Organizational Structure

Staffing Overview

This section outlines the department's staffing composition of the IT Department, a combination of internal staff and contracted IT services through Suzor IT.

Service Trends & Initiatives

- IT Helpdesk Tickets are submitted by Town employees and are tracked by fiscal year.
- These trends illustrate workload/demand and average resolution time over the past few years.
- Tickets have consistently been between 800-1200 per fiscal year, for FY26 we have had over 630 tickets YTD.
- The current average resolution time for FY26 is about 18.7 hours.
- We did a large equipment upgrade in FY22. We are now maintaining a device replacement plan for all departments.
- We are steadily increasing internal and external communications through routine website and social media updates, monthly employee newsletters, and implementation of the employee intranet.
- Reduced reliance on onsite IT Technician.

\$535,459.33 Total FY27 Budget Request

The proposed budget of \$535,459.33 reflects a \$44,174.91 (8.99%) increase from the prior year, ensuring continued delivery of essential services and addressing rising operational costs.

Major cost drivers

- MUNIS is no longer partially funded through ARPA (in FY26, \$47,027 was funded through ARPA)
- Telephone Charges have been underbudgeted in previous years
- Contracted Services with Suzor IT

Offsetting Costs

- Reducing number of days with Suzor IT- we have already gone down to 4 days a week in FY26, with the possibility of moving down to 3 days in FY27, which is a cost savings of approx. \$18,000
- ClearGov will not be renewed, which is a cost savings of about \$21,000

FY27 Summary & Recap

- The FY27 IT budget represents townwide technology support, including responsibility for hardware and software systems used townwide.
- The budget absorbs the loss of one-time ARPA funding that previously offset MUNIS software costs.
- Telephone expenses are being corrected after several years of underbudgeting.
- Continued reductions in contracted IT support may create operational risk, particularly slower response times and reduced service capacity.
- ClearGov software will not be renewed, with a savings of about \$22,000.
