding is not guaranteed. If the Town does receive funding through the SBGP the unexpended capital funding will be reallocated at a future town meeting.

This project is being mandated by the State, is over its reasonable life span, increases effectiveness/efficiencies, reduces liabilities, does not impact the operating budget, contributes to public safety and environmental sustainability.

FY 2022 Infrastructure Capital Request

Project Title: **INFRA21-01 Page Street Culvert Survey/Design/Permitting**

Project Cost: **\$20,000**

Description and Justification: This request is to perform the necessary survey, design, and permitting for the reconstruction of the Page Street culvert near Arbor Street. The roadway is showing settling that would indicate the failure of the pipe and if further deterioration is noted a plate may need to be installed.

This structure is over its reasonable life span, increases effectiveness/efficiencies, reduces potential liabilities, does not impact the operating budget, and contributes to public safety and environmental sustainability.

FY2022 Town Facilities Capital Request

Project Title: **FM17-05 Public Safety Building
Chiller Replacement**

Project Cost: **\$150,000**

Description and Justification:

This project has been on the capital plan since FY2017. The current chiller, which is the unit that provides air conditioning to the entire building, is in imminent failure. The unit is 16 years old and is over its expected lifespan. The unit has had a number of repairs over the years to keep it functioning but in its current state cannot be repaired without a substantial investment outside the budget and is not expected to function in its current state in the summer of 2021. As it relates to the unfinished portions of the building, this unit is designed to handle the entire footprint of the building and the rough plumbing for the HVAC was installed in the second floor when the building was built.

This project will increase effectiveness/efficiencies and will decrease annual operating costs due to decrease maintenance costs.

FY2022 Town Facilities Capital Request

Project Title: **FM20-03 Ritter, ADA Ramp Construction**

Project Cost: **\$127,500**

Description and Justification:

The engineering/design for this project was approved at the November 2020 Special Town Meeting and is expected to be complete by the end of this fiscal year. The next step in the process would be to proceed with the construction of the ramp that will address the lack of an appropriate ADA entrance to this building. There is no expectation that we would receive funding through a grant for this project.

This project would increase effectiveness/efficiencies, address potential liabilities, improve customer service, make the Ritter Building entrance ADA compliant, and would contribute to public safety.

FY2022 Town Facilities Capital Request

Project Title: **FM21-02 Town Hall Building Envelope Repairs in Vertex Report**

Project Cost: **\$69,425**

Description and Justification: This project would be to cut out and replace the sealants between the siding and wall penetrations (windows and doors), replace the windows at the basement level, replace the existing roof, and repair the chimney.

Items were included in the Vertex Property Condition Assessments as needed to be addressed between FY18-FY20. These envelope repairs will ensure the integrity of the building, reduce the potential liability of leaks, as well as the aesthetics, heat loss, therefore making the building more energy efficient.

FY2022 Town Facilities Capital Request

Project Title: **FM21-03 Ritter Building
Envelope Repairs**

Project Cost: **\$120,000**

Description and Justification:

This project would include removing and replacing the decorative trims/fascia, cutting out and replacing sealants between various materials (windows and doors), and replacing the windows. The bid would include alternates for select roofing repairs, repairing the gutters, brick-mortar repair (clean, pressure wash, repoint mortar), select brick-brick repair and replacement, repainting of exterior walls, and replacing the wood shutters.

Items were included in the Vertex Property Condition Assessments as needed to be addressed between FY18-FY22. These envelope repairs will ensure the integrity of the building, as well as the aesthetics, heat loss, therefore making the building more energy efficient.

FY2022 Town Facilities Capital Request

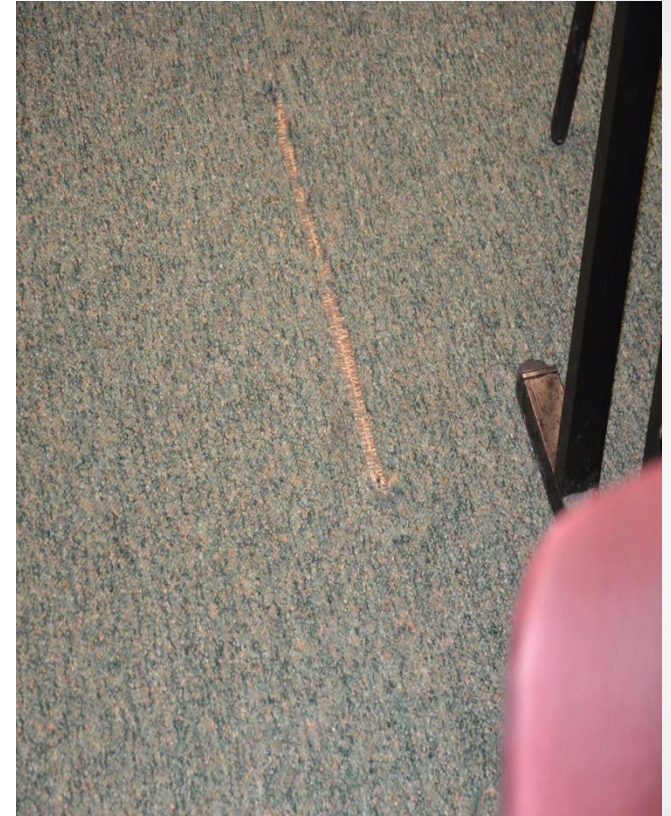

Project Title: **FM16-05 Public Safety Building Carpet Replacement**

Project Cost: **\$55,000**

Description and Justification:

This project would replace the original carpet in the public safety building that was constructed 16 years ago. The carpet has reached its expected lifespan and is presenting tripping hazards due to wear and tear.

This project will reduce potential liabilities and will not have an impact on the operating budget.

FY2022 DPW Capital Request

Project Title: **DPW17-07 6 Wheel Dump Truck with Plow and Sander**

Project Cost: **\$211,000**

Description and Justification: This project is to replace the 2005 International 6 Wheel Dump Truck that is at the end of its lifespan and may not make it to the end of the current snow season. The body is beyond repair as there is no viable metal to even weld do any more and the structural integrity of the frame is becoming a safety concern as well. Recently this truck has developed an engine oil leak coming from behind the oil cooler on the engine block. Fixing this issue would result in extensive work costing a significant amount of money. The reason for this is that anything that needs to be removed to fix this issue will also need to be replaced due to how delicate of shape the truck is in. This is the second engine that has been in this truck. Also the truck has many electrical issues as the mechanic is constantly chasing wiring issues. In the town mechanics professional opinion, he will be surprised if this truck makes it through the rest of the winter season without any major issues.

This vehicle is used primarily for snow operations for plowing and sanding main roads but is also used year-round. If this vehicle were removed from the fleet and not replaced it would significantly impact snow operations. The truck currently has approximately 83,000 miles on it.

The project will increase efficiencies/effectiveness, decrease the operating costs due to decreased maintenance costs, and contributes to public safety.

FY2022 Police Capital Request

Project Title: **PD16-07 Bullet Proof Vests**

Project Cost: **\$17,500**

Description and Justification: This project is seeking to purchase 29 bullet proof vests as the current vests will be at the end of their five year lifespan. The FY17 Capital Plan appropriated \$17,500 for the purchase of vests and there is \$5,768 remaining for that capital project that will reduce the total cost of \$23,200 for 29 vests to \$17,500. The project reduces potential liabilities, has no impact on the operating budget, there is a federal grant that half the cost may be eligible for funding, and it contributes to public safety.

FY2022 Police Capital Request

Project Title: **PD17-02B Hybrid Replacement Marked Police Cruiser**

Project Cost: **\$66,950**

Description and Justification: This project is a replacement cruiser for Cruiser #209 (2019 Chevy Tahoe); the replacement would be a 2021 Ford Explorer Hybrid. The 2019 Chevy Tahoe would become a spare vehicle. Spare cars are used by Reserve Officers and are used when there are added patrols for such things as OUI patrols, Click or Ticket campaigns, and other direct patrol events. By the time that the vehicle is ordered and outfitted, the current cruiser is estimated to have between 70,000-90,000 miles.

The project would increase effectiveness/efficiency, reduces potential liabilities, has no impact on the operating budget, and contributes to public safety.

FY2022 Police Capital Request

Project Title: **PD20-02 Hybrid Replacement Marked Police Cruiser**

Project Cost: **\$66,950**

Description and Justification: This project is a replacement cruiser for Cruiser #210 (2019 Chevy Tahoe); the replacement would be a 2021 Ford Explorer Hybrid. The 2019 Chevy Tahoe would become a spare vehicle. Spare cars are used by Reserve Officers and are used when there are added patrols for such things as OUI patrols, Click or Ticket campaigns, and other direct patrol events. By the time that the vehicle is ordered and outfitted, the current cruiser is estimated to have between 70,000-90,000 miles.

The project would increase effectiveness/efficiency, reduces potential liabilities, has no impact on the operating budget, and contributes to public safety.

FY2022 Fire Dept. Capital Request

Project Title: **FD21-01 Turnout Gear**

Project Cost: **\$100,000**

Description and Justification: This request is for 20 sets of personal protection equipment for firefighters. This would provide most personnel with a new set of PPE. Their existing gear in most cases could be maintained as a spare set. The Fire Department's operating budget has been historically funded at \$10,000/year to replace Protective Equipment. This originally allowed them to purchase 5 sets of equipment per year. Due to inflation, this now purchases 2 sets of gear. At 30+ Firefighters and a recommended service life of 10 years the replacement cycle has become unsustainable. In FY'14 an adjustment of Capital funds for Protective Equipment allowed the purchase of 10 sets, which temporarily offset the issue. Another issue is the increasing concern of exposure to carcinogens that are absorbed into the equipment while fighting a fire. While the FD has the equipment to clean the clothing, many firefighters have no spare set of gear to use while it is being cleaned. Cleaning cycle can take up to 24 hours in some cases. This equipment will increase the effectiveness of the department, decrease potential liabilities, the purchase of these 20 sets does not impact the operating budget, and contributes to public safety.

FY2022 School Capital Request

Project Title: **LPS20-01 Turkey Hill Elementary
School Envelope Repairs**

Project Cost: **\$67,000**

Description and Justification: This project will repair damaged concrete window sills in the gym section of the building that are deteriorating badly, repair fascia on the administration section, interior courtyard and front awning. The membrane that wrapped the fascia has failed and the plywood layer of the fascia is partially exposed. This project is needed to keep water out of the building and ensure that any portion of the concrete sill does not fall from the building.

This project is not eligible for MSBA or Green Community funding. Green community funding has funded the addition of insulation on the interior of the fascias but is not available to provide the waterproof coverings for the plywood. This project over the expected lifespan, increases efficiencies, decreases liabilities, does not impact the operating budget, and contributes to public safety, education, aesthetics, and environmental sustainability.

Fascia membranes failing

Total Length to be replaced: 482'

- 222' on front awning
- 164' in courtyard
- 96' on connecting hallway

Projects Not Funded for FY2022

Project #	Project Title	Project Description	CPC Ranking	FY2022
TOWN FACILITIES				
FM21-08	Marshall Park Masterplan	The Parks Commission is reviewing the future uses and better use of land at Marshall Park. Plan would incorporate all necessary design considerations, including parking.	14/19	\$ 50,000
FM16-04	Public Safety Building, Police Records Room (new)	This project would finish the unfinished space on the second floor on the Police side of the PSB (34 x 28). The space was originally designed to be a finished space but was not completed as part of the original PSB construction. The space is to be used for archival records storage. The area under consideration has an insulated wood framed floor structure capable of supporting 70 lbs per SF of live load; insulated concrete masonry walls to approx. 64 inches above the floor; and an uninsulated wood framed attic space above the concrete masonry walls which slopes up to a ridge at 21 feet above the floor. There is fire suppression in the attic space and on the floor below. Construction to be a records storage room requires it to have a live load capacity of the floor of at least 125 lbs per SF, be constructed with fire resistant construction with a detecting fire alarm and fire suppression and climate controlled. The current live load capacity is not adequate for stacked paper records so the existing floor structure would be upgraded as part of this project and a fire resistant coating would be applied to the floor joists and plywood subfloor and fire rated walls and ceiling. Smoke detection would be installed and connected to the existing fire alarm system that would be a chemical system so as to not result in water damage to records. A 2 hour fire rated security door would be the access point.	17/19	\$ 175,000
FM20-04	Senior Center Interior Painting	Painting of the interior rooms of the Eagle House.	Not Ranked	\$ 15,500
FM20-05	Senior Center New Parking Lot	Creation of new parking lot between Eagle House and Kids Kingdom to create more off street parking. This would address safety concerns with seniors parking in the street to access the Eagle House. This project was not ranked due to insufficient information and that further preliminary information is needed.	Not Ranked	\$125,000
FM21-06	Brooks House- Vertex Items #3, #4	This project would address repairs to the foundation.	Not Ranked	\$19,995
FM19-09A	Brook House Vertex Costs in Yrs 0-1	This project would include abatement of hazardous materials and installation of backflow preventer for water line.	Not Ranked	\$91,992

Projects Not Funded for FY2022

Project #	Project Title	Project Description	CPC Ranking	FY2022
DPW				
DPW21-02	3/4 Ton Pickup Truck	This project would be a new vehicle for the DPW Director. The Director currently is using the 2018 Ford350 and is recommending this vehicle be used by the DPW Mechanic so he has a dedicated vehicle in the events he needs to drive to the location of vehicles that need work.	15/19	\$ 48,000
DPW21-01	Utility Tractor	This project would be a new piece of equipment for the DPW. This project would allow the DPW to do larger projects in-house and the department could get a lot more done in less time.	18/19	\$ 165,000
POLICE				
PD18-02	Police Cruiser, Replacement for Canine Cruiser	K-9 Cruiser #216 is a Chevy Tahoe purchased in 2015. It was scheduled for replacement in 2021 but it was re-scheduled for FY22 to accommodate a Green Communities grant for hybrid cruisers. The associated cost to replace the vehicle includes up-fitting the vehicle and any replacement parts to accommodate the K9 equipment. The current K9 vehicle would be cycled to the Comfort Dog Handler.	16/19	\$67,000
SCHOOL				
LPS19-3-B	AC for classrooms at Primary School	This project will install condensers to allow the Energy Recovery Units on the Primary School roof to be able to cool the classrooms. In 2004 when the Primary School was constructed, 2 ERUs were provided with cooling capability and locations and sizes were set for providing condensers at a later date. Additionally 5 unit ventilators will be retrofitted with cooling coils so that the Music Room and the cafeteria would have cooling. This project will allow the cafeteria and all classrooms to be cooled in warm weather. This project is not eligible for MSBA or Green Community funding. The Town approved funding at the last town meeting for the design portion of this project.	19/19	\$290,000

The Total amount that was not funded in FY22 requests is **\$1,047,487**

Our five year average expenditure on capital is \$1.06M and the three year average is \$1.44M. Given there are capital project requests totaling \$18.5 M at this point in time for the next 10 years, and if our funding remains consistent, we will not be funding between \$4.1M-\$7.9M in capital requests. However, this total changes if we eliminate the Brooks House and TCP projects.

- This slide demonstrates the scenario of using a foundation of \$600,000 from R&A increasing at 2.5% each year, a foundation of \$500,000 from Free Cash increasing at 2.5% each year, and the use of the Special Purpose Stabilization Fund for costly vehicles;
- Depending on what the end use of the Brooks House and the TCP Building, if the projects in the 10 year plan for these two buildings were eliminated it will reduce the amounts needed in the Capital Plan. Ultimately there will be a financial impact for both buildings but end use will determine the extent and affect the decisions that will need to be made regarding financing.

Next Steps

- Re-evaluate the FY2022 Capital Plan as the FY2022 budget development progresses to see if additional funding can go towards the FY2022 projects that were not funded. Deferred projects will compound the amount needed for capital in future years.
- Consider adoption of a policy that dedicates a portion of the budget for capital outlay to have a consistent amount dedicated towards capital. Tax revenue is a reliable source of funding as opposed to free cash, which fluctuates. This will help establish a baseline for funding future capital budgets.
- Plan on using the Special Purpose Stabilization Fund for in years that have items such as a 6 Wheeler, 10 Wheeler, or Ambulance unless there were sufficient funds through other regular sources (R&A, Free Cash, Unexpended Capital). Current balance approx. \$1.2M.
- Once a plan for THES and TCP are known, this will determine the need for the capital projects for those two buildings on the 10 year plan.
